EXCELLENT CELERY.

Joe Buckholz, Bend Gardener. Raises A1 Quality of the Toothsome Plant.

Joe Buckholz, the truck gardener who supplies Bend with the greater part of its vegetables, has demonstrated one thing, and that is that celery will grow to perfection in this section.

Of course, it is possible to raise celery after a fashion in most any country where anything will grow, but there is a great difference in quality. There is a celery that is tough and stringy, green and discolored; and then there is the other kind—crisp and tender and juicy, devoid of "strings," and white in color.

When E. H. Harriman was here two years ago he was served at the hotel with some of Mr. Buckholz's celery and he remarked that it was the best he had ever eaten.
