

THE BEND BULLETIN

"For every man a square deal, no less and no more."

CHARLES D. ROWE, EDITOR

SUBSCRIPTION RATES: One year \$3.00, Six months \$1.75, Three months \$1.00

FRIDAY, MARCH 8, 1907.

While the charges brought by Register Nolan against The Dalles land office were under investigation it was proper to suspend judgment. Now that the case has resulted in the removal of Mr. Nolan for making baseless charges...

INFORMATION GIVEN.

(Continued from page 1.)

mosquitoes. We are apt to have some cold and snow in March, but it hasn't materialized yet. As I stated in my letter to the Ponoka Herald, lack of transportation is our greatest drawback at present.

resses of my Alberta friends to the company as fast as I receive them, they will undoubtedly receive full information, better than I could give, from the Deschutes Irrigation & Power Co., the company which is reclaiming vast tracts in the Deschutes valley.

And now a word as to Bend. It is located on the bank of the roaring Deschutes river at a bend in the stream which gives it its name.

In closing I feel, Mr. Editor, that a vote of thanks is due you from myself and my correspondents for this space in your paper.

One thing I had nearly forgotten and that was the question of citizenship. It is very simple to Canadians as they can if they choose immediately an arrival go before a country clerk and declare their intention of becoming a citizen.

Yours sincerely, W. J. McCallister. Eggs for Hatching. Blue Andalusians, thorough-bred stock. Best winter layers.

Problems That Confront The Irrigator.

POTATO CULTURE.

Veterinarian Bulletin No. 35, issued by the U. S. Department of Agriculture.

A number of investigators have noted that large seed pieces (either large cuttings or entire potatoes) afford an earlier crop than very small cuttings.

In this connection it may be said that the seed-end half gives an earlier crop than the other half. This suggests the expediency of cutting a potato lengthwise when halves or quarters are to be planted.

If it is desired to cut the potato into small pieces the operator should begin at the stem end, and the pieces cut in a compact shape, and of as nearly equal size as is practicable.

No definite rule can be given as to the best size of seed piece, for this depends somewhat on the distance between the hills and on the character of the soil and season.

STOCK OF SEED TUBERS. A study of more than a hundred experiments testing the relative values of large, medium, and small tuber tubers confirms the general law that an increase in the weight of seed planted affords an increase in the total crop.

Whether or not to use uncut small potatoes for seed is an important question which farmers are divided. Some present the plausible argument that the use of uncut potatoes results in degeneration.

Whether or not to use uncut small potatoes for seed is an important question which farmers are divided. Some present the plausible argument that the use of uncut potatoes results in degeneration.

Timber Land, Act June 1, 1906. NOTICE FOR PUBLICATION. Notice is hereby given that in compliance with the provisions of the Act of Congress of June 1, 1906...
