

Newberg High School News

EDITED BY STUDENTS OF THE ENGLISH DEPARTMENT.

The following members of the English 5 class were responsible for this week's notes: Editor, Irene Hollenbeck; reporters, Nina Johnson, Maurine Youngs, Anna Deach, Rose Schaad, and Walter Stanbrough.

"FLUNK DAY" CAUSES JUNIORS TO BE EXPELLED

A large truck carried the Junior "Flunkers" to Oswego Lake Wednesday, May 25. Rowing and swimming were the chief pastimes, and the good eats provided by the girls were enjoyed by all.

Junior "Flunk Day" comes but once a year but the holidays that follow may seem long and lonely. The juniors set a day for the annual "flunk" day and the weather did its part to make the picnic a success, but through a misunderstanding fourteen of the thirty-eight juniors were not present at the picnic and twelve of them were at school during the morning. At noon these twelve were excused by Mr. Ross for the remainder of the day. They spent a very pleasant afternoon and evening on a picnic playing games and making ice cream.

Because of the warning given the juniors concerning "flunk" day in which they were told the sentiments of the principal and members of the faculty, all juniors observing the day were suspended for a period of three days, and will be required to take the final examinations. The "flunkers" took their punishment as gracefully as possible and all were back to resume their studies Wednesday.

The first field meet even held in Newberg was a great success. It was observed by both the grammar school and high school and many parents on the high school campus last Friday. It started off with the following program splendidly given by the grade school: Song, Primary department; Drill, 8th grade; Song, "The Student's Way," 6b Boys; Drill, 1st and 2nd grades; Folk Dance, 2nd grade; Song, "Old Glory," 8th grade; Song, 7th grade; Song, "Oregon," 6b girls. Races and a ball game followed the program. The proceeds from the ice cream, candy, popcorn and punch furnished by the parent-teacher's association amounted to \$27. This will go into the treasury of the association and will be used for the betterment of the schools.

The freshmen entertained the juniors Monday afternoon at Oswego lake. They met at the High school at twelve o'clock and went in large trucks to Lake Grove. Much time was spent swimming and boat riding while some spent pleasant hours playing games. Seven was set as the hour to return and it was with reluctance that they piled into the trucks.

The Sophomores held a class meeting Wednesday and appointed a committee to arrange for a class picnic to be held some evening after school.

The Newberg high school baseball team defeated Woodburn Friday afternoon, 12 to 10. Nelson struck out 18 men and succeeded in hitting a home run.

To increase school spirit, Miss Applegate is leading in the singing of patriotic, popular and school songs, during the first ten minutes of the first period in the morning.

THE HIGH SCHOOL AGRICULTURAL NOTES

(Oliver F. Kilham)

The May 14th issue of the Rural New-Yorker contains an article entitled "Bitter Struggle Over Canning Crop Prices," referring to the fight in Western New York state between the farming and canning interests. In the article, this statement

among others is made, "in any fruit or vegetable country, a canning factory is the biggest asset of the community."

Such a statement would appear to us hardly true, but certain it is that in such a community a canning factory is one of the biggest assets, and it is within the range of possibility for it to be the biggest, if it has a big enough man in charge of it.

The cannery we have here in Newberg is an institution to which we may point with considerable pride and satisfaction, even though we do know as some say, that "moldy fruit is dumped right in with the good."

Rather than knock, let us all boast and if this be true, let us insist that conditions be changed, so that each worker in the place will be not only willing but mighty glad to eat the fruit he and his co-workers prepare and put into the cans or jars.

"The Berrians City" must have a cannery else it cannot excel as a berry center. We of Newberg are behind the cannery. We shall insist that it be run in a way that will make us proud of it. Let us help make the cannery enterprise a local success, and so help bring both a greater individual and community success.

The cannery (our cannery) must be the show place of Newberg, where "The Berrians" are located. We want no dirty spot in it. We want no cause for complaint as to the inner workings of the plant, which we recognize as being due to the desire on the part of the piece-workers to make money rather than to faulty management.

