

# SETTLERS BUILD

## JUNIPER VALLEY IS RAPIDLY SETTLED UP.

Lumber for Five New Cabins Left Bend Saturday. Clearing of Land Progresses and Many will Have Spring Crops In.

The country to the south east of Bend, often referred to as the "High Desert" is being settled up more rapidly than people realize. Within the past three months more than 30 homesteader's cabins have been built within a radius of ten miles. Last Saturday freighters left here with lumber for five more homes.

The locality that is being settled most rapidly now is Juniper Valley, 12 miles east of Millican's ranch and about 44 miles from Bend. The lumber that was taken from Bend Saturday will be used in building cabins for Fred Schuck, Frank Schuck, Christiana Schuck, Albert Couch and Ralph Jordan, each of whom has a 320 acre homestead.

Louis Radcliffe formerly of Bend, is now digging a well on his place, 10 miles southeast of Millican's. Stevenson, whose claim is 12 miles southeast of Millican's ranch and 2 miles beyond the Radcliffe place, has the deepest well in that locality, 50 feet. On the Edward Wade place a good supply of water was secured at 12 feet. Practically all of the homesteaders are making arrangements to sink wells in the near future.

There has been but little clearing done, and consequently practically no winter wheat was put in. However many of the newcomers will have their land in shape to put in spring crops. From every prominent hill one can see the clearing work being carried on.

## FAMOUS STAR GROUP.

The Constellation Orion in Legend and Literature.

The constellation Orion is mentioned in the literature of all ages. In Egypt it represented Horus, the young or rising sun, in a boat surmounted by stars, closely followed by Sirius, which was shown as a cow. It has also been found sculptured on the walls of Thebes 3,000 years ago. And on the men of that early time it shone down from the same position and with the same brightness as it does on us today, a striking example of the unchangeableness of the heavens.

From the days of the early Hindus to the present the constellation has for some reason borne always a stormy character. Allusions to its direful influence are found everywhere among the classic writers. Thus Milton wrote:

When with fierce winds Orion arrived Hath vexed the Red sea coast.

The loss of the Roman squadron in the first Punic war was ascribed to the fleets having sailed just after the rising of Orion. The group has also been employed as a calendar sign, its morning rising indicating the beginning of summer, its midnight rising the season of grape gathering and its early evening rising the arrival of winter, with its attendant storms. In recent times the group has always represented a great hunter or warrior. Its present title came into Greek astronomy from the Euphrates and originally signified the light of heaven.

## BABY TURTLES.

They Know Just What to Do and Do It Without Guidance.

Just so soon as a baby turtle emerges from the egg off he scuttles down to the sea. He has no one to teach him, no one to guide him. In his curious little brain there is implanted a streak of caution based upon the fact that until a certain period in his life his armor is soft and no defense against hungry fish, and he at once seeks the shelter in the tropical profusion of the gulf weed, which holds within its branching fronds an astonishing abundance of marine life. Here the young turtle feeds unmolested while his armor undergoes the hardening process.

Whatever the young sea turtle eats and wherever he eats it—facts not generally ascertained—one thing is certain, it agrees with him immensely. He leads a pleasant sort of life, basking in the tropical sun and cruising leisurely in the cool depths. Once he has attained the weight of twenty-five pounds, which usually occurs within the first year, the turtle is free from all danger. After that no fish or mammal, however ravenous, however well armed with teeth, interferes with the turtle.

When once he has withdrawn his head from its position of outlook into the folds of his neck between the two shells intending devourers may struggle in vain to make an impression upon him.—Harper's Weekly.

## A GASTRONOMIC JOY.

Old English Recipe for the Famous Soupe a la Crecy.

