WILL GROW FRUIT

Many Varieties Do Well in Deschutes Valley.

ARE VIGOROUS AND HEALTHY

An Article that Answers the Question: Will the Lands of the Deschutes Valley Grow Fruit?

Many people have inquired if the lands of the Deschutes Valley will successfully grow fruits. There has never been any question but what fruit can be successfully and profitably grown in this district. On the lands of the Deschutes Irrigation & Power Company's segregation the orchards are as yet not old enough to grow fruit as cultivation has been carried on for only about two years. These orchards, however, show great progress in the time they have been planted and some of them will bear fruit this coming season.

On the south and east of the segregation apples and other fruit have been very successfully and profitably grown for a number of years. On the north side of the lands along the Crooked River, and also along the west side of the Deschutes River, are very profitable orchards. At Tethrow Bridge, apples, plums, berries and even peaches have been successfully grown, while about three miles north of Bend a few trees left from an old orchard were loaded to the breaking point last fall.

Considering that fruit can be grown on land all around the segregation, it is certainly reasonable to conclude that it can be grown on these lands. The apple is a fruit that requires a vigorous climate for its proper development and flavor, as is shown by the fact that it is most successfully grown in the higher altitudes and northern climate. With the sunshine and clear days that we have, the apples and fruit should have a good coloring which greatly assists in selling the fruit.

Two miles northwest of Laidlaw on the Columbia Southern Irrigation Company's lands, Mr. Mutzig planted an orchard in the spring of 1904 which bore and matured some apples last fall. Mr. Weist, whose property adjoins the townsite of Bend on the east, has a thrifty young orchard which shows an unusual growth and will probably bear some fruit this year. He has also had great success with strawberries and other small fruits. Raspberries, blackberries and gooseberries as well as strawberries grow unusually well as has been demonstrated by many settlers in the country.

Around Redmond many orchards have been set out which show exceptionally fine growth and consist of varieties recommended for this attitude. Apples of Duchess of Oldenburg, Yellow Transparent, Arkansas Black, Winter Banana, Wine Sap, King Spitzburg, Snow, South Carolina Red and Wealthy. In cherries, Montecello King, The Special, Early Richmond, Royal Anne, Bing and others. Many settlers have also set out plums, prunes and crab apples, all of which are showing fine growth.

Around the Powell Buttes are many orchards set out by homesteaders which have been bearing for some years, which however, have not had the care that they should. The finest orchard and the best producer is at the Cove near the mouth of the Crooked River where it empties into the Deschutes River. This orchard raises apples, peaches, plums, cherries, prunes and there are some trees of English walnuts and soft shell almonds, all of which mature.

Shevlin Closes Minneapolis Mill. The Shevlin-Carpenter Lumber Company, which has closed down its Minneapolis mill for good, recently reduced its capital stock

from \$600,000 to \$100,000. The heads of the concern have numerous other lumber interests in Minnesota and are also extending their holdings in eastern Washington.—Timberman.

CONSTRUCTION RESUMED.

Work Begun on Railroad from Eugene up the McKenzie to Central Oregon.

Last summer J. C. Bracher told The Bulletin that the Portland, Eugene & Eastern Railway company, of which he is a director, would have a line built into Central Oregon within two years. In view of this statement the following item in the Portland Journal contains much interest:

EGGERS, Or., Feb. 26.—A Welch, general manager of the Portland, Eugene & Eastern Railway company, yesterday announced that the work of building the electric line from Eugene to Springfield and on up the McKenzie valley will be resumed next week. Today the ties were distributed on the streets of Springfield and it is said construction work on the line through that city will begin about the same time the work on the outskirts of Eugene on the way to Springfield begins. Materials are being assembled for the construction of the bridge for the line across the Willamette river at Springfield and work on that structure will probably begin within the next two or three weeks.

On February 26 work on this line was also commenced at Salem and Albany. An electric line from Portland to Salem has been in operation since about January 1—known as the Oregon Electric—which is believed to be closely affiliated with the Portland, Eugene & Eastern.

The Portland, Eugene & Eastern company is incorporated to build an electric line from Portland to Eugene and over the Cascades into Central Oregon. It will pay you to keep your eye on this road.

DEATH OF WILLIAM ORCUTT.

A Hardy Pioneer Who Had Spent His Life in Frontier Countries.

Funeral services over the remains of the late William Orcutt were held at the home last Saturday morning at 10 o'clock and interment was made in the Bend cemetery at 1 o'clock p. m., Rev. Mitchell officiating. The relatives present at the services were the wife of the deceased and his three sons, Frank, Will and Henry.

Mr. and Mrs. Orcutt have spent their lives on the frontier, first in Indiana when that state was new to settlement, next in Minnesota, and later in Oregon. On Nov. 19, 1904, they celebrated their golden wedding anniversary, and the Minneapolis Times, commenting on the event at that time, printed an interesting article regarding the frontier experiences of this venerable couple, one of whom has now passed to his reward. The article follows:

Mr. and Mrs. William Orcutt celebrated their golden wedding yesterday at Bend, Oregon. Mr. Orcutt is 77 years old, having been born in Lower Canada in 1831, before Ottawa was more than a village. Mrs. Orcutt was born in Ireland, in 1833. She came to America when 13 years of age.

