MORE LINES RUN

ADJUSTING RAILROAD SURVEYS IN UPPER COUNTRY.

Telephone Line to Crescent to be Completed within Two Weeks—Another Townsite to be Added to the Flock.

CRESCENT, Or., Oct. 10.—Work of revising the line of the Natron cut-off to bring it into Crescent, will be completed within the next two weeks by Engineer Drumm of the Southern Pacific, whose crew has been employed in the vicinity of Odell lake and the Summit during the past month. About the lake the line has been raised 10 feet above the former survey and several curves eliminated. Near Wakefield, a townsite south of here, the Southern Pacific has thrown the line a quarter of a mile to the west.

Engineer Ringo of the Hunter Land Company, which is to put in an irrigation project along the old military road land grant near here, will leave this week for Corral Springs to lay out a new townsite on the company property, over which passes the Southern Pacific survey. The townsite will probably not be placed on the market until after the first of the coming year.

At the headquarters of the Oregon Trunk in Portland President Stevens has announced the selection of the line through the lava beds south of Bend, where the heaviest work between Bend and the Williamson River canyon is encountered. It was this section of the line which caused a postponement and suspension of construction work in July, when the contract from Madras to the Klamath Reservation was awarded to Henry & McPhee. Four different engineers were, at various times, placed on the work through the lava in the hope of securing a better line through there. It was found, however, that the line surveyed by L. F. Wakefield, formerly locating engineer of the Oregon Trunk, was the best and this was adopted. It goes through the lava beds on a one per cent grade.

Rangers in the vicinity have been notified of a movement on the part of Foresters over the United States to contribute to a fund for the purpose of giving burial to the seventy-five volunteers who lost their lives fighting forest fires in Idaho and Washington, during the past summer.

Rangers Nichols and McLoughlin are sending to the department one dollar collected from each person employed in the forestry service. This fund will aggregate several thousands of dollars and the money will be used to disinter and bring to the towns the bodies of the men buried in the mountains during the battle against the fires.

In this connection it is stated that the forestry funds appropriated for fire fighting were inadequate and it will be necessary to transfer from the fund for improvement and maintenance to pay bills until Congress makes another appropriation. On this account improvements at stations in the Deschutes and Umpqua reserves are held up and it is likely nothing will be done until next spring. The station at Crescent has been selected and work on fencing begun. Buildings had been planned but it will be necessary to postpone work until funds are provided.

After a number of delays, dating from June, it is announced by Manager Doumer of the Pioneer Telephone company, with headquarters at Prineville, that the line from La Pine to Crescent will be completed within two weeks. The materials have been freighted to La Pine and a force of men left Bend a few days ago to begin work. The line between Bend and La Pine is in unsatisfactory condition owing to trees falling across the wires. These will be straightened up and the service, it is stated, will be first-class within a month. Until recently the line terminated at the old townsite of Rosland, a mile north of La Pine.

The feed stable and ranch meadows, heretofore held by J. H. Wensandy, have been sold to F. C. Robinson, landlord of the Crescent Hotel. The barns will likely be removed from the Oregon Trunk right-of-way, preliminary to construction work which is promised early in the spring.

Charles Thomas has begun the erection of a four-room cottage on his Stevens street property. Mr. Thomas will put up a feed barn on Railroad avenue this winter or early next spring.

E. G. Rourke has completed his five-room cottage located near his store on Main street.

Mrs. Joseph L. Ringo and children who have been visiting Mr. and Mrs. Charles Graves of Klamath Falls the past three weeks, have returned home.

Mrs. E. G. Rourke made a trip to Bend this week, called there by the serious illness of her father, Mr. Caldwell of Paulina Prairie.

Eddie Santry, accompanied by W. C.

Sheldon, formerly of Taft, Montana, returned this week from Shaniko, where he went to freight in a load of goods.

A BALKY MULE.

Remedies Were Applied, and He Moved Just a Little Bit.

