Probate Matters

Petitions have been filed for admission to probate of the estates of Lee Rowell and T. C. Thompson in probate court.

The estate of John Gray, deceased, who died on September 13, has been appraised at about \$21,500.

The estate of Sarah E. Williams, who died at Dayton, is estimated at more than \$10,000 according to the report filed.—News-Reporter.

FARM POINTERS THAT POINT

Grain seeded late will not germinate so well nor stool so freely as that seeded early. From 10 to 25 per cent more seed, therefore, should be used in late seeding.—O. A. C. Experiment station.

Apple growers who have not yet sprayed for anthracnose or canker protection should do so at once, using Bordeaux 4-4-50. All bark surface from tipmost twig to the base of the trunk must be thoroughly covered. The spray protects the remaining fruit against the rot due to the same disease. Instructions for the preparation of Bordeaux mixture may be secured from the Oregon Experiment station at Corvallis free on request.—Department of botany and plant pathology.

Now is the time to hill select potatoes for seed. Choose only healthy, vigorous plants that are not next to a diseased hill. Vines meeting these requirements may be staked, when not frozen down already. Only high yielding hills should be retained at digging time.—O. A. C. Experiment station.

Alfalfa and clover if pastured back or clipped late in the fall will suffer less loss from clover stem rot, according to observations made by the O. A. C. Experiment station specialist in forage crops.

Many tender vegetables such as tomatoes, egg-plant, peppers, corn, beans, cucumbers, and melons were injured by the early frost of September 12. There are still many opportunities to select for seed if one has the right type already in the field. Seed saving is undesirable unless one has knowledge of the proper types to select and a good strain to start with.—Department of vegetable gardening, O. A. C. Experiment station.