In the "Illustrated London Cookery Book," by Frederick Bishop, late culinarian to St. James' palace, Earl Grey, the Marquis of Stafford, Baron Rothschild, Earl Norbury, Captain Duncombe and many of the first families of Great Britain (1832), we find this recipe for soupe a la Crecy:

"Cut half a pound of lean ham in dice, three onions, four turnips, twelve carrots (the outer side red only), a head of celery, a fagot of sweet herbs, two blades of mace, six cloves, a bay leaf and half a pound of salt butter. Fry all down in a stewpan until they get a little brown; then add some second stock and stew until all the roots are quite tender; then rub it through a tammy sieve or tammy cloth with two long spoons. If very thick add more stock. Season with cayenne and black pepper and salt and a good bit of sugar. Send up on a napkin some nice fried bread cut in small dice and not greasy."

This is far less elaborate than it sounds and is, indeed, in the main the recognized recipe for the royal soup. The spice is, if anything, a trifle overdone, and the carrots want to be well chosen, as the slightest stringiness destroys the homogeneity of the compound. The bread dice are important and should be fried in the very best butter or superlatively good olive oil.—Fall Mall Gazette.

## CORDITE.

Made of Two Powerful Explosives Kneaded into Paste.

Cordite is the outcome of the strange paradox that if you mix together two powerful explosives the result is a smokeless slow burning powder. Nitroglycerin and gun cotton mixed together with a little petroleum jelly make cordite. It is curious to see the two deadly explosives being kneaded together into a paste by women with the same unconcern as dough is kneaded for bread. Indeed, machines similar to those used in bakeries take up the work and knead the buff colored cordite paste for seven hours. Then it is forced through molds and issues in long cords—hence the name cordite—the thickness of which is varied according to the weapon in which it is to be used.

For big guns cordite is half an inch thick and cut into lengths of thirty-seven inches. Rather more than a thousand of these cordite sticks packed in two bundles make up the cartridge for a twelve inch gun. For the rifle cordite is pressed into a very thin string, like the finest macaroni, and sixty of these strands one inch and a half long make the neat little bundle which lies inside the cartridge case. For some European armies cordite is made in flat thin strips like whalebone. Kept away from fire, cordite can be handled with impunity.—London Graphic.

## Mountains of Moab.

Most travelers who visit the Holy Land content themselves with a visit to that restricted part west of Jordan. The mountainous regions of Moab as seen by them from Jerusalem are lost in a purple haze that constantly hangs over them, and the great stretches beyond are covered in mystery. This is true partly because of the fewer historical incidents connected with the eastern regions, but mainly on account of the great abyss of the Jordan valley that has always acted as a barrier. Few who descend into the valley 1,300 feet below sea level undertake to climb the hills beyond, which rise to a height of 3,000 feet. Though its glory is far outshone by that of western Palestine, still, both in the old and the new dispensations, it has a history of its own and from an economic standpoint will always enter very largely into the life of Palestine.—Christian Herald.

Victor Hugo's Doubts. Victor Hugo had a real double in flesh and blood, who exploited his physical resemblance to the man of genius. He cut his beard like Hugo's, copied the master's dress in its smallest details and so for eighteen years divided with the master the admiration of the public. His especial delight was to pose in a poetical attitude in front of a Punch and Judy show. He did this at a particular spot every Thursday afternoon for years, thoroughly enjoying the murmurs of curiosity and applause proceeding from the gaping crowd which he deceived. We do not hear that he reaped any other reward but his pleasure.

## Didn't Like the Suit.

"Sir," said the young man as he entered the library for the purpose of interviewing the father of the only girl. "I am in love with your daughter. Have you any objection to my suit?"

The old man looked the y. m. over from head to foot. "I sure have," he replied. "Why, I wouldn't wear a misfit suit like that to a dog fight. Why don't you try some other tailor?"—Chicago News

## From His Pa's Side.

"She doesn't know where the baby gets his bad temper."

"That's strange. Most young mothers can place that sort of responsibility in a jiffy."—Louisville Courier-Journal.

## Another Definition.

Little Willie—Say, pa, what is a coquette? Pa—A coquette, my son, is a girl who gets more admiration than proposals.—Exchange.

Anger begins in folly and ends in repentance.—Pythagoras.
