

ALL HAIL PE-RU-NA.

A Case of
STOMACH CATARRH.

Miss Mary O'Brien, 806 Myrtle Ave., Brooklyn, N. Y., writes: "Peruna cured me in five weeks of catarrh of the stomach, after suffering for four years and doctoring without effect. In common with other grateful ones who have been benefited by your discovery, I say, All hail to Peruna."

Mr. H. J. Henneman, Oakland, Neb., writes: "I waited before writing to you about my sickness, catarrh of the stomach, which I had over a year ago."

"There were people who told me it would not stay cured, but I am sure that I am cured, for I do not feel any more ill effect, have a good appetite and am getting fat. So I am, and will say to all, I am cured for good."

"I thank you for your kindness. Peruna will be our house medicine hereafter."

Catarrh of the stomach is also known in common parlance as dyspepsia, gastritis and indigestion. No medicine will be of any permanent benefit except it remove the catarrhal condition.

Gained Strength and Flesh.

Miss Julia Butler, R. R. 4, Appleton, Wis., writes she had catarrh of the stomach, causing loss of sleep and appetite, with frequent severe pains after eating. She took Peruna, her appetite returned, she gained strength, flesh and perfect health.

Mopeless.

"He's about the poorest actor I ever saw," said the first theatrical manager. "A regular ham."

"Perhaps," remarked the other, "he'll get over his faults in time."

"Not much. He's a ham that can't be cured."—Philadelphia Press.

BAD BLOOD THE SOURCE OF ALL DISEASE

Every part of the body is dependent on the blood for nourishment and strength. When this life stream is flowing through the system in a state of purity and richness we are assured of perfect and uninterrupted health; because pure blood is nature's safe-guard against disease. When, however, the body is fed on weak, impure or polluted blood, the system is deprived of its strength, disease germs collect, and the trouble is manifested in various ways. Pustular eruptions, pimples, rashes and the different skin affections show that the blood is in a feverish and diseased condition as a result of too much acid or the presence of some irritating humor. Sores and Ulcers are the result of morbid, unhealthy matter in the blood, and Rheumatism, Catarrh, Scrofula, Contagious Blood Poison, etc., are all deep-seated blood disorders that will continue to grow worse as long as the poison remains. These impurities and poisons find their way into the blood in various ways. Often a sluggish, inactive condition of the system, and torpid state of the avenues of bodily waste, leaves the refuse and waste matters to sour and form uric and other acids, which are taken up by the blood and distributed throughout the circulation. Coming in contact with contagious diseases is another cause for the poisoning of the blood; we also breathe the germs and microbes of Malaria into our lungs, and when these get into the blood in sufficient quantity it becomes a carrier of disease instead of health. Some are so unfortunate as to inherit bad blood, perhaps the dregs of some old constitutional disease of ancestors is handed down to them and they are constantly annoyed and troubled with it. Bad blood is the source of all disease, and until this vital fluid is cleansed and purified the body is sure to suffer in some way. For blood troubles of any character S. S. S. is the best remedy ever discovered. It goes down into the circulation and removes any and all poisons, supplies the healthful properties it needs, and completely and permanently cures blood diseases of every kind. The action of S. S. S. is so thorough that hereditary taints are removed and weak, diseased blood made strong and healthy so that disease cannot remain. It cures Rheumatism, Catarrh, Scrofula, Sores and Ulcers, Skin Diseases, Contagious Blood Poison, etc., and does not leave the slightest trace of the trouble for future outbreaks. The whole volume of blood is renewed and cleansed after a course of S. S. S. It is also nature's greatest tonic, made entirely of roots, herbs and barks, and is absolutely harmless to any part of the system. S. S. S. is for sale at all first class drug stores. Book on the blood and any medical advice free to all who write.

S.S.S. PURELY VEGETABLE

THE SWIFT SPECIFIC CO., ATLANTA, GA.

W. L. DOUGLAS \$3.00 & \$3.50 SHOES

BEST IN THE WORLD SHOES FOR EVERY MEMBER OF THE FAMILY, AT ALL PRICES.

\$25,000 Reward to any man who can prove W. L. Douglas shoes are made in a better way than any other manufacturer.

THE REASON W. L. Douglas shoes are worn by more people in all walks of life than any other make, is because of their excellent style, easy fitting, and superior wearing qualities. The selection of the leathers and other materials for each pair of the shoes, and every detail of the making is looked after by the most complete organization of superintendents, foremen and skilled shoemakers, who receive the highest wages paid in the shoe industry, and whose workmanship cannot be excelled. If you would like to see my large factories at Brockton, Mass., and show you how carefully W. L. Douglas shoes are made, you would then understand why they hold their shape, fit better, wear longer and are of greater value than any other make. My 64 City Edge and 65 Gold Bond Shoes cannot be equaled at any price. CAUTION! The genuine have W. L. Douglas name and price stamped on bottom. Take no substitutes. Ask your dealer for W. L. Douglas shoes. If he cannot supply you, send me to factory. Shoes sent everywhere by mail. Catalog free. W. L. Douglas, Brockton, Mass.

making Cloth from Paper.
"To the ingenuity of Herr Emil Clavier, a well-known Saxon inventor and manufacturer, is due the production of a paper yarn termed "Zylolite," that has been successfully used in a wide range of textile fabrics." So writes Frank N. Bauskett in the Technical World Magazine.

