The Great Spring Medicine

In thousands of homes, for more than thirty years, Hood's Sarsaparills has been taken, as a Spring Medicine, by every member of the family.

Peculiar to Itself in what it is and what it does, it combines the best blood purifiers, appetizers and tonics, and effects complete cures of

Spring Ailments-all blood diseases, pimples, sruptions, eczema, scrofula, all stomach, liver and kidney complaints, loss of appetite, that tired feeling, all low or run-down conditions of the system.

Hood's Barsaparilla effects its wonderful cures, not simply because it contains sarsaparilla, but because it combines the utmost remedial values of more than 20 different ingredients, each greatly strengthened and enriched by thisspeculiar combination. These ingredients are the very remedies that successful physicians prescribe for the same diseases and ailments. There is no real substitute for Hood's Sarsaparilla. If urged to buy any preparation said to be "just as good," you may be sure it is inferior, costs less to make, and yields the dealer a larger profit.

Begin taking Hood's Sarsaparilla today, in the usual liquid form or in the chocolated tablets known as Sarsatabs. 100 Doses One Dollar.

VALUE OF SEPTIC TANKS.

Many Odors and Germs May Be Dis-

pensed With by Their Use. Ex-President Roosevelt's farmers' commission, appointed for the purpose of investigating and reporting upon the conditions of the great farming industry of our country, found that one of the greatest disadvantages the farming

munity has to contend with, owing COT to the absence of proper sewerage, was the unsanitary conditions surrounding the homes. Now this same condition prevails not

only upon the farm but also in small towns and suborbs of cities where there are no sewers or water works, and where the people have to depend upon wells for their water supply.

Usually these homes have a well at the rear of the house, near the kitchen door. A few feet further will probably be an old style toilet, standing over an unwalled vault dog a few feet into the ground. The greasy waters and slops from the kitchen are either conveyed by a pipe from the sink to a ho e in the ground, or empited into the back yard to putrify and from which the swarms of flies, attracted by the obnoxious oders from this decaying. mass on the ground and in the toilet, carry disease and death into the house, as bees carry pollen from flower to flower. In the winter seasons we do not have the germ carrying flies to pollute our food, but we have an agent equally as oad in the rains, which saturate the earth and carry the scepage from these polluted places down through the ground, uniting with and constantly contaminating the well water with ty

phoid and other germs. All of these dangers can be overcome at a comparatively small expense by the installation of a properly designed and constructed septic tank, with a glazed vetrified sewerage system connecting the house and toilet with the The tank being practically same. buried in the ground and hermatically sealed, with the inset and outlet pipes beneath the water, there can be oders escape from it. Even the water from the outlet, or overflow, of the tank is clear, odorless and germless, all of which are owing to the fact that
