## BEAUTIFUL TEETH.

Better for a Woman Than Riches, Dress or Intellect.

Did you ever notice that, when anyme describes a pretty girl, he generaly begins by saying she has a beautiful et of white teeth?

Weil, that is natural, because a fine + t of teeth is the most consciences characteristic of the face. A winning smile, adorned by ever, brilliant teeth, arriss a woman farther than riches, Irees or intellect.

And, on the contrary, think a moment of the shock you get when you mes a woman, or a man, with a yellow reolting set on teeth, or great holes in the mouth where good teeth ought to be.

Dr. W. A. Wise, the famous dentist of the Failing building, Portland, Oregon, said to the reporters yesterday that it was beyond his comprehension why any one in the Northwest now should neglect the teeth for a day long-The big cost of dental work in the 112. past has been reduced. The expense now, at such large and modern equipped offices as Wise Brothers', is extremely moderate-no more formidable than getting repairs made to any article of regular wear in the household. And the pain has been banished. There is no pain. For your own comfort, go and have your teeth put in order. For your looks' sake, don't neglect your teeth any longer. If your teeth are worn out, have a new set fitted; or, if a few little while I would be too sick to go to work, for three or four days; I work in a large store, and I suppose stand-ing on my feet all day made me worse. ## EFFECT OF ANÆSTHETICS. Patients in Dentist's Chair Often Act

Queerly Under It. "As I entered the dentist's office." said a woman the other day. "I saw man sitting in a chair rocking vio-

lently and with a wild look of misery written on every feature. Next him sat a demure looking trained surse. After a few minutes, during which we all three sat and pitied each other, the dentist entered, dressed for out doors, and he beckoned the man. The unfortunate wretch responded and then we knew. The doctor never draws teeth himself, but takes such patients as have need of that gentle art to a brother dentist, who in his turn makes a specialty of drawing. always administering gas for it.

"The nurse turned to me with s smile. "I wonder what he will do when he comes out of it?" she said. meaning the anaesthetic. " 'Why, what do you mean?' I asked.

"'Don't you know?' she answered. My patients always say or do something allly either when they take it or when they come out of it."

"I was interested at once and begged her to tell me some instances.

"'Why, let me see,' said she. "To begin with, women always yield to the influence of an anaesthetic more easily than men do, possibly because they are not so strong-willed. Anyway, women make better patients. They are less trouble and so afraid of pain or even of death. "'In almost every case I have had

the women rather welcome chloroform, although almost all of them fight ether, and I don't blame them. After the first whiff a woman will almost invariably make love to the doctor, calling him all the sweet things she ever knew and demanding his affection in return. Then she quiets down and the operation begins. When coming out of it if she is a particularly sweet and refined woman she will use the most villainous language and carry on generally in a manner calculated to shock a new nurse almost out of her senses. " 'Now, on the other hand,' she continued, 'the woman who ordinarily uses Billingsgate (and there are quite a few) will babble of childhood's days,

"The doctor came in, ushered his patient into the operating room, spoke a few words to the nurse and followed his patient.

"I came for something to relieve my patient,' she said to me in explanation. 'She had a violent toothache.'

"The doctor returned with a small package, which he handed to the nurse. He then spoke to me, saying that he would be ready in a few minutes. When I turned I found the nurse had gone
