THE BEND BULLETIN taxpayers of Western Crook; rather,

"For every man a square deal, no jess and no more."

CHARLES D. ROWE EDITOR

SUBSCRIPTION RATES:

dix months. Three months. (Invariably in advance.)

FRIDAY, FEBRUARY 8, 1907.

When a public official admits having spent the people's money illegally, should not that discredit all further statements made by him and the clique that he dominates. including his two newspapers?

According to the Prineville papers, stocks of goods in Prineville's stores are so old that it would be and they are rather to be pitied on grade lines so as to conform to manifestly unfair to tax them as heavily as merchandise either at Bend, Laidlaw or Redmond. That's a good thing for the ranchers to keep in mind. Of course, a sensible man does not care to trade where the merchandise is so very. very ancient.

The Rev. Street said that \$17,000 had been spent on roads in Western Crook in 1906. Now comes the Journal with its official(?) figures that show only \$11,559 spent for road purposes in 1906. The reverend gentleman said Western Crook got \$5,000 more than Eastern Crook from this fund. Taking the officiai(?) figures again we find that Eastern Crook received over \$7,000 for road improvements. Western Crook only about \$4,000. And yet the rancher-preacher called The Bulletin a liar.

Two weeks ago The Bulletin announced that Judge Bell admitted the county court had paid money out of the county funds that was not sanctioned by law. The Bulletin called it graft. No reply, whatever, was made by the Prineville papers. Not a word of denialnothing but eternal, profound silence. And yet "the truth is not in The Bulletin," according to the Journal. How much longer do the citizens of Western Crook desire to be connected with a set of officials who are forced to publicly admit having illegally spent the taxpayers money?

In a pityingly weak attempt to answer the arguments advanced for county division-and to explain the criminally low valuations put on Prineville stocks of merchandise for tax purposes-H. M. Street, in the Prineville Review, implies that Prineville merchandise is twenty or more years old and should not be valued as highly as Western Crook merchandise. What a slam on Prineville's merchants! Citizens, take notice! If you want new, fresh, up-to-date merchandise, trade in Western Crook. You can find only old, shelf-worn, shoddy goods in Prineville stores.

Judging from what has been written H. M. Street and the Prinevise papers are losing much sleep for fear a most burdensome tax will be forced upon the taxpavers if the county of Deschutes is created. But why this great concern? The Prineville people will have none of the tax to pay. Ninty-three per cent of the people in the proposed new county favor division and are anxious to run the risk of an unbearable tax. Then why not let them? When the whole matter is stripped of its surplusage of words, is it not evident that Prineville's whole concern is due to the fear that she is to be deprived of a rich section that will for many years donate a constantly increasing amount of taxes to the county funds? With this section cut off Prineville's and Eastern Crook's taxes will, of necessity, be higher. That's the whole thing in a nut shell. Not concern for the poor, overburdened.

however, a fight to keep their own taxes as low as possible.

Rather to Be Pitied, Than Blamed. Madras Pice

The Crook County Journal got out a special edition last week, containing a two-column letter from throughout "Tefferson" than blamed. Their mouthings do the natural surface and render easy no harm, because they are discred- the task of applying water. ited in their origin. In need of a protest, the Journal reached out and took the only thing that offered. Necessity is the mother of Journal's desperation is manifest.

"The Lie Direct."

Rev. Street's protest in the under the heading, "The Lie Diletter. - Madras Pioneer.

A Wise Woman.

trade with him; while the one and the loss of water by evaporacare enough for my trade to ask should be used to regulate the flow, for it. Then, too, I have found and excepting in sandy soil permit that the merchant who advertises only a small stream to flow in the has fresher goods, for the reason, I suppose, that he sells more goods."-Exchange.

Problems That Confront The Irrigator.

Irrigating Fruit Trees.

From "Practical Information for Beginners

According to Director Wickson, of M. Street, is the same reverend 24 feet apart, and citrus trees 20 undoubtedly represents the senti- flowing in furrows will scour the faithfully as he represents the senti-tend diagonally across the slope so ment of the ministry on prohibition as to lessen the grade. On rolling But some men are born perverts, ground the trees should be planted

IRRIGATING.