"Yessuh," said the negro through the borrowed telephone. He stood on one foot in the drug store and talked in his natural voice, which made the bottles jingle on the shelves. The numerous people in the store heard all he said as a natural consequence, but could not hear the conversation at the other end. They deduced, however, from the negro's remarks that he was talking with his boss and that he was a teamster by profession.

"Yessuh," he said, "I tried dat."
"Yessuh. De ma-an wif the plug hat he tried dat."
"No, suh. De ma-an ain't much hult. His nose hit's busted."

"Yessuh. I done dat."
"No, suh. De 'il' boy he ain't hult none a-tail; jee' jolted."

"Yessuh. De schoolteecher. Hit to his close up some."
"Fire? Yessuh. Not much; no, suh. He moved a little bit, yessuh."

"Yessuh. One o' de wheels was burst a little."
"Two o' de wheels—yessuh. Well, suh. De wagin hit burned up. No, suh. De wagin' nuffin' left."

"De mule? Yessuh."
"He's dah yit—yessuh."—Galveston News.

Olden Time "Raiment."

In early Bible days richly embroidered raiment was enumerated with the gold, silver and other valuable property of a rich man. In that primitive age Dame Fashion was not the Sickle goddess she is at present, and the "raiment" so frequently mentioned in the Holy Scriptures descended from father to son as a valuable part of the inheritance. Raiment was of ten sent, with gold and gems, as a present to dignitaries. It took not months, but years, to ornament some of these garments, and the gold thread so lavishly used in embroidering them was real gold. Moses describes the process of making the gold thread that was used in ornamenting the tabernacle. The habit of making presents of rare needlework is still common among eastern nations that changed their customs so slowly.

Weeping Trees.

The phenomenon of "weeping trees"—that is, of trees shedding drops of liquid—is ascribed by Dr. Sharp in the Cambridge Natural History to the influence of plant bugs. The familiar frog hopper which produces the so called cuckoo spit on so many of our plants belongs to this family of insects. A note in the London Field calls attention to some interesting observations on this subject made by Dr. Annandale and contributed by him to the records of the Indian museum. Dr. Annandale while collecting insects in western Bengal felt what he thought was rain from a clear sky through the foliage of the trees. On investigation he found that it fell from the leaves and was due to a species of plant bug present in enormous numbers.

An Impostor.

"Mebbe you'd like to put a piece about me in yer paper," quavered the old man, hobbling up to the city editor's desk.
"What have you done?" demanded the arbiter of publicity's destiny.
"Nothin' much, but I was a hundred years old yesterday."
"A hundred, eh? But can you walk without a stick and read fine print without glasses?"
"N-no."
"You are an impostor!"
The old man broke down and confessed he was only ninety-seven.—Cleveland Leader.

His Luck.

Tom—I wish that I had Alfred's good luck. Dick—So he's generally lucky? Tom—Lucky! If he walked out of the window in his sleep at dead of night there would be another man going by below carrying a feather bed.

NOTICE FOR PUBLICATION.
Department of the Interior,
U. S. Land Office at The Dalles, Or.,
September 19, 1910.

Notice is hereby given that—
Anna B. Markel, whose postoffice address is Bend, Oregon, did, on the 5th day of February, 1910, file in this office her Statement and Application, No. 4947, to purchase the NW 1/4 Sec. 30, T. 17 S., R. 12 E., W. M., and the timber thereon, under the provisions of the act of June 3, 1878, and acts amendatory, known as the "Timber and Stone Law," at such value as might be fixed by appraisal, and that, pursuant to such application, the land and timber thereon have been appraised, the timber estimated 10,000 board feet, at \$1.50 per M, and the land \$4.14; that said applicant will offer final proof in support of her application and sworn statement on the 5th day of December, 1910, before H. C. Ellis, U. S. Commissioner, at his office at Bend, Oregon.
Any person is at liberty to protest this purchase before entry, or initiate a contest at any time before patent issues, by filing a corroborated affidavit in this office, alleging facts which would defeat the entry.
