The contest case of Martha A. Hindman vs. Oliver Thornbjornson is being heard this week before Commissioner Ellis and is proving to be one of the longest ones yet heard. H. C. Ellis has on exhibition at his office a piece of ice about 20 inches long and 18 1/2 inches in circumference that was pulled off from a broken telephone wire on the Rosland line. E. A. Smith, who went out to repair the line, says that last week's storm plastered a coating of ice and snow on the entire length of the wire in the Meadows country that will average close to 22 inches in circumference. In many places the weight of this ice sags the wire nearly to the ground, but strange to say there were only four breaks—two on the trunk line, one near Lava Butte, the other near the Dick Vandeventer ranch—and two on the line running to Frank West's place. Mr. Smith also reports that every standing thing, trees, posts, etc., are covered with a thick coating of ice on the side facing the storm and to one driving through the timber south of Lava Butte, it appears like an enchanted wonderland. The storm of last week was an exceptional one for this country in more ways than one.

ORGANIZATION PERFECTED.

Bend, Madras & Shaniko Stage Company Chooses Officers.

The organization of the new stage company is now completed, with officers chosen as follows: President, F. S. Stanley; vice president, A. M. Drake; secretary and treasurer, F. O. Minor; manager, John H. Wenandy; superintendent, W. J. Buckley.

It was necessary to order some parts for the stages from the East, which has caused a little delay. These have arrived, however, and it is expected that the stages are now at Shaniko.

The company's first stage into Bend reached here about 7:30 Wednesday evening. There were not as many relays in operation as there will be, the roads were poor, and the management is confident that when everything is in proper running order the stage will reach here regularly in time for supper.
