No. 38

LIST OF TEACHERS FOR NEXT YEAR

PROF. STANBROUGH FOR SUPT.

Few Vacancies Remain—Salaries of Different Teachers Given—E. H. Ross High School Principal

Everyone is interested in learning the names of the teachers who have charge of the various departments of the high and grammar schools of the district and so, while all have not been definitely signed up yet, the following is the list so far completed:

Superintendent of schools, A. C. Stanbrough, who has received the degrees of A. B. and B. S. from Pacific College.

Principal of the high school, E. H. Ross, a graduate of Carleton College, Minnesota, who will have classes in science.

Donald Mattews of Willamette University, teacher of science at the high school.

Twila Sims of McMinnville college, teacher of English in the high school.

Virge Anderson of Oregon Agricultural College, instructor in English at the high school.

Mabel Waterman of Oregon Agricultural College, instructor in domestic science and art at the high school.

O. F. Kilham, of Oregon Agricultural department at the high school.

Mrs. Leona Huddleston of Friends University, teacher of history at the high school.

Jessie Laird, of Reed College, teacher of biology at the high school.

Elton Nofstinger of McMinnville College, teacher of mathematics at the high school.

This leaves three vacancies in the high school faculty which will be filled later.

The 6th, 7th and 8th grades in the grammar school are departmentalized and have the following teachers:

C. L. VanWormer, principal of the grammar schools and instructor in civics and grammar.

Mrs. Wilma Evans, history.

Miss Grace Wilson, arithmetic.

Miss Myrtle Balsdon, history and grammar.

Miss Jessie Streeter, geography and physiology.

Miss Irene Hodgins, geography and arithmetic.

Mrs. Eula Lewis, reading.

The other grades are handled as units with the following instructors in charge:

Fifth grade—Mrs. Mary Vandell and one position vacant.

Fourth grade—Miss Velma McConkie and Mrs. Gertrude Butt.

Third grade—Miss Mabel Rush and Mrs. Josephine Bradley.

Second grade—Mrs. Martha Hoyt and Miss Louise Hodgins.

First grade—Mrs. Nell D. Chapin, Miss Leona Jackson and one place left vacant.

The question of salaries is of interest to the taxpayers of the district and while it is impractical to give the salary for the individuals in each case, inasmuch as these are not fully settled, the salaries under the various classifications can be given.

The superintendent of schools receives a salary of \$200 per month. The principal of the high school receives \$165 per month. The high school instructors' salaries range from \$110 to \$145 per month.

The principal of the grammar schools receives \$135 per month and the salaries of the grammar school teachers range from \$95 to \$110 per month.

There is one exception which we would make in enumerating the salaries and that is in the case of O. F. Kilham, instructor in agriculture at the high school. Mr. Kilham receives a salary of \$2200 per year.

However, it should be understood that Mr. Kilham's duties are much broader than simply an instructor at the high school and at the same time it should be remembered that his salary is paid not alone by the local school district but by the state and federal government as well.

Mr. Kilham is a community helper in agriculture and comes under the Smith-Hughes act which provides that his salary shall be borne equally by the federal government, the state and the school district, thus the school district pays only one-third of Mr. Kilham's salary.

Newberg may well be proud of her schools and their management and it is fortunate indeed that so many of her instructors have decided to remain for another year. The schools like any other branch of public life must have the cooperation of the people of the community to be a success and the Newberg schools are a success.

COMMUNITY CONDEMNS COURT

We the People of the West Chehalis church and community unite in condemning the action of the court in imposing such light penalties upon men who willfully rob our young womanhood of its virtue and honor and demand that our home have better protection by the courts.

WANTED

Will be in market for dried black caps and loganberries soon as eastern market opens and possibly may buy green black caps. H. S. Gille Co., Newberg, Ore.

SCHOOL ELECTION PROVES UNEXPECTEDLY INTERESTING

The school election on Monday afternoon developed into more than usual interest at the last moment and, although there was only one candidate on the ticket, the largest vote where no other than election of a director was concerned, in the history of local school elections was the result.

The school meeting was called to order in the grammar school building at 1:30 p. m. and the annual report of the school clerk was read and accepted. This was the only business before the meeting with the exception of the election of a director. The voting on director commenced at about 2 p. m. and lasted until 7 o'clock. The result of this election being Vincent 230 and Hubbard 82.

Mr. Vincent has served as a director for the past term and has made a very capable official. He is conscientious and capable and the large vote given him is a splendid tribute to his former service. Mr. Hubbard, who was his opponent in the election is a resident of the district west of town and is probably not so well known to the voters of the district, which perhaps accounts for his defeat.

