BOUGHT AND SOLD. Special attention to the gathering of bunches of claims for Investors. IF YOU WANT TO SELL.....

SEE ME. RICHARD KING. BEND, OR.

**WHAT KILLS STOCK?**

"Water" "Oregon Water" or "Poison" Hemlock

**CHARACTERISTICS OF EACH**

Correspondent Says Only the Root of the Deschutes Plant is Harmful and That not for Horses.

DESCHUTES, Crook Co., Or. July 28—(To the Editor) In your last issue I see a note to the effect that Dr. Nichol has lost two horses through what he thinks is the water hemlock and thinks that the horses that died on the ditch work were killed by eating the wild hay that grows on the Deschutes river. I do not think his horses died from eating the wild hay or that they got the poison from that source, as the tops of the water hemlock are harmless and only the root will poison cattle and I do not think it will poison horses at all, neither the roots nor the tops. At least I never heard of such a thing as the water hemlock killing horses and it seems to me impossible for the root of the weed to get into the hay. If anyone is interested in finding out if it will horses he can find out by addressing the Agricultural College at Corvallis, Oregon.  
JOHN ATKINSON.

[According to Farmers' Bulletin No. 86, entitled "Thirty Poisonous Plants of the United States," issued by the department of agriculture at Washington, water hemlock or spotted parsley is found rarely on the eastern slope of the Rockies and is not mentioned as appearing at all west of that range. This is not conclusive, however, for discoveries of both plant and animal life are frequently made on the Pacific slope that have distinct relation with forms on the other side. This side is too new for all products to be known to science. The Bulletin says:

This is one of the most poisonous native plants in the United States, being rapidly fatal to both man and animals. The roots are especially dangerous. In marshes cattle are poisoned by drinking water contaminated by the juice of roots that have been crushed by being tramped upon.

Another plant that is described is the Oregon water hemlock, which blooms in July and August, with white clusters on stems three to six feet tall, and has a fleshy, bulbous root, which furnishes the bulk of the poison. A piece of this as big as a walnut is fatal to a cow. Professor Hedrick, of the Oregon Agricultural College, believes that more than 100 cattle are killed by it every year in Oregon. This seems to be the plant referred to by Mr. Atkinson.

Poison hemlock is described as still another of these fatally poisonous plants, also known as spotted parsley. It is a native of Europe and Asia but has become naturalized in the United States and is spread from coast to coast. Its blossoms appear in July and August in showy clusters of white on hollow stalks two to seven feet tall. Any part of the plant is poisonous at all times, but the root is comparatively harmless in the spring months. This is the plant with which Socrates was killed.

The first two of these plants grow in wet, marshy places, the other in any old waste place.]

**Tumalo Items.**

Where is Tumalo? Take a ride out and see.

Yes, Tumalo and Bend stage line will be extended to Sisters.

We have had a pleasant rain which was welcomed by all.

Reports come from the McAllister neighborhood that they had three inches of hail Sunday which did some damage to grain.

Adam J. Wimer and wife, of Corvallis City, Coos county, are visiting with his parents. They seem to like our country very much.

Ed White visited Tumalo one day last week and reports his hay crop quite satisfactory. He has about 80 tons of fine hay.

George W. Wimer and sons expect to thrash about 500 bushels of oats this

year. They have an excellent crop both of grain and hay. They now have about 25 tons of hay put up.

The Hightower-Smith mill is running steady now and putting out a good lot of lumber and shingles. They have several large orders ahead, and many teams are hauling lumber to different points on the desert.

Wimers and Jensen are preparing to build a quarter of a mile flume on their ditch this fall. They have placed an order with Hightower & Smith for 21,000 feet of lumber.

C. W. Thornthwaite has gone to Sherman county to work in the harvest.

J. W. Baker and family have moved to Tumalo where he is employed as logger at the mill.

T. A. Jensen was in Bend last week and purchased a new mower and rake of the B. M. Co. He will have about forty acres of grain to harvest.

Mr. Boone and family visited Sisters Sunday.

**ALL LIKE THIS COUNTRY**

**GOVERNOR HERRICK GREATLY PLEASED**

Tells Portland People About it—Dakota People Come to Bend to See if Crops Really Grow.

Messrs. Turney Johnston and Stanley, of the D. I. & P. Co., and their guests, Governor Herrick and party, had a fine trip across the mountains to Lebanon last week. When they reached Albany the citizens gave them a reception that completely captivated them. At Portland Governor Herrick spoke glowingly of the Deschutes country in a column story in the Journal, saying among other things—

"It seems to me that the irrigation work on the Deschutes is a great project," said Governor Herrick, "a work that will be of great benefit to the state. Water is running through some of the canals that are to reclaim 200,000 acres. The result of irrigation is wonderful. Land which before only knew the sagebrush and jackrabbit suddenly becomes an expanse of fertile fields, growing all cereals and fodders, garden truck and the luxuries as well as the necessities of agriculture. It seemed that almost anything in the line of agriculture common to the country was found there, except corn.

"The experiment station established there, which is under control of the government, is doing good work. A representative has been sent to take charge of the station and is directing the valuable experiment work in progress. This is sure to be of great benefit to the farmers taking the land, as they are taught the exact quantity of water required for best results, and shown what is too little or too much. The most approved methods of preparing the land are taught. In every respect I found the experiment station flourishing.

