**WHEN YOU COME TO PORTLAND**  
ARRANGE TO STOP AT

**THE CORNELIUS**  
FAHR AND ALDER STS.

A New and Modern European Hotel, catering  
particularly to State people. A refined place for  
before visiting the city, close to the shopping  
center. Rates reasonable. Free Bus.

N. K. CLARKE, (late of Portland Post) Mgr.

**St. Helen's Hall, Portland, Or.**  
Resident and Day School for Girls.  
Catalogue on Request.

**Chipper.**  
"Will you saw some wood for your  
dinner?"  
"No'm, I don't eat wood."—Houston  
Post.

**Habitual  
Constipation**

May be permanently overcome by proper  
personal efforts with the assistance  
of the one truly beneficial laxative  
remedy, **Syrup of Figs and Elixir of Senna**,  
which enables one to form regular  
habits daily so that assistance to na-  
ture may be gradually dispensed with  
when no longer needed as the best of  
remedies, when required, are to assist  
nature and not to supplant the natu-  
ral functions, which must depend ultimately  
upon proper nourishment,  
proper efforts, and right living generally.  
To get its beneficial effects, always  
buy the genuine

**Syrup of Figs and Elixir of Senna**  
Manufactured by the  
**CALIFORNIA**  
**FIG SYRUP CO.** ONLY  
SOLD BY ALL LEADING DRUGGISTS  
One size only, regular price 50¢ per Bottle.

**Libby's  
Food  
Products**

**Libby's  
Vienna Sausage**  
You've never tasted  
the best sausage until  
you've eaten Libby's  
Vienna Sausage.

It's a sausage product  
of high food value.  
Made different. Cooked  
different. Tastes  
different and is different  
than other sausage.

**Libby's Vienna  
Sausage**, like all of the  
Libby Food Products,  
is carefully prepared  
and cooked in Libby's  
Great White Kitchen.

It can be quickly  
served for any meal at  
any time. It is pleas-  
ing, not over-flavored  
and has that satisfying  
taste. Try it!

**Libby, McNeill & Libby,  
Chicago.**

**For that  
Dandruff**

There is one thing that will  
cure it—Ayer's Hair Vigor.  
It is a regular scalp-medicine.  
It quickly destroys the germs  
which cause this disease.  
The unhealthy scalp becomes  
healthy. The dandruff disap-  
pears, had to disappear. A  
healthy scalp means a great deal  
to you—healthy hair, no dan-  
druff, no pimples, no eruptions.

The best kind of a testimonial—  
"Sold for over sixty years."

**Stammering the Eternal City.**  
"When you were in Rome, of course,  
you did as the Romans do."  
"Er—yes; I had to. I ran out of  
money, and had to find some way to ex-  
tract it from the rich Americans that were  
visiting the city."—Chicago Tribune.

**Why He Could Not Change.**  
The story is told of a Dutchman who  
certainly needed the services of the far-  
famed "Lady from Philadelphia" if  
ever anyone required her assistance.

He was assigned to a seat in the  
coach which obliged him to ride back-  
ward through the Black Forest. At the  
first stopping place he asked the post-  
master to give him another seat, say-  
ing it made him ill to ride backward.  
"Ask the man opposite to change  
with you," said the postmaster, gruffly.  
"But there is nobody opposite me,"  
complained the Dutchman, "so I can-  
not ask him."—Youth's Companion.

**Purely Relative.**  
"My dear friend, don't you know there's  
no such thing as matter?"  
"If I weighed only ninety-five pounds,  
as you do, I might easily believe that; but  
I weigh 245, and I'm harder to convince."

**Child Management.**  
I don't like punishments. You will  
never torture a child into duty, but a  
sensible child will dread the frown of a  
judicious mother more than all the  
rods, dark rooms and scolding school-  
mistresses in the universe.—White.

**Just Picked It Up.**  
"Yes," said Mrs. Newrich, shortly  
after her return from a trip across the  
pond. "France is a great country and the  
people in Paris are amusingly  
clever."

