

"Clear Your Shelves OF SUMMER GOODS" ALL

---I told Mr. Bennett yesterday that August 15th was the time limit on all Summer Goods---that he had to make room for his Fall and Winter Goods. He asked me what profit I wanted on the goods and I told him that I wanted the room on the shelves, not the profit. He brought me a list of a few items as a sample of the prices he wanted to put on the entire line and when I saw the prices he had made I realized that he had followed instructions to the letter---he certainly had forgotten all about profits. He said "If these prices dont move the goods we had better put them out in the warehouse until next spring."
I don't believe we will have any to put away.

IMPROVING MILL

SIDING SAW IS PURCHASED

Lath Making Plant Added to Equipment of Bend Company's Saw Mill—Plan to Manufacture Five Million Feet of Lumber for Yard.

C. M. McKay, manager of the lumber department of The Bend Company, went to Portland Friday to arrange for the purchase of a siding saw, which will be installed in the company's mill as soon as possible. This will enable the local mill to turn out the best of siding.

Another important addition to the mill's equipment is a lath-making plant, most of the machinery for which already is on the ground. As soon as this can be put in operation the company will be able to turn out 30,000 lath a day, says Mr. McKay.

Extensive logging is being conducted; for the present, while the river is somewhat low, all logs being brought to a point just above the mill pond on trucks. The crew in woods and mill numbers about 70 men, and the mill is sawing about 30,000 feet a day. Approximately one million feet of lumber is on hand in the yards, and it is the company's intention, according to General Manager Averill, to accumulate at least five-million feet of seasoned lumber, some of which, probably, will be shipped to eastern markets.

The Bend Water, Light & Power Company has published its schedule of prices for day current.