SPRINGBROOK CANNERY WILL BE RUN BY LOCAL CORPORATION

Special to the Graphic—Some very important business was transacted last Saturday night at Springbrook, when a large number of farmers met and organized into a corporation, leased the A. Rupert company's cannery plant at that place and elected seven directors who will oversee the operation of the cannery during the coming season. This action was taken in order to save the tons of berries and cherries which otherwise would likely have spoiled.

This new corporation will be known as the Springbrook Packing Co., and has \$7,500 as capital stock which is fully secured. Due to the present low market in all canned goods, it was decided to hold this season's pack until such time as the market warrants at least enough to defray expenses incurred.

This new company is a cooperative enterprise in every sense of the word so no outside capital was solicited and is the result of many days effort on the part of Frank Carlisle and others.

The seven directors who are elected are S. L. Parrott, J. H. Reese, Frank Carlisle, C. E. Newhouse, J. C. Wendell, W. H. Dean and A. R. Mills. C. E. Newhouse was elected manager of the cannery operation and assumed his duties at once. Immediately after receiving the incorporation papers from Salem the directors will meet to elect officers and transact other business.

It is now planned that by Thursday, June 23, the cannery will begin operation. Mr. Newhouse states that it may not be possible to begin on this date as the state boiler inspector will have to inspect the cannery boilers before operation starts. A short delay of a day or so will enable Mr. Newhouse and his crew of men to make further preparations so as to be able to handle a larger quantity of green pack and to operate at full capacity when operations finally begin.

It will be the policy of this new company to pack as much of the local products as possible and will not consider or solicit products from those that are not financially interested in the company.

SPRINGBROOK BERRY MEN SET PRICES FOR PICKING

Special to the Graphic—Two important things were fully decided upon at the meeting of the Springbrook Fruit Growers Union which was held last Friday evening. First it was decided to harvest the forthcoming berry and cherry crop, and to dispose of the same to their local cannery if it was found possible for it to operate, otherwise it was decided to evaporate at least the berries. Second, they also set the prices to be paid for harvesting this crop.

After carefully considering facts as confronted them, the following prices were decided upon: For picking cherries, one cent per pound; for picking loganberries, 3/4 cent per pound; for picking blackcaps, 1 1/4 cents per pound. The last two items mentioned also carry a bonus providing the pickers remain until those respective crops are picked. The bonus, which will include 1/4 cent for the loganberries and 1/2 cent for blackcaps, was felt to be the best that could be offered this year, owing to the present state of affairs.

Delving into the strawberry situation, which is now almost completed it was found that a record number of crates of these berries were shipped out to different market points at a small margin of profit taking the whole crop on an average. The marketing of these berries without a curtailment of a loss can be summed up largely to the efficient manner in which C. E. Newhouse, the sales manager handled this difficult task, being ably assisted by J. L. Haworth, Frank Carlisle and W. H. Dean, members of the sales committee.

Howard Nottage is recovering from a week's serious illness.

CANNERY TO START THE FIRST OF WEEK

LOCAL MANAGEMENT ANNOUNCED

D. I. Robinson Will Be Local Manager and Policies Are Announced—Growers Should Sign Up

The Oregon Canning Co., which is the company that has taken over the five Rupert canneries, namely, Newberg, Lebanon, McMinnville, Roseburg and Springbrook, have their men here getting arrangements made for starting cannery operations the first of next week. Mr. D. J. Matthews, who was general manager for the Rupert people last year will serve as general superintendent for all of the canneries again this year. Mr. Matthews has been getting things lined up for the starting of the local cannery. D. I. Robinson will be the new manager of the local cannery. Mr. Robinson was manager of the Puyallup cannery for the Rupert people last year and comes with a complete knowledge of how to manage a cannery such as this one. P. F. Standish, who has been field manager for the local cannery before, has returned and will fill this position for the Oregon Canning Co. at this place again this year.

