Low Cost Battery Service

The very thing that every autoist is interested in. A local battery expert says three things are necessary—start with a standard make of battery, service it properly with frequent and regular testing and filling, guard against overheating due to overcharging.

These admonitions would appear simple enough and easy to follow, but when one considers the fact that there are over two hundred kinds of storage batteries on the market, only eight or ten of which can reasonably be called standard makes, that most people are extremely careless about giving any attention whatever to the battery on their car, and that fewer still know when they are overcharging their batteries, it is no wonder that the manufacturers must maintain service stations all over the country.

The Willard Storage Battery Company of Cleveland, long ago realizing this need for a high grade product and careful attention to that product, established a service station organization whose motto "Through Service We Grow" has made them the largest company of its kind today.

Yours for the best of service

GROTH ELECTRIC CO.

A Message for the Man of the Family

Stay at home some Monday morning and get acquainted with wash-day. Rub and scrub and wring and lift scores of heavy, steaming pieces.

Wrestle with wash boilers filled with boiling water. Stoop and stretch and bend until back and arms are breaking.

Then, perhaps, you'll understand why mother is not looking so well this summer.

We'll wash everything so carefully that even the most critical can't complain, and we'll return your bundle with only a few light pieces left for mother to iron.

Try it this week. She'll feel ever so much better, and you will too. Just phone us.

INSECTS USE RADIO

Wireless Expert Discovers Electric Power in Bugs.

Cockroach Has Wave Length of Between One-Half Inch and One Inch—Send Messages to Each Other—Accidentally Discovered.

Harrisburg, Pa.—The troublesome cockroach is a radio "fan" and communicates by wireless with his brothers and sisters.

Howard Zimmerman of Harrisburg, sergeant major of the Fifty-third infantry brigade headquarters company, Pennsylvania National Guard, believes and seeks to prove it through experiments; the results of which were made public here.

The experiments, Sergeant Zimmerman said, have been under way here for a year as the results of an investigation begun in a bug-infested barracks in Luxemburg, under the direction of Captain Armstrong of the Fifth division signal corps with which Sergeant Zimmerman was serving shortly after the armistice.

"At that time we were having night school and were working on the shortest possible wave length, getting as low as one-fourth of a meter," the sergeant explained. "Radio sets were located three feet apart on a glass-topped table.

"One night everything was working perfectly when suddenly our tubes began to act queerly. By the flickering light of the candle we finally located 'Mr. Cockroach' sitting in the space between the receiving and transmitting apparatus. We removed him and, to our surprise, the apparatus became normal. This led us to believe he was capable of making electric power."

The sergeant declared one insect radio to another, and this belief, he said, is supported by his experiments.

"I have found in my experimental work," he asserted, "that a cockroach has a wave length of between one-half inch and one inch, with a very low frequency."

The tumble bug and moth are also endowed with radio power, he added, while beetles show only slight evidence of possessing wireless habits.

OREGON ASSOCIATION IN LEAD IN COW TESTING

Oregon cow testing associations lead all cow testing associations in the western states for butter fat production during the month of May, it is announced by Professor E. B. Fitts of the college extension service. The 2460 cows tested in this state gave an average yield of 41.6 pounds of butter fat per cow for the month, or 1.34 pounds daily. In the state the Tillamook association led all the others with 2442 cows tested, with an average butter fat yield of 44.42 pounds.

"Pet," a grade Jersey owned by J. L. George of Tillamook, made the highest yield from an individual cow, with 114.62 pounds of butter fat produced. Three Oregon associations—Smith-Umpqua, Columbia and Clatsop, are now in the 100 per cent pure bred bull class, according to the college's records.

RURAL SERVICE CONTEST CREATES MUCH INTEREST

Oregon weekly and semi-weekly newspapers have been fairly pouring into the office of the department of industrial journalism of the college to be listed in the rural news service contest to be a feature of the annual meeting of the state editorial association at Corvallis, July 21 to 23. Elbert Bede, president of the association and editor of the Cottage Grove Sentinel will be chairman of the judging committee.

Indications are that even more interest is being taken in the contest by Oregon editors than was the case last year, when competition was keen.

Classes in the contest are: First, grand champion, free for all except dailies; second, papers published in town of not more than 1500 population; third, paper of fewer than 25 columns, all home print. Suitable prizes will be awarded as announced.

Are Married in Red

The marriage ceremony has many varieties. In no land does the bride look gayer than in China, where bright colors run riot in the dress of the people. Red is the nuptial color of China. At a betrothal the bride

UNIQUE MEMORIAL

In an upper window of one of the well-to-do houses of Cologne, Germany, is an astonishing memorial, a pair of horses' heads, facing the street.

They were carved hundreds of years ago and were placed there to commemorate one of the quaintest events in all history, by an ancient noble of the city.

The story runs that his wife died, and while he was mourning at the deathbed, his stable man ran to him and told him that his wife's horses had disappeared. When he went down to their stalls he saw that they were gone, but when he turned back to the house he saw them emerging from the death chamber and concluded that they were bringing his wife's soul to heaven. The horses were never found again, and this strange memorial was set up here in their honor.

PULLS TOOTH TO TOOT FLUTE

Schoolboy Sacrifices Crooked Incisor to Further Life's Ambition to Become a Musician.

Philadelphia.—A real martyr to music has been brought to light by Miss Winnetta L. Stacks, superintendent of the Methodist Episcopal Deaconess home here. Miss Stacks in describing her efforts to initiate music classes in settlement work, told of one small boy who confided that his life's ambition was to play the flute. The teacher struggled in vain to teach, but his lips would not pucker right.

"Joe, I guess you will never learn to blow a flute because of the way that front tooth has grown. It is in the way," she said finally.

A few days later the lad's mother returned home to find her son's face bloody, but shining with triumph. He had borrowed pliers and had pulled the tooth.

"And at the first recital of the students of the class," Miss Stacks concluded, "he blew notes on the flute."

Studebaker

BIG-SIX SPEEDSTER

THE new Studebaker Four-Passenger Speedster is mounted on the Big-Six chassis with the same dependable 60 horse-power motor that made enthusiasts of thousands of owners during the most critical buying period in history.

Every item of its complete equipment and finished detail suggests ultra style and riding comfort.

The front seat is tilted at the correct angle for comfortable riding. An upholstered arm-rest divides the tonneau into

two individual seats which provide the comfort of an overstuffed armchair.

The touring trunk at the rear, with tray and suitcase compartments, is easy of access, because the two spare disc wheels are mounted on each front fender.

These disc wheels, complete with cord tires and tubes, are furnished without extra cost.

This latest Studebaker creation reflects Studebaker's seventy-year-old reputation for building fine vehicles.

In addition there is a handsome set of nickel-plated bumpers front and rear, a courtesy light on the driver's side, a built-in, thief-proof transmission lock which is operated by the same key that locks the ignition switch and tool compartment in the left front door. Ask for the Studebaker "Yardstick," a measure of the greater value that Studebaker offers