"The utilization of paper wood fibre in this practical way and the extreme cheapness of the new material compared with other yarns now in use is really a most remarkable achievement. This is not a haphazard discovery, but rather the logical result of years of painstaking study and experimentation. After the final development of the theory at first in mind into tangible material for all manner of uses in textile industries, the paper thread and yarn, loose or tightly spun, of all thicknesses, have since been woven into almost every conceivable fabric and tested and retested until the invention has become an important commercial success. The paper yarn has extraordinary wearing properties, and as the full scope of its usefulness has probably not been determined, it will, in all likelihood, lend itself to other purposes yet to be discovered."

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

His Change of Front.

"My view of education," he said, firmly, "is that it should be forbidden. It is deleterious to mental development. It leads to—"

"John," said his wife, entering unexpectedly, "are you telling Mr. Smith of the dear old days when we were college classmates?"

"Yes," said John.—Philadelphia Ledger.

FITS St. Vitus' Dance and all Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. Send for FREE TRIAL bottle and treatise. Dr. H. K. Kline, Ltd., 283 Arch St., Phila., Pa.

Hotel Keys.

"I suppose," said a guest, "a good many forgetful people go off with hotel keys?"

"This will show you," said the clerk. And he took from a drawer the following printed slip:

"The manager of the Blank Hotel acknowledges with thanks the return of key No. —, which Mr. —, by oversight carried away on departure."

So many keys, the young man explained, were mailed by forgetful guests. It had been deemed advisable, as a time saving device, to have a key acknowledgment printed.—New Orleans Times-Democrat.

California's State Library has been placed under civil service rules. It is the first department of the State government to which those rules have been applied.

Science AND INVENTION

Sodium is an excellent conductor of electricity, and in view of the increasing price of copper and the growing demand for that metal not only for electric installations, but for many other purposes, the idea has been broached that sodium should be tried as a material for electric cables. Experiments looking to this end have lately been made by A. G. Bett. He filled an iron tube 130 feet in length with melted sodium. The core thus formed had a cross-section of an inch and a half. A current of 500 amperes was readily transmitted through it. Mr. Bett thinks that sodium conductors constructed upon this plan may be made cheaper than conductors of copper.

A satisfactory rubberless tire has been evolved. The scheme consists of filling a thin inner tire with a hot solution of glue, glycerine and chromic salts as the tire reposes in place on the rim of the wheel. This is allowed to harden for a few days when the tire is covered with canvas or some similar material which will withstand the wear and tear of service. It is claimed for this rubber substitute that it is very durable and will carry heavy loads without deterioration or loss of resiliency. It is much cheaper than rubber and the only criticism raised against it is that it is heavy. Each wheel equipped in this manner adds 40 to 50 pounds to the weight of the vehicle. The advantages will outweigh this objection, it is said.

A German official of standing in the superior grades—Herr Martin, a government councillor—has attracted a good deal of at least ephemeral notice by a new theory of aerostatics in war, which he has just published. For novelty the views of Herr Martin could hardly be surpassed. The title of his work is "The Age of Aerial Navigation," which is, of course, the twentieth century. Herr Martin contends that during the century now opening aerostatics and automobilism will assume immense importance in strategy, and will go far to neutralize in favor of France the great numerical preponderance given to Germany by her larger population. Into the day dreams of Herr Martin, which include partition of Belgium and the Germanizing of Morocco, it is not needful to enter. But he foresees that France and Germany will agree rather than fight.

In 1906 the known number of asteroids, or minor planets, had reached 903, and still the discovery of these miniature worlds continues, especially with the aid afforded by celestial photography. Among a vast multitude of stars crowding a photographic plate one, perhaps, will be seen to have drawn a short thin line upon the plate during its hours of continuous exposure. The astronomer knows at once that it is either an asteroid or a comet. Subsequent observations soon decide the point. Only the more interesting ones are afterward observed with attention; but once discovered they cannot be ignored, and the rapid growth of the flock becomes an embarrassment. Eros, which at times approaches the earth nearer than any other regular member of the solar system except the moon, and Asteroid No. 588, which at aphelion is more distant than Jupiter, remain, as far as their orbits are concerned, the most interesting members of the entire group, and are kept under constant observation whenever circumstances permit.

Patent Motherhood.

A Winner.

"Slicker, the architect, is making a big hit with his new scheme for suburban residences."
"What scheme is that?"
"With every contract for a suburban residence he guarantees a constant supply of servant girls for ten years' time."—Philadelphia Press.

Considerate.

"Were the critics kind to Skribbler when his last book appeared?"
"Exceedingly."
"What did they say about it?"
"Nothing."—Milwaukee Sentinel.

Nearly everyone talks in the presence of a corpse as if they were afraid of waking it.