Absolutely clean and sanitary throughout—that is the idea. That is what we must be able to say honestly to our friends and visitors. It perhaps has not been so in the past, but "The Berrians" must insist that it be so from now on.

The cannery is to run this summer and we are all glad. Shall we not do our share that it may be a "money maker," and a credit to us.

Home Town Helps

NOT ALLOWED TO BE PESTS

City of Boston Has Strict Regulations Governing Construction and Maintenance of Billboards.

The following regulations are in effect in the city of Boston, governing the use of billboards:

No outdoor advertising shall be permitted on any location within 500 feet of town or city parks, playgrounds, metropolitan parks, parkways, state reservations or public buildings.

No outdoor advertising sign shall exceed an area of ten square feet if within 500 feet of any public highway.

No outdoor advertising sign, wherever located, shall exceed an area of 100 square feet, and all such signs shall be rectangular in form.

No outdoor advertising shall be permitted upon any rock, tree or natural object of beauty.

All fields and backgrounds of outdoor advertising shall be of neutral colors, and the fields, backgrounds and letters thereon shall not be discordant with surroundings, and nothing shall be placed thereon except letters of the alphabet and numerals.

No outdoor advertising shall be allowed within the area between intersecting streets and within a radius of

350 feet from the point where the center lines of the streets intersect.

The structure and the materials of all outdoor advertising signs shall meet the approval of the department of public safety of the state as regards all questions of fire hazard.

No waste or other rubbish resulting from any billboard or outdoor advertising sign shall be allowed to accumulate on or in the vicinity of the premises where the same is located.

Bottoms of all signs shall be at least three feet from the ground.

No outdoor advertising shall be permitted or allowed to be maintained without an annual state license.

SEE VALUE OF PLAYGROUNDS

Cities Spending Much Money Now for Recreational Centers, Which Might Have Been Saved.

Memphis, Milwaukee, Indianapolis, Akron and Hartford have in the course of the last year doubled their appropriations for playgrounds, while Dayton trebled its appropriation the year before. Detroit has issued \$10,000,000 in bonds for parks and playgrounds; Portland, Ore., has issued \$500,000 for the purchase of playgrounds, and Pittsburgh \$981,000 for the same purpose. With the increase of congestion in the streets of American cities the business of being a child becomes more and more hazardous. In this connection the American City states that 23 children a month, on an average, were killed in the streets of New York city during 1920. Few blocks in the city have provision for play space. Of the 15 play centers planned by the Playground association all but six remained closed because of lack of funds. It is pointed out that the policy of providing accommodations for play should be adopted in connection with rebuilding and the construction of new buildings.

The time to lay out playgrounds and recreational centers is before the town has grown to an extent that makes it necessary to condemn property for such purposes. Let there be a properly understood, comprehensive plan followed in the development of the town from its start.

Bathtub Five Feet Deep Unearthed. In demolishing one of New York city's old houses recently, a bathtub eight feet long, four feet wide and five feet deep, made of wood and lined with zinc, was discovered by workmen. "To get into it," says the writer who tells of it, "one had to ascend a flight of steps. It had no hot water connection and was used by an old woman born in the house who remembered that it always was there. There were 20 rooms in the house, and this bath in one of them on the third floor was the only bath in the house. It is said this bathtub was one of the first bathtubs in New York."

The Better Part. "How much have you left of your week's salary?" "Oh, the better part." "Impossible! I know you have spent more than half." "True, but I have part of it left and what isn't spent is certainly the better part."

TREES RESEMBLE GIANT BOTTLES

Zanzibar and Pemba, two tiny islands off the east coast of Africa, supply 90 per cent of the world's cloves. Born in the tropics, the clove takes into itself some of the intense heat of a clove plantation in the harvest is said to experience one of the most fascinating sights on earth. The high trees—some of them nearly 40 feet, and closely resembling the olive tree in appearance—are suggestive of giant perfume bottles, disguised in leaves. The air is saturated with the delicious scent, and for many days afterwards one's clothes carry the seductive aroma.