This venerable couple have been veritable pioneers, as they have been on the frontier all of their married lives, and for several years before their marriage. They were married at Lagro, Washburn county, Indiana, in 1843. The Washburn valley at that time was little more than a wilderness, and west of the Mississippi there were but few settlers.

Mr. and Mrs. Orcutt remained in Indiana until 1850, when they moved to Minnesota, settling on a homestead in the heavily timbered part of Benton county, twenty-two miles northeast of Sauk Rapids. It meant years of toil and hardship to convert this erstwhile home of the red man and wild deer into a cultivated and productive farm, but they and their growing boys succeeded in doing that at last, and became reasonably well off.

At the time Mr. and Mrs. Orcutt settled in Benton county, there were no railroads west of St. Cloud. The St. Paul & Pacific, now the Great Northern, had been completed to this point but a short time before, and this was the western terminus for several years after. The Red river and Hudson bay country was tributary to St. Cloud at that time, and there was an immense business being done there. It was not unusual then to see long trains of Red river cars, drawn by oxen and laden with furs, heading their way to St. Cloud. In return for the furs sold, supplies for the whole northwest were taken back.

Mr. and Mrs. Orcutt remained residents of Benton county for thirty-seven years, until the spring of 1903, when they disposed of their property and, not being contented to retire and spend the balance of their days in comfort and idleness, concluded to again try the frontier.

They heard of the beautiful climate of the far west, in Washington and Oregon, and also of the mighty pine forests of this land of the setting sun, which were waiting for the ax and the saw of the lumberman—so they decided to try their fortune, and moved to Oregon. Here they took up stone and timber claims, and are now living in the little town of Bend, where they and one of their sons are running a grocery store.

WORK IS APPROVED

D. I. & P. Co.'s Lands Recommended for Patent.

LIST COMPRISES 7,026 ACRES

Cleans Up Entire Segregation between Bend and Redmond—Examined by State Engineer Lewis.

The local office of the D. I. & P. Co. this week received news from the State Land Board that another list of lands had been approved by that body as reclaimed. The list comprises 7,026 acres, and consists of scattering tracts lying between Bend and Redmond. The work of reclamation was investigated by State Engineer Lewis two weeks ago with the result that the State Land Board will recommend that the lands be passed to patent.

This list of 7,026 acres will be forwarded to Washington and as soon as the officials there can take action on the matter, patents to the same will undoubtedly be issued to the State of Oregon, as stipulated in the Carey Act. Chief Engineer Redfield says that all of the company's lands lying between Bend and Redmond will then be patented to the state, and settlers on any of this land can secure deeds to their holdings as soon as they comply with the law as regards settlement and cultivation. With the exception of this last list, all this land has already been patented to the state.

ROSLAND PEOPLE OBJECT.

Want More Liberal Treatment from National Forest Officials.

ROSLAND, March 4.—The people in this vicinity are very indignant over the stand which the forest service is taking in the matter of agricultural land in the upper Deschutes valley.

This land is identical with that of the Oregon Desert Selection No. 11 and several claims have been applied for by bona fide settlers under the act of June 11, 1906. The return from these several applications arrived last week granting these claimants tracts of land of from 60 to 145 acres but in no case the 160 acres applied for. These claims have a scattering growth of black jack pine on them and the forest service has called out this jack pine so close as to even cut up a single acre, allowing one party 92½ acres of the 160 acres applied for.

If this is a sample of the encouragement of which the Hon. Gifford Pinchot and Secretary Garfield spoke of extending to bona fide settlers in the forest reserves, we certainly have our fill of such encouragement and the wonderful benefits which we are told will be ours at the hands of the forest service, and we want no more of it.

Redmond Items.

REDMOND, March 2.—H. F. Tinsley is working on the ditch south of town.

Mrs. Muma entertained several neighbors Thursday in honor of Miss Nellie Muma who will soon return to her home in Buffalo, New York.

Mrs. Bauer still continues to improve. Mr. H. M. Smith late of Elkmouth, B. C., is one of the late arrivals. He is putting up a small house in town for temporary use although he owns land on the O'Neil road northwest of town.

The Pleasant Ridge folks gave a good entertainment to themselves and folks from town on Friday night. Pieces to speak by the school children and grown folks, dialogues and songs were followed by a basket supper, and the one was as good as the other. A very neat sum was realized to go toward the purchase of an organ. There was a good attendance both from Redmond and Cline Falls. E. C. PARK.

Tumalo Items.

TUMALO, March 2.—About three inches of snow fell here Saturday night.

Clarence Neill of Cloverdale was in Tumalo yesterday.