The Oregon Canning Co. have taken over the five canneries above named but will run only part of them this season. The Springbrook cannery has been leased to a company of Springbrook people which organized and incorporated for the purpose of running that plant. The Newberg cannery and the Lebanon cannery will also be run and possibly one or both of the others, but at present nothing is certain regarding them. The cannery people have given out the following statement regarding the running of the local cannery this season:

"The Oregon Canning Company is arranging to start the Newberg cannery the first of next week packing some cherries and berries. They will also probably start the Lebanon cannery at the same time. "Owing to market conditions for canned goods this season, the probable pack is uncertain. The amount of fruit to be handled will be governed by the amount of futures sold. The outlook at the present is not as encouraging as we would all like to see it. This being an uncertain season it is possible that some of the goods will have to be carried at the cannery for some length of time. Therefore, it will be necessary for the growers and business men to arrange for carrying the value of the fruit for a time. "Arrangements are being made whereby the business will be on an absolutely safe basis and the cannery will be operated to the fullest extent possible under existing conditions."

The Oregon Canning company realizes the importance of being able to pay the growers enough for their fruit to enable them to make a good living out of their business and is working with that object in view. Unfortunately future canned goods are being offered at prices which will make the price of fresh fruit much lower than the cannery company like to see. By operating on a moderate scale this season and in this way taking care of as much of the fresh fruit as possible, it is hoped that business conditions will be near normal another season so that all of the canneries can be operated up to their capacity.

The best way to drown is to throw up both hands and holler, "help."—First National Life Bulletin.

ABRAM COOK'S CONDITION IS STEADILY IMPROVING

Mrs. A. J. Barrell, daughter of Abram Cook, was in town Tuesday and informs the Graphic that its account of the accident which resulted in the death of Mrs. Cook and the serious injury of Mr. Cook was incorrectly given in our last issue. The Graphic wishes to state that it received its information from what it supposed to be a thoroughly authentic source, but finds that the details were wrong.

In the first place Mrs. Barrell states that the accident occurred just after the Cooks had started up after leaving Hebo and that the car was not going more than about six miles an hour. Mr. Cook did not look back as stated in our last issue but his wrists having apparently lost their control the car got away from him. However, it did not go over a 100 foot bank but over a 2 1/2 foot bank. The results were as given however and Mrs. Cook passed away at Hebo.

Mr. Cook is improving at present and states that he will drive his car out. The Cooks were accompanied by their grandson, Harry Barrell, on this trip and he too sustained some minor injuries. The exact nature of the accident is not known, but the car tipped up on its side and two wheels were broken off and all of the occupants were thrown out of the car.

The whale only gets into trouble when he starts to blow.

OUTLINE PLANS FOR THE BERRY FESTIVAL

WILL HAVE PARADE IN MORNING

Free Berries and Cream, Berry Sales, Exhibits, Sports, Crowning of Queen and an Airplane

The council of the Berrians met on Wednesday evening and appointed the various committees to have charge of the berry festival to be held here on July 9. Among other things accomplished at this meeting was the decision to have a parade during the festival. At previous meetings the parade was discouraged and it was thought it was impossible to have one, but the council finally came to the conclusion that the festival would be incomplete without the parade.

Free berries and cream will be served to the city's guests on the festival day and this feature alone should add much to help advertise the berry industry of our community. Among the city's distinguished guests on this occasion will probably be Governor Olcott, Julius Meier of Portland, and others. The Rosarians, Cherrians and Prunarians will also be the invited guests of the city and they will participate in various ways in the day's program.

The coronation of Queen Aubrey will be one of the features of the day's events and will be accompanied by a ceremony befitting the occasion. An outside speaker will be requisitioned for the address of the day and the program will probably be held at the city park.

The main object in holding the berry festival is to bring the producer and the consumer together and with this in view, it is planned to have sales booths on the street where persons may purchase berries or leave orders for them with the growers. This is also in the hands of a competent committee who will arrange with the farmers for securing the berries and see that suitable places are provided for their display and sale. This feature will be well advertised in Portland, it being planned to have boys carry signs on the streets there and also advertise through the Portland papers to some extent.

The sports end of the festival will also be well taken care of, and plans are under foot to provide all kinds of entertainment for any who attend the festivities. Base ball, tug of war, water fight, races, etc. will make up this part of the day's events. L. C. Smith of the Tillamook Aircraft Co. which operates planes between Portland and Tillamook will be here on that day with a Standard J 1 airplane and will make flights, carrying passengers. Mr. Smith has entered into arrangements with the Berrians whereby he will be given exclusive flying rights for that day and he agrees to carry passengers at the regular established price.

Another attraction which is coming to Newberg and will be here on the festival day is the Baker Stock Co. of Portland, who have engaged the Star theatre for three nights, July 7, 8 and 9. The Baker Stock Co. are well known and the Newberg theatre goers are thus assured some high class theatrical attractions. A committee has been appointed to see the various merchants of the city and get them to decorate their stores for the occasion and to see about getting the city into holiday appearance in any way possible. In fact nothing will be left undone to make this the biggest affair ever held in Newberg. It will be Newberg's one big day of the year and it is expected that thousands of people will be here on that day from various places over the state.