"In what way?" queried Mrs. Homer.  
"Why, they all speak French fluently,"  
replied Mrs. Newrich, "and sev-  
eral of them assured me they had  
never taken a single lesson in the lan-  
guage."

**Harriman's Illustration.**  
E. H. Harriman the other day was  
discussing the recent drop in securities  
and claimed that it was inadvisable to  
legislate too harshly against what he  
regarded as vested interests. The  
present situation reminded him of a school-  
teacher who suddenly asked a boy:  
"What are you fumbling with?"

The boy's next-seat neighbor said  
Johnny had a pin.  
"Take it from him and bring it to  
me," said the teacher. This was done,  
whereupon the schoolma'am ordered  
Johnny to rectify his lesson. The boy  
grinned and sat still.  
"Stand up, I tell you," commanded  
the teacher.

Then the lad blurted out: "I can't,  
ma'am. That there pin what you have  
was holdin' up my pants."

**The Antecurat.**  
It looked like rain, but the umpire did  
not hesitate.  
"Play ball!" he commanded.  
Instantly the threatening rain turned  
to hail.

**"Bouncer" Twenty Years After.**  
The perfect skeleton of a cat was  
found between the walls of the old  
Corby building in Bloomfield Centre  
this morning by men in the employ of  
William B. Raab, a contractor, who is  
remodeling the structure for the gro-  
cery firm.

It was recognized by one of the oldest  
residents as the remains of "Bouncer,"  
a cat that disappeared suddenly about  
twenty years ago. "Bouncer" was a  
famous fighter of dogs, as well as rats,  
and had whipped nearly every canine  
in town, until one day he ran across  
"Gyp Sleggers," a dog with a record for  
cats, known by almost everybody.

"Gyp" and "Bouncer" had it hot and  
heavy for a time, but the dog was  
too much for the cat, and the latter  
was chased up a dark stairway lead-  
ing from Abel Baker's old store, and  
in some manner fell between the walls  
and was unable to get itself out. For  
a time it was believed that the build-  
ing was haunted, but the cries came  
from poor "Bouncer."—Newark Adver-  
tiser

**FARMERS'  
CORNER.**

**Feet of the Horse.**  
The usefulness of a horse depends  
largely upon the quality of his feet. If  
they are sound and well taken care of  
he is able to travel and work well,  
but if they are defective and neglected  
his usefulness is impaired and he can  
not be depended on in any emergency,  
as he is liable, when his services are  
most needed, to become partially if not  
wholly disabled, resulting in serious  
loss to his owner. But few horses are  
born with perfect feet, yet the defects  
by careful treatment are often entire-  
ly cured; also many horses with sound  
hoofs are practically ruined by the  
ignorance or carelessness of black-  
smiths.

The proper shoeing of horses and the  
general care of their feet is a matter  
that should receive the strict attention  
of every farmer, and yet, as a rule,  
it is woefully neglected. The farmer  
should have knowledge of the natural  
formation of a horse's foot, so as to be  
able to determine whether the animal  
is being properly shod or not, and  
while that is being done he should  
never go away and leave the smith to  
sight the work to get through with it  
or butcher its feet if he does not un-  
derstand his business.

While no definite rules for shoeing  
horses can be given, some general prin-  
ciples are acknowledged by all com-  
petent horsemen, namely, the heel  
should never be cut except to remove  
a ragged point. The same is true of  
the frog, which is an elastic cushion,  
intended to reduce the impact of a sud-  
den shock to the foot. The butteris  
is an instrument that may do an im-  
mense amount of damage in the hands  
of an incapable operator. Much mis-  
chief is done by it every day.

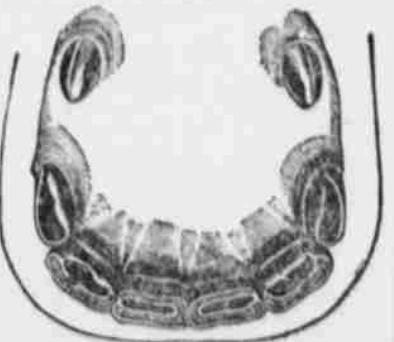

When the toe is too long and projects  
beyond the hoof, it causes stumbling  
and it should be shortened. A hot iron  
should never be applied to the foot to  
ascertain its evenness, as many black-  
smiths do merely to save time, when  
they know it is not right. A seared  
surface between the hoof and the shoe  
makes the contact less perfect and the  
shoe necessarily less rigid than it ought  
to be.

