CROPS DO GROW HERE

Even the Knockers Can't Sour the Soil.

GARDEN AND FIELD CROPS

First Year Shows Results in all Lines Highly Gratifying in this Section.

"We've had several messes of string beans, summer squashes are ready for picking, onions, radishes, lettuce, turnips, beets, cabbages, potatoes and such stuff are too abundant, we have squashes seven inches in diameter, cucumbers, cantaloupes and water melons are coming on nicely and corn is about ready for roasting—all grown out of doors in regular farming conditions" said Professor Elias Nelson, of the D. I. & P. Co's experiment farm, this week. "Moreover, we have matured wheat, barley, oats and rye, and the grain is first class, thus proving the error of the knockers' notion that crops won't grow here. In a week or two we will have a fine crop of ripe tomatoes.

"From my work this season I can have no doubt that all the common garden and field products will produce reliably and abundantly here. Of course, clover, alfalfa and other forage plants will do well.

"We have learned some valuable lessons in our experiment work this summer, but there is no longer any question about common crops doing well in our climate and soil."

CORN DOES GROW HERE.

"I see Governor Herrick says he saw nearly everything growing but corn" said Millard Triplett. "He might have seen in my garden as fine a lot of corn as he ever saw anywhere if he had come around my way."

Sure enough, Mr. Triplett has a goodly patch of dent corn eight feet tall well studded with roasting ears. And he has much more. All the common vegetables, cucumbers, melons, tomatoes, etc., and last Sunday he gathered from his raspberry bushes enough berries for a good fat pie. All this is the first season's growth.

"They told me I was wasting my time when I was putting in this garden" said Mr. Triplett. "I hadn't seen anybody try those things before and I wanted to know for my self whether things would grow. I'm no scientific gardener but in the face of the results I have got by my own crude methods on a plot not above the average I will say that for agriculture this country is good enough for me."

OATS MORE THAN SIX FEET.

Dr. W. S. Nichol, who is a six-footer, got lost in his 5-acre field of oats. As a measure of safety for himself he cut the crop for hay. But there was a lot of grain well filled and if a threshing machine had been available it would have paid to let it stand 10 days longer and harvest for the grain. A bundle 6 1/2 feet long is on exhibition at The Bulletin office.

Dr. Nichol has alfalfa to suit the most fastidious and his garden is a famous producer of all the common vegetables. He has a lot of fruit vines and trees planted, some of which have borne a little this year, and all are thriving.

MANY SURPRISING RESULTS.

Ovid Riley sent to town the other day a bunch of orchard grass grown on his ranch without irrigation this year, though the soil had been generously moistened last season. This specimen lacks but three inches of being six feet tall. The Batten garden this week yielded a small mess of Cuthbert raspberries, one of which measured 2 1/4 inches in circumference. This morning Mr. Batten brought down town an armful of blood beets and white turnips that measured up to 17 inches in circumference—not coarse cattle food but crisp and tender roots fit for any table.

J. H. Oneill's garden is out-doing itself. The croakers told him when he was preparing it that he would get no results, that nothing would do well in this soil and climate. But Mr. Oneill wanted to see for himself. Now he says his only concern is to keep the garden within the fence. Everything is doing well and with only the most ordinary culture. These are a few of the successes

that have followed attempts to test the agricultural powers of this locality. There has not been a single failure. Frosts have done no harm to speak of, the "barren" soil proves immensely productive, even with scant water. These operations are the forerunners of extensive agriculture in the Deschutes country—which many old timers and knockers condemned without trying.

TO CLEAR 1,000 ACRES.

Big Ranching Enterprise of General Manager Johnston.

This week General Manager Johnston, of the D. I. & P. Co., made an arrangement with Adam Kottman whereby the latter is to clear and plow 1,000 acres of "ditch" land taken by Mr. Johnston and members of his family. This land is situated in a compact body in sections 13, 14, 15, 22, 23 and 24, Tp. 18 S., R. 14 E. The work is to be taken up at once and 300 acres are to be plowed the coming fall.

A commodious dwelling is to be built at the ranch at once, with barn and bunkhouse. Men will go at this work upon being released from the flume construction in a few days. Water will be ready for irrigating the place in a few weeks and extensive farming operations will be conducted there next season.

The Rev. and Mrs. R. F. Rowland and young son, of Eugene, were in Bend yesterday, on their return trip from an extended outing.

The 10-months-old son of Mr. and Mrs. Olaf Hagge died last night after an illness of about two weeks of bowel trouble. The Hagges recently came out from Dakota and live in the Ole Erickson building on Bond street.

The hydrants for the city, nine of them, have arrived and are being installed. A hook and ladder company will be organized, which, with the two hose companies, will complete the fire department, and Bend will then have a fire protection system second to none in Central Oregon.

John C. Perry this week left for Portland and expects soon to locate in Spokane. Since the recent death of his father in Duluth the remainder of the family wishes to get together, and as it would be inconvenient, for the mother and sister to come to Bend the son and his family will establish themselves where the others can reach them easily.

The W. W. Amburns returned last week from Portland and before they could get settled Mr. Amburn received a telegraphic offer of a position with Great Northern engineers in British Columbia, which he concluded to accept. He left for the new work the first of this week. Mrs. Amburn and the family will remain in Bend indefinitely, however.

