A GOOD SUGGESTION

The name of S. L. Parrett of this place has been frequently mentioned of late in local political circles as more than a mere possibility for state senator from Yamhill county. The present period of affairs demands the services of a keen and able business man to assist in governmental affairs and many people seem to be of the opinion that in Mr. Parrett we have such a man. Mr. Parrett has been a resident of this county all of his life, his birth occurring at the family homestead east of Newberg.

Mr. Parrett is a man who is held in very high esteem by practically every local person. He is a heavy taxpayer and as such would be inclined to look well into any proposition which might tend to dissipate the public resources or increase the heavy burdens of taxation. At the same time he is not a reactionary and would favor those movements which looked toward the development of the state along proper lines and which would be for the best of the commonwealth. His business experience as president of the United States National bank of this city would certainly qualify him for filling so important a position as state senator, while his knowledge of conditions and affairs gained through his official connection with this large banking institution would be of great service in ascertaining what is best in these trying times when it comes to voting on measures in the senate. Common sense and business acumen are the two great requisites of a statesman in these times, and we believe as do many others, that perhaps no other man who might be mentioned for this office would better combine these qualifications than does Mr. Parrett. It is not the desire of this paper to take any prominent part in the political fights which may be waged this year, but the hearty approval which has

seemed to greet the suggestion of Mr. Parrett's candidacy from both republican and democratic sources leads us to believe that it is our duty to the public to give this suggestion publicity.

Mr. Parrett has not been interviewed by the Graphic on this subject and it may be that he will feel unable to accept this responsibility, but the Graphic feels that a citizen with such ability ought to consider it as a duty to come forward in this trying time and help the people solve the problems of reducing taxes and bringing about a more businesslike administration of our state affairs. We believe that Mr. Parrett could be brought to this view by his friends and hope that he will give this matter favorable consideration and decide to allow his name to be placed upon the ballot as a candidate for state senator. We hope that others who feel with us on this matter will both speak personally with Mr. Parrett and make public their views on the subject.

BEEES ARE HUMMING

The political aspirants are hearing the humming of the "bees," and gossip and dame rumor will no doubt play a prominent part in newspaper and political circles from this time on. The office of governor seems to be drawing out many "hats" and the ring will be full 'ere long if the candidates continue throwing them in.

It is "rumored" (do you get it) that Governor Olcott will be a candidate again although so far the governor has not cast his headgear into the circular arena. Several prominent republicans including Speaker Bean of Eugene and Charles Hall of Coos county have already asserted their intention of trying to pluck the plum. In fact Hall has the backing of the federated patriotic societies. Mr. Bean is considered a strong competitor for the honors, as he is thoroughly familiar with the political game. It is stated that Judge S. A. Lowell of Pendleton would not refuse to accept the office and J. D. Lee has already done some campaigning for the state's highest office.

In China talkative women are divorced. And still we send missionaries to China.—Reno (Nev.) Gazette.

Aged 100

Probably the oldest woman druggist in the world is Mrs. Mary Klump of Allentown, Pennsylvania, who recently passed her 100th birthday.

FARM POINTERS

The kind of chicks hatched this spring will depend partly on the kind of eggs set. Granting the proper parentage, a two ounce egg of normal shape and color for the breed should produce the desired kind of chicks.

Hubam clover is a very much over advertised sort. Reports from other states confirm what has been found out at this station, that is, that both the white and yellow bennial sweet clover appear to have many advantages over the Hubam aside from the more reasonably priced seed.

Cover crops Need Nitrates

If nitrate of soda or sulfate of ammonia were applied to the orchard cover crop at the rate of 100 pounds to the acre within the next 10 days it will probably more than pay for itself in increased growth of the crop. The nitrogen applied in February will bring heavy succulent growth which decays rapidly and gives large quantities of humus. That humus will be an important factor in retaining moisture in the growing season. The cover crop must be plowed under before it saps the moisture and before the plants become woody.

Seed Tests Popular

More and more farmers are coming to learn the value of planting seed tested for purity. As a result government analysts are needed and there is a demand for commercial testers. The largest seed testing class in the history of Oregon Agricultural college is now studying the subject. Any seed sent to the station will be tested promptly.—O. A. C. Experiment station.

CANBY GROWERS MEET

Fifty members of the Oregon Growers' cooperative association, residing in the Canby section, met February 11, in the city hall in Canby, to elect a local advisory committee of three members and to nominate a candidate for director for the Clackamas district. The total membership of the Canby sub-district is 58.

O. F. Frenness, J. F. Pottratz, and John Davis were elected to serve on the advisory committee and E. C. Brown was nominated for director for the Clackamas county district. After a meeting is held at Estacada to nominate a candidate an election will be held by mail sometime before April 3. The meeting was in charge of M. O. Evans, field manager.

CARD OF THANKS

We desire to thank our friends and acquaintances for their many acts of kindness and words of sympathy during the sickness and at the time of the death of our beloved wife, sister and mother; and for the floral offerings.

Mrs. Pearl C. Lacey,
Hazel B. Knight.

FORD RETAIL SALES GO OVER A MILLION

Retail sales of Ford cars, trucks and Fordson tractors have again exceeded the million mark for the year 1921, according to a statement given out by the Ford Motor company.

The Ford factory and assembly plant production figures reached a total of 1,050,740 cars, trucks and tractors for the year, with retail sales by dealers approximating 1,093,000, which in the United States alone surpassed the 1920 retail sales record by 104,213 Ford cars and trucks.

The Ford company says the outlook for 1922 is decidedly optimistic. In fact, concrete evidences already exist in that car and truck retail sales for December, 1921, exceeded December 1922 sales by almost 25 per cent, and Fordson tractor retail sales for the same periods show an increase of over 100 per cent for December 1921, as well as an increase over the total tractor sales for the month of November.

These facts seem to indicate that not only are the farmers buying more freely, but that the general public is becoming more responsive and receptive.

Another point brought out by a comparison of production figures for the past two years shows that Ford enclosed cars are gaining in popularity, as 23 per cent of the 1921 productions were Sedans and Coupes as against a total of 18 per cent for the year previous.

Ford is giving employment at present to approximately 40,000 men in his main plant at Detroit, the importance of which is emphasized when consideration is given to the fact that nearly 20 per cent of the city's population is directly dependent upon the Ford Motor company.

LOGANBERRY MEN GET MONEY FROM ASSOCIATION

The Oregon Growers report that they are making an advance up to three cents this week to their logan berry grower members. This is the third advance made this year on logans and there is still another advance forthcoming. The loganberry pools have not been closed due to a quantity of canned goods on hand. The association handled over 2,400,000 pounds of logans this year and with the large acreage coming into bearing and the acreage signed up this winter, this tonnage will be greatly increased.

The Invisible Force

"Ever have your hat blown off?" asked the advertising man.
"Yes," said the merchant.
"What blew it off?"
"The wind."
"Did you ever see the wind?"
"No."
"Well, advertising is like the wind an invisible force. You can't see it but you can and will see the result just as you saw your hat go rolling down the street."—Dry Goods Economist.
