## The PHILCO RETAINER and a Two-Year Automobile Battery Guarantee

The Philco Retainer, as it looks to the acid

**THE Two Year Guarantee on the Philadelphia Diamond Grid Battery with the Philco Retainer** is a contract with the car owner which could not be entered into lightly.

The Philco Retainer holds the active material on the plates and at the same time permits the free circulation of acid and current, because of its slotted construction.

It is the active material which produces the current. As long as it stays in place the battery is workable. The Philco Retainer keeps this active material in place long after it would have dropped out in any other battery.
