

# Our Store Is Your Store.

If we have made a success of our store it is because YOU have given us YOUR BUSINESS.

We have tried to give YOU the right kind of a store, but we could not have done so without your help. We appreciate this help and we want you to feel that OUR STORE is YOUR STORE---that you helped make it what it is today. If you can suggest any change that you think would be for the better we would certainly appreciate it if you would tell us about it.

Our ambition is to make this store the one place where you will want to do all your trading, the one place that you will recommend to your friends and neighbors, the one place where you are absolutely sure of a square deal at all times, the one place that guarantees you satisfaction or your money back with a smile thrown in.

If you will drop us a line and suggest some improvement in our store, in our service or in our stock, we will sincerely thank you.

## NEEDS OF A RICH MAN'S WIFE.

\$67 a Day the Least Mrs. Hutchins Can Spend—Gets \$2,500 a Month.

Mrs. Rose Keeling Hutchins of Washington fixed \$67 a day as the lowest figure on which a millionaire's wife could live properly. This figure was arrived at when Mrs. Hutchins petitioned the equity court for consent to utilize her \$1,000 a month allowance for "pin money." She insisted that the allowance made by her invalid husband was altogether too small to meet her expenses and submitted an itemized table of expenditures to prove her contention. The principal items for the month are:

Servants, \$242; auto, livery and chauffeur, \$275; milk, \$50; marketing, groceries and wine, \$350; jew rent, \$10; music, \$15; confectionery, \$5; charity, \$15; theater tickets, \$10; summer club dues, \$5; silver insurance, \$8; massage, \$5; drugs and toilet articles, \$20; flowers, \$15; cleaning clothes, \$20; physicians, \$25; dentist, \$5; traveling, \$50; clothing for Mrs. Hutchins, \$300; rent summer cottage, \$110; rent Paris apartment, \$110; taxes on Paris apartment, \$15; books, \$2; miscellaneous, \$30; total, \$2,012.

In view of this documentary evidence it was recommended by Louis A. Dent, auditor of the District supreme court, that the allowance be increased to \$2,500 a month, but with the injunction that Mrs. Hutchins meet all household expenditures, including the medical expenses attendant on her husband's illness.

## CHEROKEE INDIANS SUE.

Want \$25,000,000 From Uncle Sam For Lands Wrongfully Taken.

The full blood Cherokee Indians are reporting to investigate a suit against the United States government for \$25,000,000. That sum the Cherokees say is due them for property rights and money displaced by the government and paid to whites and negroes who were not Cherokees in the last 100 years.

The leader of the movement is Mrs. Susan Saunders of St. Louis, a three-quarter blood Cherokee, sixty-six years old and blind. In the action the majority of the more progressive of the Cherokees take no part, being convinced that the suit will be in vain.

The principal claim of the Indians is for land in the Cherokee nation which has been allotted to negroes known as freedmen and to the whites who have married into the tribe. There are 4,000 negroes who have been given allotments in the Cherokee nation.

When the Cherokees went to the Indian Territory from Georgia in 1833 to 1836 they took many negro slaves with them. These they kept the same as white slave owners until the close of the civil war. At the time of the war most of the Cherokees joined the Confederacy, and when the emancipation of the slaves was declared the government decreed that the status of the Indians should not only be preserved, but should share in all the tributes of the nation.

## BEND GROWING FAST.

Is Bend growing? The teachers of the local school think so, basing their belief on the number of new pupils entering school each week. Monday morning 12 reported to be assigned to classes, and Supt. Shouse had to make a run on the furniture stores for chairs to seat them. During the last four weeks 33 new pupils have enrolled at the Bend school. Many new families are coming here each week to make their homes, and still they come, from every part of the United States.

## OTHERS ADOPT PLAN

C. S. Hudson's Idea of Furnishing Hogs to Farmers Endorsed By Breeders

The idea which originated with C. S. Hudson of having the First National Bank place brood sows with farmers, taking their notes for the hogs, not only met with much favor among the Crook county ranchers, but has attracted attention throughout the state. At a recent meeting of the Oregon Pure Bred Association, a resolution was adopted commending the plan and urging that it be carried out by other Oregon bankers. The resolution, in part, reads:

"Resolved, That this association give its fullest support to the furnishing of breeding sows to farmers throughout the state, and whereas we fully endorse the offer made by the First National Bank of Bend, Oregon, in which they offer to furnish breeding sows to their community at cost, taking their note for same at one year, giving the farmer time to turn the hogs into money before note matures, and we request that this association advise each of its members of this offer with the recommendation that they ask their own local banker to make the same offer."

FOUR BARBERS (every one skilled) now required to serve the many patrons of the Innes & Davidson barbershop. You'd better join the throng of pleased clients of this shop.

## SCHOOL DOINGS

### INTERESTING PROGRAM GIVEN FRIDAY

Two Literary Societies May Be Formed in High School—Boys Practice in Handling Fire Apparatus, Getting Water Turned on in One Minute

Friday afternoon was held the third program in the Bend High School and was well rendered. The following students took part:

Declamation, Loyd Kelley; essay, "Boy Scouts of America," Ruth Caldwell; book review, Ethel Spinning; recitation, Fay Deyarmond; short story, Clarence Sather; discussion, "Will the population of Bend ever exceed 5000?" yes, Hazel Thorsen, no, Arthur Vandeventer.

There has been some talk of forming two literary societies in the High School. If this should be done, the two would alternate in giving programs and have an average of two a month.

Last Wednesday, during the morning recess, was held a hose buckling contest. It took the boys a little over a minute to fasten the hose together and have the water turned on. This is good practice for the boys for, should the school-house catch fire, it would be some time before the department could appear on the scene.

### Plants and Frost.

A Swedish botanist has propounded a new theory to explain the killing action of frost on plants as well as the fact that certain plants escape damage when others are destroyed. He observed that such plants as cerastium and viola, which survive the severe winters of Sweden, have the starch in their leaves repaired during the cold season by sugar. He then found that in plants which do not possess this peculiarity ice is formed in the interstices between the cells and the water is withdrawn from the cell sap. When the water is extracted the proteins in the cells pass out of solution with disastrous effects. But if sugar is present the proteins remain in solution until a much lower temperature is reached.
