A Storekeeper Says:

"A lady came into my store lately and said: 'I have been using a New Perfection Oil Cook-Stove all winter in my apartment. I want one now for my summer home. I think these oil stoves are wonderful, comfort they are, they would all have one. I spoke about my stove to a lot of my friends, and they were astonished. They thought that there was small and smoke from an oil stove, and that it heated a room just like any other stove. I told them of my experience, and one after another they got one, and now, not one of them would give hers up for five times its cost.'"

The lady who said this had thought an oil stove was all right for quickly heating milk for a baby, or boiling a kettle of water, or to make coffee quickly in the morning, but she never dreamed of using it for difficult or heavy cooking. Now—she knows.

Do you really appreciate what a New Perfection Oil Cook-Stove means to you? No more coal to carry, no more coming to the dinner table so tired out that you can't eat. Just light a Perfection Stove and immediately the heat from an intense blue flame shoots up to the bottom of pot, kettle or oven. But the room isn't heated. There is no smoke, no smell, no outside heat, no stowage in the kitchen where one of these stoves is used.

One Quiet Spot.
"This," said the chauffeur, pointing to a large and imposing mansion, surrounded by beautiful and well kept grounds, some distance back from the roadway, "is the only place around here where they have an absolutely safe and sane Fourth of July."
"What place is it?" asked one of the passengers.
"It's the county insane asylum," answered the chauffeur.

Utterly Wasted.
"What are you glum about now?"
"I was just reviewing my past life."
"Well?"
"And thinking of all the useless worrying I have done."

Household Remedy

Taken in the Spring for Years.

Ralph Rust, Willis, Mich., writes: "Hood's Sarsaparilla has been a household remedy in our home as long as I can remember. I have taken it in the spring for several years. It has no equal for cleansing the blood and expelling the humors that accumulate during the winter. Being a farmer and exposed to bad weather, my system is often affected, and I often take Hood's Sarsaparilla with good results. Hood's Sarsaparilla is Peculiar to itself. There is no 'just as good.' Get it today in usual liquid form or tablets called Sarsatabs."

A Grave Threat.
A woman in widow's weeds was standing at one of the entrances to Wadsworth cemetery, accompanied by her small son, who was weeping bitterly. Conquering having failed to pacify the lad, the mother indulged in this threat: "If you don't stop crying this minute I'll not take you in to see your father's grave."

Record Sale of Paintings.
The public auction of the Yerkes collection of paintings at New York has broken all American records for high prices. The Turner "Rockets and Blue Lights" bringing \$125,000 and the Frans Hals "Portrait of a Lady" going for \$137,000. In two days the sale totaled over a million and a half.

Italy levies a graduated income tax as well as a direct tax on land and houses. Smaller incomes are exempt from taxation. The minister of finance estimates that the income tax for this year will amount to about \$48,500,000, while the land tax will bring in \$36,000,000.

EARTH PASSES COMET'S TAIL.

Millions Who Watched for Phenomena Saw Nothing.

No Ill Effects Nor Electrical Disturbances Apparent—Many Sun Spots In Evidence.

Portland, May 19.—The comet came, the comet went, and this old earth is no worse and no better, and thus far very little wiser.

There was no collision, as the superstitious and the ignorant feared, and now that the comet is headed away from us, there will be no recurrence of the manifestations of terror that were recorded from all parts of the world.

The earth did pass through the tail of the comet, but nobody suffered from the deadly cyanogen gas. To the naked eye, the tail of the comet was indeed the "variest approach to nothing set in the midst of naught."

In fact, the phenomena of the daylight hours of yesterday were far the more interesting. During the afternoon sunspots were observed in varying numbers from five Western observatories at the same hour, but the astronomers who recorded them were almost unanimous in the belief that these disturbances had nothing to do with the approach of the comet. Two were seen from San Jose, with 13 smaller spots; three "considerably accentuated" spots from Vallejo, Cal.; and two from Portland, Oregon.

None of the Eastern observatories had anything of note to report, either during the day or the night. Near Chicago, at Williams Bay, Wis., where is the great Yerkes telescope, the conditions for observations seemed the best and the astronomers there were confident that the negative as well as the positive results of their examination would be of lasting scientific value.

The whole performance took little more than five hours. Observers differed as to the exact time at which the earth began to pass through the comet's tail, but the opinion averages a moment between 10 and 11 o'clock at night, Eastern time.

The combined speed of the tail and the earth was estimated at slightly more than 46 miles a second, and the breadth of the tail at about 1,000,000 miles.

Friday the comet will become visible again, headed away from us, with the tail sticking straight up out of the western sky a little above the spot where the sun sinks. There will then be no light from the rising sun to dim the glory of the spectacle and it is likely to be far more majestic than in the stages of the approach. At the end of this month, good-bye for another 75 years.

COMETS IMMATURE PLANETS.

Professor See Advances Theory After Years of Research.

Mare Island, Cal., May 19.—Professor T. J. J. See, astronomer in charge of the United States naval observatory at Mare Island, announced today as the outcome of years of research in comical evolution, a theory on the origin of comets, which, he said, were some of the primitive masses once forming the solar nebula and could be popularly described as immature, undeveloped planets.

"In course of researches made at Mare Island during the past two years on the origin of the solar system," said Professor See, "I have proved that comets are really survivals of the outer shell of ancient nebula, from which our system was developed. All the inner parts of the nebula have been cleared away in producing planets and satellites, but many small masses still survive in the outer shell of the old nebula. These are the comets."

Ball of Radium is Theory.

Portland, May 19.—"I believe Halley's comet is a ball of radium," declared Dr. Davidson Buchanan last night, in his lecture before the magazine class at the Y. M. C. A. "And I think," he continued, "that the proof of this theory will be established by the results of observations of scientific men now studying the comet. Like radium, the comet furnishes its own luminosity and continues for years without decreasing in weight." Dr. Buchanan said this at the close of an interesting talk on comets in general.

Trade Is Brisk in Conjur Bags.

Atlanta, Ga., May 19.—Dealers in "conjur" bags in the negro sections of the city carried on a thriving business yesterday, as the result of the scheduled trip of the earth through Halley's comet. Meetings also were held in churches, thousands of negroes refusing to return to work until the passing of the "comet." Cloudy weather throughout the South obscured the heavens and somewhat allayed the fears of the superstitious.

Harvest of Converts is Reaped.

Standford, Ky., May 19.—Scores of negroes professed salvation at all-night sessions held in their churches here last night, to prepare themselves for whatever might happen when the earth passed through the comet's tail. Fields are practically deserted by the farm hands, for negroes have refused to work and are fleeing to town.

Where is Your Hair?

In your comb? Why so? Is not the head a much better place for it? Better keep what is left where it belongs! Ayer's Hair Vigor, new improved formula, quickly stops falling hair. There is not a particle of doubt about it. We speak very positively about this, for we know. Does not change the color of the hair.

How Is Your Appetite Today?

Is it keen and normal, or do you have that "don't care" sort of feeling? Loss of appetite is one of the surest signs of inward weakness, and if you are wise you will heed the warning promptly and take a few doses of Hostetter's Stomach Bitters. The system requires a certain amount of nourishment every day in order to keep up health and strength and to replace the waste portions. This can only be accomplished with a keen appetite and perfect digestion and assimilation of the food. Then again Hostetter's Stomach Bitters should be taken. It will stimulate the flow of gastric juices, so essential to perfect digestion, and aid in every way possible. For over 56 years it has been used with wonderful success in cases of Poor Appetite, Heartburn, Flatulency, Indigestion, Dyspepsia, Constiveness, Biliousness and Malaria.