The outside of the hoof should not be  
rasped more than is necessary to clinch  
the nails, as this thins the crust and re-  
duces the strength of the bearing sur-  
face of the foot. Wearing and decay  
are sometimes the result of this prac-  
tice. Oil applied to the hoofs occasion-  
ally during dry weather is beneficial.

**To Tell a Horse's Age.**

At four years old each jaw shows  
four permanent teeth, whose tabies are  
worn to the same level. The dividers  
are worn upon both of their borders.  
Looked at from the side, the corner  
teeth are quite small.

At four and a half years the nippers  
show wear on both edges. The corner  
teeth and the hook or canine teeth are  
in evidence.

**An Agricultural Pest.**  
So great have been the ravages  
caused by the dodder—a leafless, twin-  
ling, parasitic plant—that a decree has  
been issued by the French President  
prohibiting its importation into the  
country. It is a veritable agricultural  
scourge, attacking and destroying hops,  
vines, clover, peas, tomatoes and many  
other kinds of agricultural produce.  
Once having found its way into any dis-  
trict, it is most difficult to get rid of,  
and constitutes a permanent source of  
anxiety to the farmer. Cutting down,  
burning and poison have all been tried  
with unsatisfactory results.

**Unprovable Experimenting.**  
In the entire realm of scientific in-  
vestigation there is nothing more inter-  
esting and marvelous than the growth  
and development of plants from the  
beginning or the germination of the  
seed to the reproduction of the germ.

Each species of plant has its distinct-  
ive character and life habits and only  
flourishes where natural conditions are  
favorable to its growth. To attain any  
degree of perfection, the soil and clim-  
ate combined must be such as the  
plants require, although a moderate de-  
gree of success may be attained when  
either of these factors are not exactly  
suited to its growth, but where both  
are deficient in any considerable de-  
gree the plant can not be successfully  
grown, except by artificial means  
whereby the necessary natural condi-  
tions are created. If the chemical com-  
position of the soil is favorable, and  
climatic conditions unfavorable, the  
latter can be created artificially—such  
as protection from cold and excessive  
heat and lack of moisture—and, like-  
wise, if the soil is deficient in the  
chemical elements which the plant re-  
quires, they can be added to, but in  
either case the process is laborious and  
expensive and the results unsatisfac-  
tory. All plants are indigenous to  
certain kinds of soil, and all soils are  
especially adapted to the growth of  
certain kinds of plants, and nature can  
not be improved upon in any way, nor  
can her deficiencies be successfully  
remedied by artificial means. In order,  
therefore, to be successful in his busi-  
ness, the farmer must "keep close to  
nature and mark well her ways." He  
must raise only such crops as are best  
adapted to the soil of his farm, in ac-  
cordance with his experience, and  
wholly refrain from extensive experi-  
ments with such as are of doubtful  
utility.

**Keeps Chickens at Home.**

An Iowa man has designed an anti-  
flying chicken-wing attachment hav-  
ing in view to prevent the annoyance and  
damages incident to chickens scratch-  
ing in your neighbor's garden. The  
device is attached to the chicken's  
wing. It is made of parallel pieces  
of wire bent into the form of an el-  
bow, with a hook at the bend.

To apply the attachment to a chick-  
en's wing it is slipped over the wing  
and by placing the parallel sides toward  
each other the hook can be snapped in  
position and retained by the resiliency  
of the wire. The hook will be on the  
inner corner of the wing and will pre-  
vent the device from slipping off. The  
chicken will thus be prevented from  
spreading the wing as required to fly  
and thereby unable to get over a fence  
into the neighbor's garden.