WARNING ISSUED TO BUYERS OF WALNUTS BY AN AUTHORITY

Walnut growers in Yamhill county are looking forward to the largest crop in the walnut history of the state according to Earl Peary, president of the Oregon State Horticultural Society and active member of the Oregon Growers Cooperative Association.

This condition he says, is due to the ideal weather, for walnuts and to the fact that many groves are just coming into bearing this year.

The only thing that threatens the walnut industry is the low grade Manchurian walnuts which are being shipped to this country by Japan. While they have the same appearance in general as the fine Oregon Franquette, the Manchurians are tasteless, often wormy, and have a thick shell. Mr. Peary feels that if buyers will take the trouble to taste a few walnuts in buying, they will soon find that the cheap Manchurians aren't worth buying. The meat is often discolored and cannot compare with the finely flavored Franquettes, he says.

Along the foothills west of the Willamette river may be found the finest walnut soil in the whole country. This walnut district extends from Washington county south through Yamhill, Polk and Linn counties, with favorable conditions in all the foot hills along the Willamette.

If you don't see it in the Graphic it didn't happen.

THE FOURTH OF JULY COUNTRY PICNIC WAS ABANDONED

The Fourth of July picnic which was announced in last week's issue to be held somewhere in the country about Newberg under the joint auspices of the Berrians and the Newberg Farmers Club has been called off owing to the fact that many farmers have expressed a wish for such action. The facts are that the 4th of July comes on Monday this year and as the cannery does not accept fruit on Saturday afternoons picking has to be abandoned on that day.

In view of this the farmers are loath to give Monday's picking in addition. Some farmers stated that they would not allow their pickers to lay off on the fourth and others said that they hoped the picnic plan could be abandoned. The Berrians are anxious to cooperate with the farmers in any way possible and consequently they have decided to abandon the fourth of July picnic in keeping with the wishes of the farmers. This will leave the Fourth open so far as Newberg is concerned and doubtless many of the town people will go to other places to celebrate. Many will go to the coast or mountains, while others will attend celebrations in adjacent towns.

BERRIAN DRILL TEAM NOW FULLY ORGANIZED FOR WORK

The Berrians drill team has been getting organized for work this week. A meeting was held on Wednesday evening following the band concert at which time the question of uniforms both for the band and the drill team was taken up. A committee from the Berrians made a personal canvass of the available material for the drill team the latter part of last week and secured the signatures of twenty-eight men for the team.

These are Chas. K. Hubbard, R. W. VanValin, Bert Miller, Jack Curry, R. A. Butt, G. W. Wells, George Larkin, B. J. Groth, Dwight Coulson, Wm. V. Dolph, Wm. Sullivan, Mr. Hays, W. H. Vernon, I. W. Hill, C. A. Morris, Floyd Parker, H. G. See, E. C. Baird, P. E. Overend, N. T. McCoy, Chester Zumwalt, W. D. Bowman, C. A. Houser, Dave Smith, Howard Sherlock, Enis Frink, Lynn Ferguson, H. Clifford, Spaulding. Other names will probably be added to these and it is hoped to bring this number up to thirty-two, making four full squads.

The Berrians drill team held a meeting on Wednesday evening and together with the band boys voted to have cream colored suits for both the band and the drill team. These uniforms will be ordered very soon. A committee of three members from each organization was appointed to arrange regarding trimming for the suits.

P. E. Overend, who was elected as drill master resigned on account of other duties which demanded his attention and B. J. Groth was elected to this position. Mr. Groth has had the experience in drill work which is essential for a drill master and this assures the team of a capable drilling.

NOTICE TO CUT GRASS AND WEEDS

This is to notify all property owners or residents to cut all grass and weeds on parkings, along sidewalks and on vacant lots or elsewhere. Grass will cut easier than when dry. It will improve the looks of the city and decrease the fire hazard. Get busy. By order of the Mayor. 2811.

FIREMEN WOULD PURCHASE A LUNG MOTOR FOR USE HERE

There is on exhibition at the Miller Merchandise Co. store a lungmotor which should greatly interest the people of this community. This instrument was on exhibition at the annual state Fire Chiefs meeting at Corvallis recently and was brought here by the local fire boys in the endeavor to get Newberg to purchase one of these instruments so that in case of accident some means of resuscitation would be at hand. At the present time in case of drowning or asphyxiation it is necessary to send to Dundee for the pulmotor and then when it is secured, it is stated that there are only a very few persons who can operate it. The argument in favor of the lungmotor is that it is a very simple instrument and if purchased here will be kept at the fire hall and every fireman will be instructed in its use.

