BEND, OREGON

PIPER AT HAYCREEK.

Studied Disease that is Killing Jack-rabbits at that Place.

Stanley E. Piper, of the Biological Survey of the Department of Agriculture, is expected to arrive in Madras some time today, from Haycreek, where he has been spending the past week conducting investigations in connection with his branch of government service. While at Haycreek Mr. Piper has been investigating a disease which exists among the jackrabbits, and from which large numbers of rabbits are known to have died in the past few years. The Government is conducting investigations to determine the nature of this disease, and any danger that might result to human beings or domestic animals from that source.

While there Mr. Piper conducted some field tests with the inoculation of sage rats, and he will doubtless make known the results of these tests when he reaches this place. The hay crop of the B. S. & L. Co. at Haycreek suffered greatly from sage rats last year, much of their alfalfa being totally ruined. As an illustration of the numbers of rats there were there last season, Mr. Edwards, president of the company, states that on one five-acre tract of alfalfa, more than 1600 rats were killed in a day and a half. Water was turned on to the tract, and small fox terriers killed the rats as they were flooded out of their burrows.

Mr. Piper expects to study con-
