# S.S.S. RHEUMATI

blood and system before a pain is felt, and the changes in the weather or any physical irregularities, such as a spell of indigestion, bowel disturbance, etc., are merely the exciting causes producing the pains and aches, which are the natural symptoms of the disease. Rhoumatism is caused by an excess of uric acid and other corrosive, irritating poisons in the blood, which are carried through the circulation to every part of the system. Every muscle, nerve, membrane, tissue and joint becomes saturated with these acrid, irritating impurities, or coated with fine, insoluble caustic matter, and the sharp, piercing pains or the dull, constant aches are felt with every physical movement. When the blood is filled with uric acid poison, permanent relief cannot be expected from liniments, plasters, or other external treatment. Such measures give temporary relief, but in order to conquer

Rheumatism and bring about a complete cure, the uric acid and other inflammatory matter must be expelled, and this cannot be done with external treatment. S. S. S. cures Rheumatism because it is a perfect and entirely vegetable blood purifier. It goes down into the circulation, neutralizes the acids, and dissolves the irritating deposits which are pressing on the sensi tive nerves and tissues and producing pain, enriches the weak, sour blood, and removes every atom of impurity from the circulation. So instead of being a weak, sour stream, distributing uric acid to the different parts of the system, the blood is strong and healthy and

therefore able to supply every mus-

be furnished free

Sometime ago, I had Rheumatiem and had to quit work. The pain in my back and between my shoulders was no lottener I could not rest or sleep. I tried everything, but nothing did me any good till I heard of and took 5. S. This medicine cured me acund and well. It purified my blood and made me feel like a new man.

CONRAD LOHR. Anderson, Int. 122 E. 19th St.

I was severely troubled with Rheumatiam, had it is my knees, legs and ankies, and any on who has ever had Rheumatian knowshow escru-ciating the pair is and how it interferes with one cating the pair is and how it interferes with one at work. I was truly in had shape—having been bothered with it for ten years, off and on. A local physician advised rue to use S. S. S. I did so. After taking two bottles I noticed the soraces and pain were greatly reduced. I continued the medicine and was thoroughly cured; all pain, sureness and inflammation goes. I recommend S. S. S. to all Rheumatic sufferers.

GRANGE DECLARES ITSELF.

Outlines Plan of Action on Irrigation Question,

Resolutions unanimously adopted by the Oregon State Grange at Eugene, May 14, 1908, upon the following mo-

Moved that the resolutions be adopted ns read and referred to the committee on legislation, with power to prepare a bill as outlined therein, submitting the same to the next session of the legislature for adoption, and further, that the chairman of the legislative committee be authorized to invite such state or national experts on water legislation who can be secured to assist the committee in preparing such bill, also one representative from any state organiza-tion which may hereafter adopt sub-stantially similar resolutions.

#### Resolutions-

Whereas, Titles to water are of equal importance with titles to land, and it appears that a water right should be ensily ascertained, as clearly defined, as secure and in all respects as definite as a perfect title to land; and,

Whereas, It is apparent that without a definite system of water right titles and adequate protection by the state our water users are burdened with coatand apparently unending litigation our present constructed works are de-preciated in value; the United States hemitates to construct irrigation sys-tems; private capital declines to invest; home-seekers go to other states and countries, where the purchase of an irri-gated farm does not mean the purchase of a lawsuit, and thus our development is seriously retarded; and

Whereas, Our present water laws canot be found by a study of the statutes alone, but must be sought for in a long series of decisions by our supreme enurt, and apparently are so conflicting that our ablest lawyers differ in opinon the most fundamental points This law is incomplete and inadequate, This law is incomplete and inadequate, right is and has been, and is in a state of flux. The property of the logic efficiency of the legislature. Few know what the law is today, none know what it may be tomorrow; now, therefore, be it.

Resolved, That it is the sense of the Garden Desperance of the state of Oregon, at the carriest.

of the state of Oregon, at the earliest possible time, to codify and enact a interpretation of this law on such or casion as it might be brought into disute; and he it further Resolved, That such water law should

based upon the best experience or other states and countries, such as Wyoming, Leaho and Canada, and should include the following fundamental principles;

1. That no water right should become vested except by direct grant from the

state.

2. To provide a system whereby the priority and limitations of every existing right to the use of water can eventually be ascertained.

3. To provide a reliable record in some central office of all water rights as determined, and of new rights as initiated.

Teacher—Who gets to be a second of the second in gressmen preserve the Chicago Dally News.

4. That actual measurements ditches and streams be made as a basis school. (No answer.) Teacher—Come, for the adjudication of existing rights you can tell us, Casey. Casey—De and the initiation of new rights to the

surplus water, if any.

5. To provide a definite procedure whereby rights to such surplus water

may be acquired.

6. That beneficial use should be the basis of all rights to the use of water, and that water for irrigation purposes should be made appurtenant to the land

7. All rights to the use of water for power development should be limited to to leave me? Going to get married? a period of twenty-five years, subject. This is most unexpected. The French to renewal under certain restrictions.

Maid—Out, madam, but eet ees not my 8. To provide un efficient administra tive system, with proper officers, for the distribution of the water supply among those entitled to its use.

#### QUERIES BY FARMERS.

Experiment Station Called Upon for Advice on Various Subjects.

From the Washington State College, Pullman.

A correspondent at Chency writes the following letter to the station "I am interested in the subject of bacteria as an agricultural agency, and would like to know if anything is being done by the government along the lines of bacteria research. Is the use of bacteria cultures likely to prove an important factor in the agriculture of the lines of bacteria cultures likely to prove an important factor in the agriculture of the lines of the lines of bacteria cultures likely to prove an important factor in the agriculture of the lines of bacteria cultures likely in like likely like likely likely like likely agriculture of the Inland Empire? To what extent are fertilizers used in the Northwest, and with what ficiency? Please give me some infor-mation concerning the new theory of soil poisoning by successive crops

Following is the reply given to this At this station we have tested several different cultures, some of which were successful, while others failed. W- have found that in the laboratory and greenhouses, where conditions possimist, "You can ear as much as could be controlled fairly well, the you like, but there's never anything cultures possessed values. We are you could possibly like."—Philadelphia not sure that their use will become press.

ington, but we are learning that many of our soils may be vastly improved by certain treatments. The indications are that fertilizers will be used in the near future, more as a cor-rective agency, than to increase fertility. The theory of 'soil-poisoning' is based on the fact that where a soil is overcharged with some element, should say not," replied the giddy old the excess of this element becomes in urious to vegetation. It is necessary man of to-day interested in me."—Moreover the control of the contro to counteract this by the use of some