It is stated that there are over 5,000 of these instruments now in use and that one of them saved the lives of 23 persons at Great Falls, Montana. We are not personally familiar with the instrument, but if these claims are correct, and we have no reason to doubt them, Newberg should certainly secure one of them.

The firemen expect to raise the necessary funds for the purchase of this instrument by popular subscription. The lungmotor costs \$150 and everyone is urged to contribute something to this fund. Subscriptions may be made at the Graphic office, the Miller Merchandise Co., or the Larkin-Prine Co., and the names of persons donating with the total amount pledged will be published in this paper from time to time.

We need not point out the danger.

EIGHTY NEWSPAPERS ENTERED IN CONTEST

GRAPHIC ONE OF SEVEN WINNERS

Hood River Papers Get First and Second, an Eastern Oregon Paper Third—Graphic Gets Fourth

The following article sent out from the Oregon Agricultural College gives the particulars regarding a recent competition entered into by eighty country weekly papers of the state for prizes for the best rural news service. The Graphic publishes the article verbatim.

Oregon Agricultural College, Corvallis, June 20.—The Hood River Glacier with 51 stories on rural service took first prize in the Oregon weekly newspaper rural service contest Farmers' week. The number of inches—news, features, and editorials—was 241 inches. The total amount of reading matter, exclusive of paid advertising, was 441 inches. This gives a ratio of 54 per cent rural service. Quality and appearance as well as amount and number of rural community stories were taken into consideration by the judges.

Another Hood River paper, the News, was awarded second place in the contest, taking the \$10 cash prize. The number of rural service stories in the News was 37, total inches rural service 178, total inches reading matter 359. The ratio of rural service in the News was 51 per cent.

The Record Chieftain of Enterprise easily took third—the \$5 cash prize—with 35 stories, 291 inches rural service, 445 inches of reading matter exclusive of paid advertising. The ratio of rural service to total service is 40 per cent.

Only the home print was counted in this contest.

The top four places were taken by the Polk County Observer, Dallas; Ontario Argus, Ontario; Washington County News-Times, Forest Grove; Newberg Graphic, Newberg; and the News Reporter, McMinnville.

Each of these papers won a \$4.50 fountain pen. The Glacier's prize is an engraved loving cup.

The committee judging the contest was C. E. Ingalls, editor of the Corvallis Gazette-Times and president of the State Editorial association, E. E. Fiville, editor of the Western Farmer and chairman of the agricultural committee of the Portland chamber of commerce, and W. F. Kennedy, advertising specialist for J. M. Nolan & Sons, Corvallis. The committee made the following recommendation to C. J. McIntosh, supervisor of the contest for the department of industrial journalism:

"The committee hesitated a long time in making first choice between the two Hood River papers. The Glacier had a bad makeup on its first page on account of its advertisements but on the inside the makeup was better than that of the News which had a good looking front page. The decision was finally given to the Glacier because it had more articles in the issue on display of a farm news nature than did the News. "The third choice was not so difficult, the committee being unanimous in handing it to the Record-Chieftain which carried a large number of mighty good rural interest stories."

Your committee was glad it was permitted to name five papers for fourth place but wished it had been seven. There was no hesitancy about including the Dallas Observer, the Newberg Graphic, the Ontario Argus, the Washington County News Times, and the McMinnville News Reporter, but there was some hesitancy about crowding out three or four others."

The committee suggested that the contest be made an annual affair and that some division into classes be arranged. Another comment was that the committee was greatly impressed with the large amount of rural news carried by the Oregon press. Most of the papers carry a large proportion of good editorials, and the advertising member of the committee said merchants prefer to use a paper that has a good editorial page.

Emerson said, "No one can cheat you out of ultimate success, but yourself."

of persons being drowned in the river nor the ever present danger from asphyxiation either from gas fumes or smoke. No one knows whom it may be or when and if yourself or some dear friends you would want the means at hand for their resuscitation immediately. Then give something to the fund for the purchase of this lungmotor and help provide this means.

The list of subscribers to the Lungmotor Fund for the Fire Department to date is as follows:

- W. H. Vernon.....\$1.00
- Employees, Miller Merc. Co..... 9.00
- Fred G. Hutchens..... 1.00
