A permanent exhibit of the grains, vegetables, etc. grown in the Bend country is to be established soon. It is therefore important, inasmuch as the harvest is upon us, that the farmers save samples of their crops, with the roots attached, until such time as a room for the exhibit can be procured. It is urged that everyone take an interest in this important matter and save samples.

During the week quite an extensive fire has been burning in the timber on the mountain side west of the river and also about due west of W. P. Vandeventer's and Court Allen's ranches in The Meadows. The fire was started by lightning. Fortunately on this side of the Cascade mountains a forest fire does practically no damage, burn-

ing only the dead needles and down timber.

John Atkinson, the local game and fish warden, destroyed the famous fish trap on the upper Deschutes river west of Rosland last week. Man, assisted by nature, had contrived a trap at the foot of a fall where annually a large number of fish were entrapped in a pool and captured. Mr. Atkinson destroyed the slats at the top of the falls and enlarged it somewhat so that it carries a greater volume of water, which will furnish an easier ascent to the fish.

The dance in the B. M. hall last Saturday evening given in honor of Nick Weider and bride by the Bend Social Club was a very pleasant affair. A large number of people were in attendance and everything was as "merry as wedding bells." During the evening the Modern Woodmen and Royal Neighbors served dainty refreshments to the guests. A reception at which a few intimate friends were present was also given Mr. and Mrs. Weider last week Wednesday evening in the parlors at the Hotel Bend.

A. A. Anthony is doing some very fine cabinet work for Bend people these days. He has just finished an elegant barber's mirror case for the Hotel Bend barber shop which will contain two large French plate mirrors when finished. The base for the mirror case, containing the towel receptacles, is also a fine piece of work. He has also just finished a large refrigerator for the Pilot Butte Inn. Mr. Anthony is a cabinet maker by trade and has worked with Minnesota and Wisconsin lumber and with lumber from all parts of the coast. He says none of it can compare with our native pine in point of finish and polish.

Wednesday morning Deputy Sheriff Brown sold at auction a lumber wagon, a John Deere riding plow and a harrow to satisfy judgment and costs in the case of J. Frank Stroud and Albert Seals vs. S. M. Janney. The wagon was purchased by W. B. Wilson for the Haswell Guerin ranch for \$37.50. J. Frank Stroud got the plow for \$10 and H. C. Ellis the harrow for \$12.50. A three-horse evener went for 75 cents. The bill claimed by Stroud and Seals was for the feed and care of horses owned by plaintiff. Several similar cases have been brought against Janney within the last few months, but he has always redeemed the attached goods at the last moment. This time, however, he allowed the case to go to judgment. He is a very wealthy broker doing business on Wall street, New York, who purchased the Guerin-Redfield ranch, machinery and stock east of Bend about a year ago. Bills for the care of the stock have accumulated, which have been the cause of the cases brought against Janney.

**THE GOVERNMENT TO DECIDE**

**Drake-D. I. & P. Controversy Will Go before Interior Department.**  
At a recent meeting the state land board took under consideration the application of the Deschutes Irrigation & Power Company for a certificate of reclamation of 5,300 acres. A. M. Drake, in behalf of himself and the Pilot Butte Development Company, appeared in opposition and Messrs. Stanley and Stearns of the D. I. & P. Co. in support of the certification. Mr. Drake called attention of the board to the pending litigation and contended that the ditch company had no valid water right for these lands nor the right to maintain the ditch where constructed on his property, and consequently that reclamation as required by the United States, was not accomplished until perpetual right to use the water and maintain the ditch was acquired by the company and perpetual water right became appurtenant to each tract reclaimed. After consideration the board

determined to certify as to construction of ditches sufficient to reclaim 2,400 acres instead of the 53,000 applied for, and to leave to the determination of the government the question as to whether the company had or had not complied with requirements as to right to the water. Further action in the controversy will have to be carried on before the interior department and in the courts.

Additional testimony was recently taken in the trespass case now pending. The arguments will be made before Judge Bradshaw in the near future.
