FIRES HARMFUL

SAYS SUPERVISOR

Statistics Explode Theory That Surface Burnings in Timber are Not Detrimental-Careful Examination Made by Foresters of Fires!

Supervisor J. Roy Harvey of the local forestry office has submitted compiled figures of interest on the damage done merchantable timber by surface fires. It has been stated by casual observers that such fires in which they live disease is rampant Mr. Harvey shows that this theory 000 people of the depressed classes are is erroneous.

Careful examination of the condition of trees affected by fire in seven different communities showed that from 22 to 40 per cent of them were fire-scarred and that the average surface fire kills from 3 to 14 per cent of the merchantable trees chiefly by gnawing through their butts.

In summing up the result of his man. investigations, Supervisor Harvey

The lesson which this study touches is When Intensely Cold Air is Breathed that all surface fires, no matter how gentle and harmless they appear to be, (if of sufficient area) always, (i) Kill a certain amount of merchant-

(2) Damage much of the merchantable imper that survives so that its commeral value is lessened, both in direct and

indirect ways.

(3) Kill off much of the young growth, which should be the basis for the nest crop. (4) Exert an unfavorable influence on the forbst soil, thereby decreasing its

productive capacity.

These being the facts, it follows protected, clearly that fires should be absolutely prevented in all types of standing thon must

LEPROSY IN INDIA.

The "Untouchables" Reach the Lowest Depths of Human Wos.

The "untouchables" of India reside in little buts made of point leaves or TIMBER DAMAGED med. without windows, and with a single dearway, usually so small that even a child maps stoop in order to enter it, containing absolutely no furniture, except a few rudely baked earthen pots and perse.

tienerally there is no bedstead of any kind, the whole family sleeping huddled up on the bare dirt floor, which is commonly plastered with cow dung. A few rags cover their persons and these are worn picht and day. Their fluancial condition precludes enting more than one ment a day, and this oftener than not is for from hunger appensing and is seldom calculated to appeal to the palate. For this wretched existence they must work hard and long bours.

On account of the flithy condition were not particularly harmful, but among them. According to the last afflicted with isprosy. In the matter of education they are as deficient as they are in every other virtue. According to the report of the director general of public instruction of Bommy, barely five out of 1,000 of the parish children of the presidency of school going age attend school.

In one word, these fifty-three odd millions of Hindus are not only socially but also intellectually, physically, financially and morally submerged. Saint Nihal Singh in Southern Work

FREEZES THE LUNGS.

in Through the Mouth.

"I asked an Alaskan ploneer who was crossing to his old home in Sweden what happened when the thermometer goes down to 60 and 80 degrees below zero," said a Seattle man. "At 60 degrees below," he said, "the exposed ears, bands or nose will freeze in going a quarter of a mile under ordinary circumstances, but the children go to and come from school as usual without suffering from the cold. provided their faces and hands are

"They soon get used to it. But caution must be used to avoid drawing the cold air into the lungs, and it is dangerous to breathe through the mouth More die from pneumonia brought on by freezing the lungs in that way than from any other form of exposure. Herses are protected by breathing bugs, which extend down from the nose of the animal about eighteen inches and are open at the bortom The breath which is exhaled warms the air in the bag before it is inhaled and drawn into the lungs. And men wear a 'parky' or headdress which extends over the face and affords similar

protection. "In the Canadian districts the northwest mounted police regulate the treatment of borses on the freight wagons and stage lines in a most bumane manner, so as to prevent them from suffering in this way."-Washington Heraid.

Slavery In Scottish Mines. Slavery (ingered in the Scottish mine until the very eve of the nineteenth century. Mr. Hackwood, in The Good Old Times," draws a pleture of the Scottish miner's unhappy lot in the past; "From about the year 1445 until 1775 the miners of Scotland were bought and sold with the soil. It is stated in old chronicles that ounds were kept to trace them if they left their employment and to ald in bringing them back. By statute inw miners were bound to work all days in the year except Paschal and Yule, and if they did not work they were to be 'whipped in the bodies for the glory of God and for the good of their masters.' Not until 1775 was the first law passed in an attempt to better this state of things, but it was 1700 ere the law gave the working miner of Scotland his complete freedom."-Lon-

The Word "Terse." "Terse" is a word that has an understood meaning nowadays. Shadwell in the fourth act of "The Humorists" (1671) put this question into the mouth of one of his characters; "Must I stay till by the strength of terse chiret you have wet yourself into courage?" It is probably an allusion to what is still sometimes called "Dutch courage"bravery inspired by alcohol. Claret was in those times imported in "tierces," and "terse" may be a condensed form of that word; also "terse cinret" may have been a drink that did its business without any circumlocution, like the terse speaker or writer.

don Chronicle.

Circular Plates. All our plates are circular in shape. Now, a square or oval plate would be just as convenient. Is there any reason why plates should be of their present shape? It seems that if we dip into the far past we may discover the cause. Our remote ancestors ate their 1 od off flat pieces of wood cut from a tree trunk. The tree trunk being cylindrical in shape, the earliest plates were therefore roughly circular, and the shape has been used ever since.
