

LIEUTENANT BOWMAN.

IN FORTY-EIGHT HOURS PE-RU-NA CURED HIM.

Cold Affected Head and Throat—Attack Was Severe

Chas. W. Bowman, 1st Lieut. and Adj. 4th M. S. M. Cav. Vols., writes from Latham, Md., as follows:

"Though somewhat averse to patent medicines, and still more averse to becoming a professional affidavit man, it seems only a plain duty in the present instance to add my experience to the columns already written concerning the curative powers of Peruna.

"I have been particularly benefitted by its use for colds in the head and throat. I have been able to fully cure myself of a most severe attack in forty-eight hours by its use according to directions. I use it as a preventive whenever threatened with an attack.

"Members of my family also use it for like ailments. We are recommending it to our friends."

—Chas. W. Bowman.

Ask Your Druggist for Free Peruna Almanac for 1907

Short Kings.

There is hardly a king in Christendom whose wife does not overtop him by a head.

The English king is quite six inches shorter than Queen Alexandra.

The czar, a little man, is overtopped a full head by the zarina.

Kaiser Wilhelm is of the medium height, but the German empress is tall, and that is why the proud kaiser will never consent to be photographed beside his wife unless she sits while he stands.

The king of Italy, short and squat, hardly comes up to the shoulders of the tall, athletic Queen Helena.

The king of Portugal, though fatter, is less tall than his queen.

Even the Prince of Wales is shorter a good four inches than the princess.

And the young king of Spain is several inches shorter than his queen.

A count of the unoccupied houses in London shows 40,000. That is one house in fifteen of the whole city.

CATARRH BLOOD AND SYSTEM DISORDERED

Catarrh is not merely an inflammation of the tissues of the head and throat, as the symptoms of ringing noises in the ears, mucous dropping back into the throat, continual hawking and spitting, etc., would seem to indicate; it is a blood disease in which the entire circulation and the greater part of the system are involved. Catarrh is due to the presence of an excess of uric acid in the blood. The Liver, Kidneys and Bowels frequently become torpid and dull in their action and instead of carrying off the refuse and waste of the body, leave it to sour and form uric acid in the system. This is taken up by the blood and through its circulation distributed to all parts of the system. These impurities in the blood irritate and inflame the different membranes and tissues of the body, and the contracting of a cold will start the secretions and other disgusting and disagreeable symptoms of Catarrh. As the blood goes to all parts of the body the catarrhal poison affects all parts of the system. The head has a tight, full feeling, nose continually stopped up, pains above the eyes, slight fever comes and goes, the stomach is upset and the entire system disordered and affected by this disease. It is a waste of time to try to cure Catarrh with sprays, washes, inhalations, etc. Such treatment does not reach the blood, and can, therefore, do nothing more than temporarily relieve the discomfort of the trouble. To cure Catarrh permanently the blood must be thoroughly purified and the system cleansed of all poisons, and at the same time strengthened and built up. Nothing equals S. S. S. for this purpose. It attacks the disease at its head, goes down to the very bottom of the trouble and makes a complete and lasting cure. S. S. S. removes every particle of the catarrhal poison from the blood, making this vital stream pure, fresh and healthy. Then the inflamed membranes begin to heal, the head is loosened and cleared, the hawking and spitting cease, every symptom disappears, the constitution is built up and vigorous health restored. S. S. S. also tones up the stomach and digestion and acts as a fine tonic to the entire system. If you are suffering with Catarrh begin the use of S. S. S. and write us a statement of your case and our physicians will send you literature about Catarrh, and give you special medical advice without charge. S. S. S. is for sale at all first class drug stores.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

A "CORNER" IN JORDAN WATER.

HUGE SHIPMENT OF JORDAN WATER.

A New York firm has practically formed a "corner" in water from the River Jordan. Large quantities of the water are shipped to America for use at baptisms and revivals, and a Kentucky colonel named Clifford E. Nadand (marked with a cross), has been sent there to superintend the shipment. On his left stands the Governor of Jericho. The project was formed and carried out by Colonel C. E. Nadand of Kentucky, who had a great many obstacles to overcome. He had to convey the water seventy miles to the seacoast across the mountains of Judaea. Casks were not to be had, and had to

VETERAN TICKET PUNCHER.

Conductor Who Believes He Holds the World's Record.

