PHYSICIAN ISSUES EDICT.

Harriman Must Not Labor So Strenyously as in Past.

Vienna, Austria, July 6 .- Edward H. Harriman, the American railroad wizard, must not work again so hard or so continuously as he has done in the past. This is the edict of Dr. Adolf Struempell, the noted Vienna specialist, who has diagnosed Harriman's ailment as incipient paralysis. In obedience to this edict is Harriman's only safety.

For the present, declares Professor Struempell, Mr. Harriman must have complete quiet. To this end his meals are now being served in his room, and he only emerges therefrom once a day to take the mild exercise which has been prescribed as a part of his course of treatment.

The course of treatment through which Mr. Harriman is now being put is intended to cure his nervous trouble and get him into as good physical condition as possible, after which an entirely new course of treatment will be inaugurated in an effort to relieve the paralysis which is affecting his limbs. This cannot be cured, Mr. Harriman has been informed, but its acute symptoms can be relieved and its progress stayed.

Mrs. Harriman is remaining constantly by his side, and Her ministrations form an important feature of the course of treatment being given him.

GOLD ORE AS BALLAST.

Metal.

Chicago, July 5 .- Officials of the Santa Fe road are inclined to believe that through the accidental discovery of gold and copper in the ballast used on the Belen cut-off a new rich mining district will be developed in the Manzano mountains in Torrance county, New Mexico.

Now that gold has been discovered in the region these stories are being revived and many are flocking into the mountains and are staking out claims everywhere.

The discovery of gold is largely due to one of the engineers of the company, who is located at the general offices in Chicago. Not along ago this engineer was walking track between Belen and Willard and while in a deep cut he picked up a chunk of ballast which had a chemical stain upon it. The stone was brought to Chicago, and it was found to be highly infused with gold.
