**THE IRRIGATION FUNDS.**

Of the \$45,000,000 irrigation fund distributed by President Taft recently, Oregon is to receive \$925,000. The apportionment of this large fund was based on the recommendations of the Army Board, but the personal influence of certain Senators is to be seen in the division of the fund.

Senator Borah of Idaho, whose untiring work aided very materially in securing the special \$20,000,000 fund, secured \$6,585,435 to complete the Payette-Boise project, and \$528,000 to complete the Minidoka project. Senators Carter and Dixon, of Montana, secured approximately \$8,000,000 for the three projects they were interested in. The Rio Grande project, partly in Mexico and partly in Texas is to receive \$7,000,000, and neither contributed to the reclamation fund.

Oregon contributes to the reclamation fund \$8,000,000 to \$9,000,000 and gets back, including 2,475,000 already expended, \$3,400,000. Idaho contributes \$3,500,000 and takes out \$14,000,000. It is time that the people of Oregon wake up to the fact that it pays to send to Washington Senators who do not spend their time "talking over old times." Senator Chamberlain is in Mississippi now, and Senator Burne is chasing a gutta serena ball over Georgia with a crooked stick at the present time.

The school record for December shows that seven pupils in the Bend high school were responsible for 80 per cent of the tardiness, and 70 per cent of the absences of the high school, which had an average enrollment of a little more than 22. The school board proposes to take summary action in these cases, as Principal Harrington has not been able to secure the co-operation of the pupil's parents, even to the extent of receiving excuses. It is to be hoped that the board will either remedy this condition or drop the delinquent students from the school.

For some time past different persons have been guilty of discharging firearms at night in and near Bend. Who the culprits are is probably known to but few. Even if it isn't within the police powers of the city authorities to prevent the carrying of weapons, it is a vested right to prevent the discharging of weapons. A grain of precaution is worth many pounds of cure, and unless the nuisance is abated, some innocent person will be injured by stray bullets.

Woodrow Wilson, governor of New Jersey, seems determined to overthrow the interests which seek control of both parties. The following extract from a recent speech made by him in the senatorial fight shows his attitude very clearly.

"It is not a dangerous or capital operation to cut off a wart. The thing can be done while you wait, and is being done. The clinic is open and every man can witness the operation. When any organization sets itself above the party which it undertakes to serve, or would have you believe that it pretends to serve, then it is time for the operation; the wart must be removed."

The Government is taking considerable interest in the aviation meet which is being held in San Francisco this week. The new telephone and telegraph apparatus will be officially tested for the first time in aeroplanes, and scouts will be sent over to the Pesidio grounds to make sketches and send descriptions of the forts by wireless. Target shooting at balloons will also be tried.

Representative Hopkins of Pennsylvania recently sold his 40,000-acre timber tract between Ashland and Klamath Falls for \$3,500,000. Bend has thousands of acres of equally good timber which will have to be milled near here, and when such operations begin, Bend will undoubtedly be the purchas-

ing point for the large crews of millmen.

The \$12,000 fund secured by the Eugene Commercial club for publicity work in 1910 proved to be an excellent expenditure, as 3000 people were brought to Eugene and Lane county during the past year.

We will in all probability hear a great deal more about Conservation of resources when Roosevelt arrives in Portland next Spring.

Now that Speaker Cannon has learned that he is the sole heir to an estate valued at \$2,500,000 will he quit the political game?