Mr. and Mrs. J. F. Circle will leave tomorrow for a trip to Klamath Falls. From there Mrs. Circle will go for a visit with her parents at Byron, Cal., returning to Bend in October. Mr. Circle is looking for cattle range in the Klamath country and he will return to Bend in about three weeks and will then probably go into business here on his own hook.

S. C. Caldwell is this week building two tanks for water wagons for the D. I. & P. Co. These tanks are made of galvanized iron and are a little more than three feet in diameter and are 12 feet long and have four division heads so as to prevent long swinging of the waves when the tank is not entirely full. Each tank will hold about 625 gallons. They will be used to haul potable water for the new town of Redmond.

George A. R. Simpson of Powers, Minn., and his son, D. S. Simpson, have been spending a week with J. E. Ryan in the Deschutes timber belt and at the ranch of the company in which he is interested.—The Tullies, the company has 400 head of cattle there. It also has large holdings of timber land. Mr. Simpson thinks so well of this country that he himself took a timber claim on this annual visit. He says that what impressed him most on his trip, however, is the agricultural development of the country. He has no fear that general crops will not be successful in this region.

DATE IS AGAIN SET

Railroad Construction to Start September 1.

OFFICERS MAKE STATEMENT

Columbia Southern to Push Through from Shaniko to Crooked River at Forest.

PORTLAND, Or., Aug. 10.—It is given out from the general office of the Columbia Southern railway that work on the extension of that road south from Shaniko will begin about September 1. It is also said that the construction will be vigorously pushed until the Crooked river is reached at a point near Forest. This statement comes from officers of the company, though it is not made as an official announcement.

At the banquet Tuesday night Mr. Harriman made the following announcement:

"Now extension of the Columbia Southern is about to be begun. Where it will end depends upon you."

MARRIED.

Miss Alice Pike and Mr. Edmund L. Crabtree were married last Sunday evening at the residence of A. B. Estebenet, Justice J. M. Lawrence officiating. Both the young people have made their home in Bend some time. Mr. Crabtree had taken the Lester house and had it fully furnished and ready for immediate occupancy, and the couple repaired there after the ceremony and began housekeeping at once. They were not shy enough to elude a company of vigilant friends, however, who gave them a musical half hour.

Take Notice, Portland.

Oregonian: A company has been incorporated in Seattle with a capital of \$500,000 to develop some valuable mining property in southern Oregon. Within a few miles of Grants Pass alone there are a dozen fine dividend-paying mining properties owned by Seattle, Spokane, Denver and California mining men. Portland capital is a little too busy with 5 and 6 per cent mortgages ever to pay any attention to this great mining industry which is making so many outsiders rich, but it occasionally finds a dumping ground in wild-cat schemes in faraway lands, from which no dividends have yet returned.

Yes. Why does not Portland build a railroad into Central Oregon and get the vast traffic and trade of this section? A railroad from deep water at Portland through Central Oregon would be one of the safest investments that could be made. But it will likely be the old "Parable of the talents" repeated: Seattle and California capitalists are using their talents by making investments in this state which are securing the trade, while Portland capitalists are griping their talent tight, and all the while pleading for some one else to build their railroads for them.—Madras Pioneer.

Railroad to Bend.

On another page is published an article from the Bend Bulletin on the railway situation from that point of view. That is a wonderful country around Bend. The town is situated just on the edge of a great white pine forest and where the trees give way to a vast irrigated plain. The country now under reclamation will easily sustain a population of fifty thousand.

The importance of having railway communication is easily seen. The vast wheat belt of that section must have a rail outlet to tide water. It matters little to the people around Bend whether they go north to Portland or south to San Francisco. But a railroad they must and will have.

The necessities of the rest of the state make Coos Bay's opportunity. All we have to do is to reach out a helping hand and all the commerce of Central and Southern Oregon will come to this port. A railroad from Bend to Coos Bay will far better serve the needs of that section than a line either north or south. The Bend country needs our coal and dairy products. We have use for their wheat and alfalfa. A large traffic would spring up between the two sections.

We should co-operate with the Bend people in their desire to secure a railroad outlet. Our need for a railroad is not so apparent for the reason that we have water communication. But the benefits that would result from a railroad to the interior would be greater to us than to the Bend country.

The Bend people do not even know of the advantages we have to present over a road either north or south. It is a shorter line to Coos Bay and we have even a better market for the products of Central Oregon. The Coos Bay Chamber of Commerce should keep in touch with the people of Bend. Here is an empire in its inception and no opportunity should be neglected to secure a right foundation.

For Sale.

House and lot on Eleventh street and Ironwood avenue. Also sewing machine, large range and other household goods.

Mrs. J. W. BLEDSON

BRICK ORDERS

Should be left with
J. H. OVERTURF
Phone 24

The Lewis Brick Co. now has brick for sale at the Barney Lewis homestead, two miles from Bend on the Sisters road. Deliveries will be made on 24 hours notice.

The Lewis Brick Co.
Bend, Oregon

Because we are selling the same and better quality at a closer margin is a very good reason why you will find our store the best place to buy anything in the line of
Groceries, Drygoods, Furnishings, Shoes, Hardware, Sash and Doors, Paints and Oils
