

Ship and sail under the Stars and Stripes to all parts of the world

THERE was a long period when it was not true, but today it is proudly true once more—trade and passenger routes are so established that you can ship your goods, or you can sail, to any part of the world under the Stars and Stripes.

The program of routes is being carried out with an eye to the future as well as present needs of American exporters and importers and all American prosperity. See that the ships you use are owned and operated by American citizens or by the U.S. Shipping Board.

Operators of Passenger Services
 Admiral Line, 17 State Street, New York, N. Y.
 Matson Navigation Company, 26 So. Gay Street, Baltimore, Md.
 Munson Steam Ship Line, 62 Beaver Street, New York, N. Y.
 New York and Porto Rico S. S. Co., 11 Broadway, New York, N. Y.
 Pacific Mail S. S. Co., 45 Broadway, New York, N. Y.
 U. S. Mail S. S. Co., 45 Broadway, New York, N. Y.
 Ward Line, New York and Cuba Mail S. S. Co., 100 Wall Street, New York, N. Y.

Free use of Shipping Board films
 Use of Shipping Board motion picture films, four reels, free on request of any mayor, pastor, postmaster, or organization. A great educational picture of ships and the sea. Write for information to H. Leue, Director Information Bureau, Room 911, 1319 F Street, N. W., Washington, D. C.

SHIPS FOR SALE
 (To American citizens only)
 Steel steamers, both oil and coal burners. Also wood steamers, wood hulls and ocean-going tugs. Further information obtained by request.

For sailings of passenger and freight ships to all parts of the world and all other information, write any of the above lines or

SHORT APPLE CROP

Apple orchards in the northwest bear heavier than those in any apple district in the United States, according to information received by the Oregon Growers Cooperative Association.

Two years ago according to the government report, Oregon, Washington and California grew one quarter of the apple crop of the United States while the three states had only one ninth of the acreage of the country.

And with statistics to show that the apple bearing acreage of the east has been reduced materially the past ten years, indications are that the Pacific coast states will grow possibly half the apple crop this year of the entire country.

Freezing weather last April seriously injured the apple crop east of the Rockies while the Pacific coast, especially Oregon and Washington, have prospects of a bumper crop.

Production of apples in the United States has fallen off heavily during the past ten years. In 1909 it was 145,000,000 bushels while ten years later it had fallen to 136,000,000 bushels. During the same period the number of apple trees in the country had fallen from 65,000,000 to 36,000,000. These are the government's figures. There has also been a heavy decrease in planting of apples the past ten years.

However, on the Pacific coast since 1910, there has been an increase in the number of bearing trees but some decline in the average number of non-bearing, showing that the planting of apple trees has been slightly curtailed.

Pacific states production in bushels of apples for 1909 and 1919 were as follows:

	1909	1919
Idaho	650,000	3,842,000
California	4,930,000	6,921,000
Oregon	1,930,000	6,921,000
Washington	2,672,000	21,588,000

In the number of bearing trees in the northwest the official figure comparing 1910 and 1920 are as follows:

	1910	1920
Idaho	1,605,000	2,380,000
California	2,482,000	3,128,000
Oregon	2,029,000	3,215,000
Washington	3,009,000	7,969,000

It will be noted that Oregon is becoming a heavier apple producing state than California while Washington is the greatest apple state in the country.

With the radical decrease of apple acreage in the United States between 1909 and 1919 the average pounds for each person is growing less and less. Last year the average was 120 pounds for each person while the estimates for this year are 53 pounds.

That is, there will be hardly half the apples in the U. S. this year than there was last year. The U. S. crop estimate is for 42 per cent of a crop. On June 10 of last year there was in sight a total U. S. crop of 240,442,000 bushels. This year it is 107,698,000 bushels.

As for peaches, last year there was 22 pounds for each person while now prospects are for only 16 pounds for each.

There is also a shortage of pears with an estimate of 43 per cent of a crop. Last year there was 8 1/2 pounds of pears for every one person, this year prospects are for only four and a half pounds.

TRIP OVER NEWBERG ROAD

The Yamhill-Newberg road is now in good condition though a little rough on the Newberg end as was learned last Sunday when Mr. and Mrs. C. R. Tyler drove over the road with the editor, his wife and son as passengers and sightseers. The grade on the western part of the road is much better than it is on the eastern end, the hills being cut to a better grade. No rock to amount to anything has been placed on the road, but a rock crusher has been placed at the roadside about half way and looked as though it were ready to operate.—Yamhill Record.

YAMHILL COUNTY PICNIC AT LAFAYETTE LOCKS

The Yamhill county picnic will be held at the Lafayette Locks July 3 under the auspices of the McMinnville L. O. O. M. The picnic grounds at the locks are unsurpassable and make an excellent place for any celebration. From all the present plans which are being made this will be a grand and glorious day and one of the biggest celebrations held this year.

There will be all kinds of athletic contests, races, diving, tug-of-war, jumping and a baseball game. Also there will be a splendid program with Walter Toole, Jr., of McMinnville as the principle speaker. This is an old fashioned county meeting and one you can't afford to miss. Everything will be free so be sure and plan to be at the Lafayette Locks July 3.—Telephone-Register.

DAYTON LANE MAY NOT BE COMPLETED

At the present time the work on the paving of Dayton Lane has progressed nicely and the pavement is complete for nearly two miles out of McMinnville. Rumor has it that the work has stopped, but this is not so for the pavement will be constructed as far as the money in the road fund will permit. It is thought that when all the money is allowed that there will remain about three quarters of a mile yet to pave. This money is not available from any other source as far as is known at the present time.

Time tested in service

Millions of miles of highways and city streets have proved Zerolene to be a lubricant of highest quality. This uniform quality is the result of an efficiency in the manufacture of fine lubricants created by the combined resources, experience, knowledge and equipment of the Standard Oil Company.

You gain an advantage in the use of this time-tested lubricant by following the recommendations of our Board of Lubrication Engineers embodied in the Zerolene Correct Lubrication Chart.
