Service

Good service, a service you can depend on, is one of the chief assets of a growing town. The steady operation of industries, backed by a reliable power service, is an attraction to new locators who purpose to start a new factory, or an industry that means growth and development for the community.

Poor service, unreliability of service, independent service "shoos" away the live business man who spells progress in capitals. With a power service unexcelled, we can ask new industries to come to us with perfect candor.