For Coughs and Colds

There is a remedy over sixty years old—Ayer's Cherry Pectoral. Of course you have heard of it, probably have used it. Once in the family, it stays; the one household remedy for coughs and hard colds on the chest. Ask your doctor about it.

"I have had pneumonia three times, and Ayer's Cherry Pectoral has brought me safely through each time. I have just recovered from my last attack. Ayer's Cherry Pectoral is a wonder!"—E. V. HIGGINS, Stevens Point, Wis.

Ayer's Pills increase the activity of the liver, and thus aid recovery.

London's 101 Parks.

One of the most useful activities of the London County Council has been in the extension of the park system of the metropolis, which now includes, under the management of the Council, nearly 5,000 acres.

The acquirement and development has cost about £8,500,000, and the annual charge for maintenance comes to £565,000, which adds about a half penny in the pound to the rates, or about two-tenths of 1 per cent. The cost includes the salaries of an outdoor staff of 843 men and women.

The Council came into existence in 1889, and succeeded to the metropolitan board of public works in the care of the parks, but of course with larger powers. In all fifty-seven new parks have been added since then out of the total that come under the Council's management.—Park and Cemetery.

The Sedan-Chair.
Perhaps some expert in the Siamese language will tell us what is its word for "sedan-chair." When the King of Siam's minister, protesting against his majesty's favor toward motoring, suggested recently that "the royal sedan-chair" was always at his disposal, it is improbable that he used a word reminiscent of the French town. For it is from the scene of Napoleon III's collapse that the sedan-chair takes its name, and perhaps remote posterity will suppose that it had some connection with that event. But Sedan first produced these conveyances centuries ago, and they were seen in England in 1581. One used by James I.'s Buckingham provoked great popular outcry against the employment of men as beasts of burden. Sir S. Duncombe is credited with having introduced them to London in 1634. And Bath knows the Pickwickian sedan-chair to this day.—London Chronicle.

Lesson from the Past.

Thomas Jefferson was writing the immortal Declaration of Independence, and had just evolved the revolutionary doctrine that all men are endowed with certain inalienable rights, among which are "life, liberty and the pursuit of happiness."

"Of course," he reflected, "there will be about one week in the year when the boy with the cannon cracker or the toy pistol will be at liberty, in his pursuit of happiness, to take anybody's life."

Smiling as he thought of the havoc the automobilists would play with these principles some day, he proceeded to submit a few facts for the consideration of a candid world.—Chicago Tribune.

The Boy's Opportunity.
"Now, wouldn't it be funny," said Popley, playfully, "if I were to become a little boy again?"
"Maybe it wouldn't be so funny for you, pa," replied his bright young son. "If you was to be littler'n me, pa, I think I'd square up a few things."

Save the Babies.

INFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twentytwo per cent, or nearly one-quarter, die before they reach one year; thirtyseven per cent, or more than one-third, before they are five, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save a majority of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium, or morphine. They are, in considerable quantities, deadly poisons. In any quantity they stupefy, retard circulation and lead to congestions, sickness, death. Castoria operates exactly the reverse, but you must see that it bears the signature of Chas. H. Fletcher. Castoria causes the blood to circulate properly, opens the pores of the skin and allays fever.

Letters from Prominent Physicians addressed to Chas. H. Fletcher.

Dr. A. F. Peeler, of St. Louis, Mo., says: "I have prescribed your Castoria in many cases and have always found it an efficient and speedy remedy."
Dr. E. Down, of Philadelphia, Pa., says: "I have prescribed your Castoria in my practice for many years with great satisfaction to myself and benefit to my patients."

Dr. Edward Farris, of Brooklyn, N. Y., says: "I have used your Castoria in my own household with good results, and have advised several patients to use it for its mild laxative effect and freedom from harm."

Dr. J. B. Elliott, of New York City, says: "Having during the past six years prescribed your Castoria for infantile stomach disorders, I most heartily commend its use. The formula contains nothing deleterious to the most delicate of children."

Dr. C. G. Sprague, of Omaha, Neb., says: "Your Castoria is an ideal medicine for children, and I frequently prescribe it. While I do not advocate the indiscriminate use of proprietary medicines, yet Castoria is an exception for conditions which arise in the care of children."

Dr. J. A. Parker, of Kansas City, Mo., says: "Your Castoria holds the esteem of the medical profession in a manner held by no other proprietary preparation. It is a sure and reliable medicine for infants and children. In fact, it is the universal household remedy for infantile ailments."

Dr. H. F. Merrill, of Augusta, Me., says: "Castoria is one of the very finest and most remarkable remedies for infants and children. In my opinion your Castoria has saved thousands from an early grave. I can furnish hundreds of testimonials from this locality as to its efficiency and merits."

Dr. Norman M. Geer, of Cleveland, Ohio, says: "During the last twelve years I have frequently recommended your Castoria as one of the best preparations of the kind, being safe in the hands of parents and very effective in relieving children's disorders, while the ease with which such a pleasant preparation can be administered is a great advantage."
