Spring Medicine

There is no other season when good medicine is so much needed as in the Spring.

The blood is impure, weak and impoverished-a condition indicated by pimples and other eruptions on the face and body, by deficient vitality, loss of appetite, lack of strength, and want of animation.

One of the fantastic tricks which lightning plays upon its unfortunate victims is a kind of flashlight photography. WHEN FORKS WERE NEW.

How Their Use Impressed a Lady the

First Time 8he Saw Them, A lady who saw forks used for the first time at a dinner of Henry III. of France records her "impressions" of the occasion. Henry had in 1547 been tendered a magnificent reception in Venice. At this entertainment forks were used. The royal guest observed them with much interest and immedintely introduced them to the French court.

It seems from the account of the lady, who had never used them be fore, that some others were in the same predicament. She writes:

"They never toucked the meat with their fingers, but with forks, which they carried to their mouths, bending their necks and bodies over their plates.

"There were several salads. These they are with forks, for it is not considered proper to touch the food with the fingers. However difficult it may be to manage it, it is thought better to put the little forked instrument in the mouth than the lingers.

"The artichokes, asparagus, peas and beans were brought. It was a pleasure to watch them try to eat these with their forks, for some, who were less adroit than the others, dropped as many on their plates and on the way to the mouth as they were able to get to their mouths.

"Afterward a great silver basin and pitcher of water were brought, and the guests washed their hands, though it seems as if there would not be much scent of meat and grease on them, for they lind touched their food only with those forked instruments."