The common method of irrigating fruit trees in western America Invention but it is also said to be is by furrows from 500 to 600 feet the father of Desperation, and the long. There is, however, a wide difference in practice in the distribution of water from the supply ditch to the head of each furrow. This is done in the mountain states Crook County Journal is published by making openings in the ditch bank with a shovel opposite each rect," and many people in Western furrow. While this is the cheap-Crook will agree with the Journal est method it is not the best, bethat it is a proper caption for the cause one can not divide the head evenly among the furrows, and as a rule the greater number receive far too much water. When 5 or 6 A practical woman remarked the miner's inches are turned into a ther day that the most interesting furrow on a fairly steep slope the hings in a newspaper, to her, are part which is not absorbed soon the advertising columns. "Long flows down to the end where it is ago," she said, "I quit buying of wasted. The passage of this head those who did not advertise. It for a short time saturates only the always seems to me that the mer- top soil, which will afterwards chant who advertises invites me to crust over to the injury of the trees who does not advertise impresses tion. Some device resembling the me with the idea that he doesn't wooden spout previously described bottom of each furrow for a much longer period. In localities where water is valuable the earthen head ditch is seldom used. Water is distributed to the furrows through small openings in wooden flumes or cement flumes. At the present time cement pipes and sewer pipes. as well as metal pipes, are quite extensively used in the citrus orchards of California for this pur-

CULTIVATION AND WATER REQUIRE-MENTS.

Those who intend to plant or-

chards will learn from subsequent experience that the following suggestions are in accord with the best practice at the present: When Rev. Homer M. Street on the pro- the California Experiment Station, the tract is planted with the right posed county division, and this apple trees should be planted on kind of stock the next most importedition was circulated broadcast an average about 28 feet apart; ant thing is frequent and thorough county, cherry, plum, prune, apricot, cultivation. The surface should be The author of the letter, Rev. H. peach, pear, and olive trees about cultivated after each rain and after each irrigation, and occasionally in gentleman who canvassed Rastern feet apart. On ordinary slopes, the intervals. The proper depth to Oregon last spring in opposition to from 10 to 100 feet to the mile, cultivate will depend on a variety prohibition, and who was said to the trees may be planted in rows of conditions, but it is well to bear be in the employ of the state. In down the steepest slope. Where in mind that if anything like comthe matter of county division he the ground is so steep that water plete protection from soil evaporation is desired the cultivator teeth ment in Western Crook just as bottom, the tree rows should ex- should be lowered to 8 inches beneath the surface. If thorough cultivation is practiced frequent irrigations will not be necessary, because the moisture will be retained in the soil beneath the dust mulch. Irrigation at intervals of thirty to forty-five days during the irrigation season will provide ample moisture for ordinary loamy soils The length of the irrigation season varies from one to twelve months. according to the rainfall, temperature, crop, etc. Young trees are watered by a furrow on each side of the row and, as the trees grow older and larger, the number of furrows is increased until all the space between the rows is watered The idea to be kept in mind is to train the roots outward and down-

ward so as to enlarge their zone. The best guide to successful practice is to make frequent excavations to find out not only the location of the roots, but also how far and in which directions the water from the furrows has percolated. The perfect way of watering fruit trees would be to keep the surface dry, not disturb the dust mulch, and apply the water beneath. This is not practicable, but the skillful irrigator can approach this ideal practice by making deep furrows, using a small stream in each, and letting it run for two or three days

Notes on Small Fruits and Vegetables.

The small fruits and vegetables included in a garden should be arranged so that the crops which require similar treatment in the way of spacing, cultivating, and irrigatelse through similar openings in ing are placed in the same row or in bordering rows.

Loganberries and dewberries should be planted 3 to 4 inches deep and 4 feet apart in the row. with a space of 7 feet between the rows. They are irrigated by a small furrow on each side of the row, and the soil is well cultivated

The Bulletin—everyone does.

IF YOU WANT CASH

FOR YOUR REAL ESTATE OR BUSINESS

I CAN GET IT

No Matter What Your Property Is Worth, or in What Town, City, State or Territory It Is Located

If I did not have the ability and facilities to sell your property. I certainly could not afford to pay for this advertisement. This "ad" (like all my other "ads") is practically sure to place on my list a number of new properties, and I am just as sure to sell these properties and make enough money in commissions to pay for the coal of these ads, and make a good profit besides. That is why I have so large a real extate business today.

Why not put your property among the number that will be sold as a result of these ads?

I will not only be able to sell it—some time—but will be able to sell it quickly. I am a specialist in quick sales. I have the most complete and up-to-date equipment. I have branch offices throughout the country and a field force of men to find bayers.

I do not handle all lines usually carried by the ordinary real estate agent. I MUST SELL, real estate—and lots of it—or go out of business. I can assure you I am not going out of business. On the country, I expect to find, at the close of the year, that I have sold twice as many properties as I did the past year, but it will first be nece stary for me to "list" more properties. I want to list YoURs and RELL it. It doesn't matter whether you have a farm, a home without any land, or a business; it doesn't matter what it is worth, or where it is located. If you will fill out the blank letter of inquiry below and mail it to me today, I will tell you I ow and why I can quickly convert the property into cash, and will give you my complete plan

FREE OF CHARGE

and terms for handling it. The information I will give you will be of great value to you, even if you should decide not to sell. You had better write today before you forget it.

If you want to buy any k ind of a Farm, House or Business, in any part of the country, tell me your requirements. I will guarantee to fill them promptly and satisfactorily.