"The transportation problem is going to be solved without any trouble on the part of the people down there. They are now producing a tonnage that will bring the railways, without bonus or further effort. The settlers coming in, their supplies required and the produce ready for the outside market will quickly solve this problem. The production of the soil will be tremendous in the near future, for the water, all that is required to make it phenomenally fertile, is being delivered.

"That is a good law under which this work is being done. It is beneficial to the people in encouraging development and in limiting the price which may be charged for land."

Frank Glass came in Tuesday with a party of Eastern people who had started for the Deschutes country but met with so many knockers that they were going back without investigating. They were taken out to Powell buttes to see the grain fields and fruits, came to Bend to see the D. I. & P. Co.'s experiment farm and the gardens and went away convinced that what they heard was untrue and that this country would be richly productive. The O'Neil garden—the first year and as fine as anywhere—Tompkins' 6½-foot peas and Batten's garden and field convinced these doubting Thomases completely.

A. B. Estebenet purchased the A. C. Lucas residence property last week, for a consideration of \$1,100, and will move in about the 20th of this month. This excellent property is situated at the corner of Tenth street and Hawthorn avenue, in the eastern part of town and Mr. Estebenet considers himself fortunate to have been able to secure so desirable a location.

W. E. Guerin, jr., having when Governor Herrick was here made arrangements for taking up a lucrative law practice in Cleveland, Ohio, is about to move there. The family will leave Bend tomorrow for a trip over the mountains to the railroad at Lebanon. Mr. Guerin still retains substantial interests here, but since the change was made in the handling of "ditch" lands there has been nothing to employ him professionally here and he returns to Ohio. There is general regret that the family moves away.

**WAGES RAISED AGAIN**

Men on Ditch to be Paid \$2.25 a Day.

**NEW RATE FROM AUGUST 1**

Fifty More Men are Wanted and Steady Employment Promised  
—No More Teams.

The Deschutes Irrigation & Power Company this week advanced wages of men employed on canal construction from \$2 to \$2.25 a day—the rate that was paid before the reduction of last February. This advance dates from August 1. The company would like to get fifty more workmen at once and will give them steady employment at the new figure. Of teams the company has more than enough of its own for all present needs, but it will take new men as fast as they come.

The work on the flume will be completed by the middle of this month, and after that there will be no interruption (except by accident) in the service of water through that channel. Several of the carpenters now employed there are expected to go to Redmond for construction of new quarters of the company there.

A crew of men is employed on the Central Oregon canal extension; a dozen miles or so to the southeast of Bend, but the force has been so reduced by the hegrira to the harvest fields that the progress has not been all that was desired. On account of shortage of men the company this week turned out to pasture 35 horses. The increase of wages is expected to bring the total force up to about 100 men and then the company can work 60 of its teams.

At Redmond the company will erect headquarters buildings similar to those it has at Bend, except the office which will be one-story, and there will be only one grain storehouse.

**Two Accidents.**

Harry Hinton who works for the Bend Livery and Transfer Co., fell from the back of a load of hay today noon and struck across a scantling on the small of his back, suffering quite serious injury, which will lay him up for several weeks.

Tom Parkminton, one of the workmen employed on Central Oregon canal construction, is at the Merrill hospital with a broken leg. He was working at clearing right-of-way Wednesday, and six horses were pulling to uproot a juniper tree, when some part of a harness broke and let a whiffletree back against Parkminton's leg with such force as to fracture the bone just below the knee. It is not thought that the joint will be affected by the injury. Dr. Coe set the member and the man was brought to town yesterday.

Mr. and Mrs. P. L. Tompkins left today noon for a trip across to Lebanon, taking with them the baggage of the Guerins. They will return to Bend in about a week.

Mr. and Mrs. P. Cooper and daughter, of Roseburg, were in Bend this week on their way home from a visit with the Ira E. Weimers, at Post. Mrs. Weimer is a daughter of Mr. and Mrs. Cooper. The Coopers have been on a long camping trip, first down the Willamette valley to Portland, where they took in the fair, then through Eastern Oregon, and now they are on their way home.

**Advertised Letters.**

The following is a list of letters remaining uncalled-for in the Bend postoffice August 2, 1905:

- Ahlstrom, Anthon Mack, J. W.
- Barnes, Mrs. Sarah Miller, Frank
- Barnes, E. L.
- Barnes, S.
- Courtney, W. H.
- Eilifson, Oscar
- Farrar, A. B.
- Flinn, J. L.
- Gatherwood, Robt.
- Geigary, G. W.
- Herrol, Fern
- Ireland, Glen
- Jacobson, Carl
- Johnson, Rudrick Weesner, A. E.
- Johnson, Walter
- Johnson, C. F.
- Long, W. W.
- Patterson, Mrs.
- Price, A. R.
- Reeves, F. A.
- Richardson, David
- Safford, Miss Cora
- Schring, B. O.
- Shipman, Allard
- Smith, Stanley
- Steadman, A. H.
- Taylor, W. R.
- Wilson, H. A.
- Wiseman, Billy

Persons calling for these letters will please say they are advertised.