**Leather Shoes for Horses.**

In some districts of Australia horses  
are shod with leather, instead of iron,  
says Harper's Bazar. This plan is em-  
ployed only in regions where the  
ground is permanently covered with  
grass, or fine sand, and gives the feet  
better support. In a country such as  
Australia, where a horseman may ex-  
perience great difficulty, at a critical  
moment in finding a horseshoe, such an  
innovation is a useful novelty. With  
extra shoes, whose weight is a trifle,  
and which can be fitted without trou-  
ble, it is practicable to travel without  
fear of the horse losing its shoe and  
being injured. Though the latter shoe  
is more expensive than the iron shoe,  
the higher price is repaid by the su-  
perior advantages.

**Houses of Corn Cobs.**

In some parts of Europe corn cobs  
are used for building purposes. The  
cobs are collected and taken to a fac-  
tory, where heavy compresses crush  
and mold them into blocks of various  
sizes, just as bricks are variously  
molded. These blocks are then bound  
with wire so as to make them hold to-  
gether. They are then soaked in tar  
to make them water-tight, and are  
ready for use after this treatment. Of  
course, they are much lighter than  
bricks, are always dry, and make good  
houses. This is but one of the very  
many ways in which Europe shows a  
greater economy than America does.  
There is little over there which goes to  
waste. Even the refuse and garbage  
of Paris is made to serve a purpose by  
being burned and converted into pow-  
er.

**The Care of Sheep.**

If the pasture is poor the sheep can  
be kept in good flesh by feeding a little  
grain.

Corn, oats and oatmeal is a good mix-  
ture fed with such foods as rape, roots,  
ensilage and turnips.

Have you thought out any way you  
can make your wife's work any easier  
this year? Of course, you have ar-  
ranged to make your own as best as  
possible.

Overfeeding or sudden changes from  
poor to very rich food, combined with  
want of exercise, if not actual causes,  
will contribute to the development of  
the loss of wool among ewes.

An English shepherd being asked  
what he attributed his unequalled suc-  
cess in the show ring to, replied: "To  
two things—always having my entries  
trained to walk in the halter, and to al-  
ways being polite to the judge, no mat-  
ter what position he placed the exhibi-  
tion."

**S.S.S. CURES  
OLD SORES**

No old sore can heal until the cause which produces it has been removed.  
External applications of salves, washes, lotions, etc., may reduce the inflam-  
mation and assist in keeping the place clean, but cannot cure the trouble  
because they do not reach its source. Old sores exist because the blood is  
infected with impurities and poisons which are constantly being discharged  
into the place. The nerves, tissues and fibres of the flesh are kept in a state  
of irritation and disease by being daily fed with the germ-laden matter  
through the circulation, making it impossible for the sore to heal. S. S. S.  
cures chronic sores by its purifying action on the blood. It goes down into  
the circulation, and removes the poison-producing germs, impurities and  
morbid matters which are responsible for the failure of the place to heal.  
S. S. S. makes the blood pure, fresh and healthy; then as new, rich blood is  
carried to the spot the healing process begins, all discharge ceases, the  
inflammation leaves, new tissue begins to form, the place fills in with firm,  
healthy flesh, and soon the sore is permanently cured. S. S. S. is purely  
vegetable, the safest and best blood purifier for young or old. Book on  
Sores and Ulcers and any medical advice free to all who write.

Anybody's Darling.  
Male Voice—Hello!  
Female Voice—Hello!  
"Is this you, darling?"  
"Yes; who are you?"—Yonkers States-  
man.

Deafness Cannot Be Cured  
by local applications, as they cannot reach the  
diseased portion of the ear. There is only one  
way to cure deafness, and that is by constitu-  
tional remedies. Deafness is caused by an in-  
flamed condition of the mucous lining of the  
Eustachian tube. When this tube is inflamed  
you have a running sound or imperfect hear-  
ing, and if when it is entirely closed, deafness is  
the result, and unless the inflammation can be  
taken out and this tube restored to its normal  
condition, hearing will be destroyed forever.  
Nine cases out of ten are caused by Catarrh,  
which is nothing but an inflamed condition of  
the mucous surface.

We will give you \$100.00 for any case of  
deafness (caused by catarrh) that can-  
not be cured by Hall's Catarrh Cure. Send for  
circulars, free.
