GUILTY OF ACCEPTING REBATES

An Aggregate Fine of \$25,000 Is Paid by Four Officials of Beef Trust.

Chicago, Sept. 23 .- Four officials of the Schwarzchild & Sulzberger Packing company, of Chicago, were fined an aggregate of \$25,000 by Judge Humphrey in the United States district court here The fines followed a plea of guilty to indictments charging conspiracy to accept railroad rebates. defendants were Samuel Weil, of New York, vice president of the company; B. S. Cusey, traffic manager; Vance D. Skipworth and Chess E. Todd, assistant traffic managers. Weil was fined \$10,-000, the other three \$5,000 each.

With the entering of pleas the de-claration was made that unless at least one of the cases is immediately settled the life of Samuel Weil, vice president of the company and one of the defendants, is in jeopardy. He is said to be a nervous wreck, and fears were entertained for his life if he had been allowed to continue under the stigma of an indictment.

While in Chicago the attorney gene-Vice President Weil.

These four defendants were charged with unlawfully combining and agreeing to solicit rebates for the Schwarzchild & Snisberger company from the Michigan Central Railway company, the Chicago, Rock Island & Pacific, the Grand Trunk Western railway, the Lehigh Valley Railroad company, the Boston & Maine Railroad company and the Mobile & Ohio Railroad company. conspired with each other in presenting supposed claims for damages, which were in reality claims for rebates.

BAD FAITH TO CHINA.

Conger Condemns Failure to Build Railroad as Promised.

Des Moines, Ia., Sept. 23. - In sn address before the Grant club tonight, ex-Minister to China Edwin H. Conger said that by the failure of the Americans to build the Chinese railway, faith America's good standing with the Chin- and street fair. ese seriously impaired.

"We made a very serious mistake sion in China to be relinquished," said to our future efforts to establish advantageous busines relations with that country. It will set us back many

NO DELEGATE FOR ALASKA.

Legislators Who Visited Territory Wi Propose New Scheme.

Washington, Sept. 20 .- Those senators and representatives who visited Vast Fields of Copper Discovered Alaska this summer, including Speaker Cannon, were not favorably impressed with the idea of giving that territory a delegate to congress, but have outlined a substitute plan which they will bring ORE IS VERY EASY TO BE MINED forward next session. They propose treating Alaska as congress treats the District of Columbia, appointing a special committee in the senate and house to consider and handle all legislation

relating to Alaska. This will place Alaska matters in the hands of men directly interested in the territory and, it is believed, will produce better results than could be attained by a delegate. The committee was satisfied that no one delegate could intelligently represent the whole of Alaska, because of its vast extent and the varying needs of different sections, and congress would never consent to more than one delegate under any circumstances. If the plan of these men, which has the indersement of the speaker, shall be carried through, a new committee on Alaska will be created in the next senate and house.

The congressional party which visited Alaska is also convinced that congress should do as much to aid railroad building in Alaska as it has done for railroads in the Philippines, and a a movement will be put on foot to pass a bill next session under which the government will guarantee 3 per cent on bonds issued for the construction of Alaskan railroads. The special pressure at present is for a road from Valdes to

BETTER THAN GOLD

North of Valdez, Alaska.

Ledges On Nabesca, White and Copper Rivers Extend for a Hundred Miles.

Tacoma, Sept. 21. - Henry Brantnober, the noted copper mining expert, who arrived from the North Monday, on the steamer Victoria, and who is now a guest at the Donnelly hotel, brings news that he has discovered at the headwaters of the Nabesca, White and Copper rivers, Alaska, what he believes is the world's greatest copper district. Copper is there so abundant, he says, that it can be mined and transported by rail 230 miles to Valdez, and smelted at a probable cost of 5 or 8 cents a pound, thereby cutting in two the present average cost of copper production.

Mining men, already aware of Mr. rantnober's discovery, declare that it entweighs in importance the discovery of the Klondike and Nome placer districts. So important is it that Mr. Brantnober and his associates will vigorously push development work, and within two years they expect to be producing daily 2,000 to 3,000 tons of copper ore running 10 to 30 per cent in metallic copper. When this is accomplished the industry will be only started. In conection with this development John Rosene and associates will push the building of the Northwestern & Copper River railroad, with the object of building it to the Nabesca copper district within three years. Rosnanza group of copper mines, owned by the Havemeyers, the New York sugar refiners, who are believed to be among the Eastern moneyed men who are backing Rosene in his railroad project.

Brantnober says he found the Tanana river to be a glacial stream with half a dozen channels and everywhere very shallow. In many places on the upper reaches it spreads out four or five Four expert copper miners with 40 tons of provisions were left on Nabesca creek with instructions to explore the region thoroughly for the next two years.

The ore is of the same character as Lake Superior copper ores. Nabesca. copper is found in bands of greenstone in shot like shape, often carrying 10 to 30 per cent of metallic copper. There is also be says much copper on the White river where it is in a slab-like shape, and pieces were found running from two to four feet in width and two inches thick. These slabs lay in seas in the greenstone, making the most wonderful surface showing Mr. Brantnober has ever seen in this or foreign countries.

Eight miles further up White river copper occurs in the same formations, nugget-shape, the nuggets running from a half ounce to two ounces. The formation, Mr. Brantnober says, is about 500feet wide, with vas quantities of cor per lying at the foot of the hills, where the greenstone has become decomposed Tokio, Sept. 20. - Despite the fact and the copper ore has washed down in that the shullition of popular dissatis- ravines below.