Because he has seen 58 years of continuous service with one railroad company, during 50 of which he has been a passenger conductor, Albert Roath, of Worcester, Mass. believes he holds

a world's record. Though over 78 years old Roath is a marvel of sprightliness and goes about his daily duty with the same enthusiasm as he did when he was first promoted to his present position.

During that time he has traveled over 2,500,000 miles, or upwards of 100 times around the world, measuring at the equator. The number of passengers whom he has piloted over the road must be well over the million mark. The veteran conductor served for eight years as a switchman, brakeman and baggage man, and the remaining half century as a passenger conductor.

COWS WEAR GLASSES.

Remarkable Herd of Myopic Milk-ers Owned in Arkansas.

If one were inclined to make a pun he would say that the cattle owned by George Hepro and kept by him on his farm near here are "spectacles." It would be true of them in one sense of the word, and to a certain extent, in both senses, says a Big Sandy (Ark.) dispatch to the Baltimore Sun.

About twelve years ago Mr. Hepro was the owner of a prize cow named Arrydice, the best milch cow in this part of the country—so excellent an animal that he was offered \$1,100 for her by the state agricultural college. He would not sell her, even at this high price, but not so long after he had refused the offer he was sorry that he had not done so, for the animal became troubled with a bad case of short-sightedness and feeble vision. She could not see things well, even when they were within two inches of her nose, and nearly starved to death in the pasture before it was discovered that she could not see the grass well enough to eat it.

Mr. Hepro's son, Montmorencie, is an oculist in Little Rock, and, happening to be home on a visit at the time the cow's difficulty was realized, he suggested that he could make a pair of spectacles for her that would enable her to see as well as ever. He was given the commission, with a promise of \$100 if they worked, and in a very short time he had fitted the high-priced bossy out with an excellent pair of bifocals that enabled her to graze and eat as well as ever with her head down and to see distant objects as clearly and distinctly as in the palmy days when her head was lifted. She be-

came as valuable as ever, and the college renewed its offer, which was again refused by the farmer. It soon developed, however, that the peculiarity of shortsightedness and feeble vision was hereditary in her descendants to the second and third generations, and inasmuch as her remarkable milking qualities were hereditary also, Mr. Hepro could not think of changing the herd. He held onto it, and, while adding to his bank account by means of the astonishing flow of milk that characterized all of the Arrydice strain, he continued to remedy their inherent visual defects by the use of the same kind of glasses that the noted ancestress of the herd always wore.

These aids to the vision had to be placed on the calves at an early age and changed, both as to size and degree of refractive power, as the animals grew older, which latter change has also to be made occasionally even after the animals have reached maturity.

He now has a herd of 23 of the wonderful myopic milkers, and it is a strange sight to see them roaming over his extensive pastures, all fitted out with large, strong, shining and expensive bifocal glasses—old cows, calves and all—as solemn and serious looking in appearance as an assemblage of Boston schoolmarmes.

Mr. Hepro claims that the wearing of the glasses has a sobering effect on the animals, which is perfectly apparent even in the young ones, and that they never frisk about and play as other calves do. The cattle are very fond of wearing the glasses and are very careful, scarcely ever breaking them.

HINSHAW BACK TO PRISON.

Parole of Indiana's Most Noted Life-Taker is Revoked.

Rev. Wm. E. Hinshaw, most noted "life man" in Indiana, has been returned to the penitentiary in Michigan City to remain there the balance of his life. Governor Hanly revoked his parole because Hinshaw had broken up the home of George Freeman. "Sorry as I feel for you personally," said Governor Hanly to the prisoner, "I am

convinced that prison is the best place for you."

By Hinshaw's conduct on the witness stand, Governor Hanly was more convinced than ever that he murdered his wife and that he had no conception of the wrong he committed against Freeman.

Officials fear that Hinshaw will attempt to take his life. It is claimed he begged poison from other prisoners.

A man never fully realizes how homely he really is until he has his picture taken in a group.

Promises of Improvement.

"Edith," exclaimed her mother, "I'm sorry I brought you to the shore at all. Here five days and you're engaged to two young men. It's disgraceful!"

"Yes," admitted the summer girl, "it's pretty slow work, but give me time, ma, give me time."—Philadelphia Press.

Too Early.

From the rear store window at 3 a. m. Dropped an early Christmas shopper. But he dropped—alas!—right into the hands