L. H. Root got back from Shaniko Wednesday with a load of freight for Mr. Horner of Laidlaw.

William Bates went to Bend Saturday to visit his family.

The Hightower-Smith mill at Tumalo is running again after nearly a year's lay off.

J. H. Edwards passed through Tumalo yesterday, going after hay which he will haul to Bend where he has a logging contract.

Mrs. T. J. Wiser visited in Tumalo the fore-part of last week.

Today marks the 45th wedding anniversary of Mr. and Mrs. Geo. Wimer of Tumalo, they having been married in

Iowa on March 2, 1863. Shortly after they started across the plains and landed in Oregon in the fall of 1863, where they have made their home every since.

Everyone got busy during the good spell of weather and a good deal of seedling was done in these parts.

Mr. and Mrs. Geo. Palliam and Miss Scroggins were Bend visitors last week.

Mr. and Mrs. Wm. Baker and Miss Melba were visiting in Tumalo yesterday.

Inklings at Gist.

Mrs. Arnold received a letter from Mr. Arnold, who is now in California, and he says he is very well pleased with that country.

The Sunday school here will render a temperance program on Sunday, March 29.

Postmaster Gist and wife and Miss Rilla McReynolds spent Sunday at the Arnold ranch in the Cloverdale country.

Mr. Sturgeon is clearing quite a tract of land on his desert claim near Gist.

Mr. Sparks of the Black Butte Company, has sold out his interest in that company to Nick Lambert, so we are informed.

Mr. Harrard of Cline Falls was at Gist Monday on business.

Eber D. Mosaic was a pleasant caller at Gist Tuesday.

Chas. Wimer of Tumalo was in the Gist neighborhood Sunday.

There will be a social hop at the old school house at Gist Friday eve, so the boys say.

Frank Arnold and Leo went to Bend Tuesday on business.

Mr. Arnold returned from California Monday. He reports having a nice trip. He was as far south as Los Angeles.

Rosland News.

Geo. Bogue and Carl Wiser returned from Bend Wednesday evening. Geo. had been sick for several days and went down to be treated. He is feeling much better since his arrival.

Lee Caldwell arrived in Rosland with a heavy load of freight for Bogue & Co. Wednesday.

The parents and friends of the Rosland school children were treated to an entertainment given by the pupils of the school last Friday. Mr. Bogue gave a very interesting talk also. Those present speak very well of the affair.

Rosland has been very well represented in Bend this week, the contest of Roper Clausen taking many of our people to your town.

Lille Bogue has been quite sick for the last two or three days.

Rosland is enjoying genuine March weather. We have the satisfaction of knowing that it can't last much longer.

Wm. Dorrell and Wm. Taylor have gone into the goat business.

Lee Caldwell will move the sawmill from Tumalo to Rosland in a few days.

Mr. and Mrs. Johnson went down to Bend Wednesday and will spend a few days with their daughter, Anna.

Coyote Attacks Woman.

Mrs. T. A. Caldwell, who lives on the M. Wingfield ranch, near Adel, performed one of the most daring feats Tuesday morning of this week, that it has been our experience to chronicle in this country. Shortly after her husband left the house for his day's work on that morning, a coyote came to the chicken yard and made a raid on the chickens. Mrs. Caldwell went to chase the coyote away, not believing that a coyote would tackle a person. But she was surprised when the thing took after her. She started to run, tripped and fell prone on the ground. The coyote jumped on top of her and sank his teeth in her breast. She grabbed Mr. Coyote by the throat and with a death grip, choked it to death. The coyote's teeth were fastened in her clothing and she succeeded in overpowering him, and never loosened her grip until her desperate victim was dead, and dead to stay. The coyote was skinned, and Mrs. Caldwell will undoubtedly keep the hide as a souvenir of the most blood curdling experience of her life.—Lakeview Examiner.

County Treasurer's Bond Increased.

The county treasurer's bond was increased from \$20,000 to \$80,000 at the special meeting of the county court last week. In the opinion of the court the former figure was entirely too low to protect the county from possible loss. The latter figure represents the maximum amount of funds that is controlled by the treasurer at any one time.

County Treasurer King agreed with the court that the amount should be increased and has accordingly furnished the additional bond.—Prineville Journal.

There's news in The Bulletin.

The Central Oregon Banking & Trust Company

Capital \$25,000.00

OFFICERS:

J. B. Heyburn, Cashier.
H. P. J. McDonald, Mayor of Bend.
E. A. Sather, Merchant.

MONEY IS STORED LABOR.

Every dollar you earn represents a certain number of hours of your labor. It is labor in a condensed form, convenient to exchange for the products of the labors of others, or to hold in storage for use in later years when your strength faileth. Put away a part of today's work—of tomorrow's work—of every day's work, NOW, while you have earning capacity. Your stored labor will support you in comfort in a few years.

Can you save a dollar every day to put in the bank? or 50 cents? or 25 cents? If so you ought to be doing it. It's a pity to waste all the work of these good years, but many are doing it.

Be wise and bank a part of your earnings each day.
