Mrs. I. G. McCormick entered a float in the parade at the Hillsboro celebration the Fourth which carried off the second prize, and it well deserved it. Mrs. McCormick and helpers gathered ferns with the roots on to decorate with so that they were not wilted a bit. Foxgloves were also used. The machine was completely covered with these so that even the pretty girls who rode in the float were not visible unless they parted the flowers and peeped out. We hope Mrs. McCormick will enter a float in the Berrian parade.

The Ford car, which contained two men, is said to have had booze in it. The big car was damaged considerable and had to be hauled in. There was no one hurt but the driver of the big car sustained a slight cut on his head. The big car was headed for Rockaway to spend the Fourth. During the busy hours of the day it is hard to get around. The residential districts are beautiful with large houses and lots of shrubbery. They have some of the best parks there he has ever seen. Lots of autos, but mostly European cars. He states they get two pesos and 75 centavos for \$1.00 in American money, but prices as a rule are higher than in the states. They do hardly any manufacturing there at all, and they put a heavy tax on everything that is imported. He expects to go about 1000 miles south to Comodora Rivadaria, Argentine. Niagara's Future City.

An idea which has occurred to many minds since the last "harnessing" of Niagara falls was clearly put by a speaker before the Engineers' society of New York. It is that most of the electric power obtained from the falls will be used within a few miles of its place of origin instead of being transmitted to distant cities. In other words, it is believed that at and near the falls will be situated the future industrial center of America. It would be theoretically possible, it is stated, to transmit power from Niagara as far as San Francisco, but the cost would be prohibitive. It is much cheaper to locate factories near the falls.

Dire Threat.

Bartholomew had been very naughty, and at last in despair his mother shut him up in a large cupboard, wherein were stored all sorts of articles. He immediately began to bellow and stamp and make a terrific noise generally. Finally silence ensued, and his mother who was just showing his auntie out remarked as they passed the cupboard "I think Bartie has broken the record this time!"

"Yes" came the unexpected rejoinder from within. "I have, an' if you don't let me out I'll smash the machine as well!"—Detroit Free Press.

The public are urged to be very careful about observing this as otherwise there would be a serious shortage of water during a fire and consequent lack of force.

Impressing the Visitors.

You never can tell what will impress the stranger within the gates. The foreign correspondents "doing" the conference were curious spectators of congressional proceedings when the President delivered his message, but the thing that most attracted their attention was the sight of William Allen White of Kansas sharpening a pencil as he sat in the press gallery and letting the shavings fall on the dignitaries below.—Manchester Union.

Smoking at Washington.

The Japanese were the most incessant smokers of all the visitors to the conference on limitation of armaments, said a newspaper man who attended the meetings. Baron Kato seldom is seen without a cigarette, and quite frequently lights one with another. Prince Tokugawa does likewise, while the diminutive Mr. Dubuchi is never seen without a cigarette. Mr. Hanthara is more temperate in his use of the weed. There was never any prohibition about smoking in the Japanese conference rooms. Mr. Hughes prohibits smoking when the correspondents gather. They park their partly smoked weeds on the outside. The Chinese never offered any objection to the cloud-filled conference rooms. For the French, M. Briand was the principal user of tobacco, and when he was not in a plenary session, where no one is permitted to smoke, he never was seen without his Turkish cigarette.
