When Liszt Met Dieks.

A Paris contemporary relates an interesting story of Liszt. The great pianist was living in a little German town when Dieks, the Norwegian painter, went to reside at the same place, thinking he would be able to work there without interruptions. He had been installed in his new quarters only one day when he made the pianist's acquaintance. The painter had been trying his art for about two hours, and then he gave up in despair. He went outside, and at the same time Liszt came out for a breath of fresh air.

The painter addressed the pianist, and this dialogue ensued: "Are you the pianist, monsieur, whom I have heard all day?" "Yes, monsieur." "It is very irritating." "Alas, monsieur, you do not love music?" "I detest it." "It is very regrettable, but I must practice." "But you disturb me in my work."

An Invitation

YOUR attention is especially directed to our excellent line of Christmas Goods, which we now have on display. And nothing would give us more pleasure than to have you step into our store and look over our extensive showing of beautiful Holiday Goods. This invitation is cordially extended to you whether you wish to buy or not.

That you can find gifts here for every member of the family, we particularly emphasize. We have made a careful selection of gift goods and you can find satisfactory presents for any member of the family—from father and mother down to the youngest tot. We know you will find satisfaction when you do your Christmas buying here.

Come in, anyway, and see what we have. Last Saturday at our Christmas opening, we were swamped with a rush of buyers that far exceeded our expectations. Come in again when the store is less crowded and give our line a more careful examination.

Moreover, you play atrociously." "Ah, you think so? It is the first time any one has ever told me so." "Judging from your age, there have been many opportunities," was the painter's answer. Then there was silence for a moment. Liszt, going indoors, contented himself with the observation, "My name is Liszt."

Nature's Parachutes.

Careful examination has been made of the heads of Canada thistle-downs in order to determine their effectiveness as parachutes carrying the seeds of the plant to great distances through the air. The results of this examination are quite remarkable. Calculation shows that a thistle-down starting from an elevation of twenty feet in still air would require two-thirds of a minute to reach the ground. With a wind blowing twenty miles an hour it would be carried on the average about a fifth of a mile. The total surface exposed to the air in an average thistle-down is, on account of the great

number of hairlets, a little more than one-third of a square foot. Another well-known and very beautiful example of nature's parachutes is furnished by the light silken threads with the aid of which the little gossamer spider makes long aerial voyages.—Scientific American.

Thoughtful Painter.
"I see you are paying the hospital expenses of that painter who fell off the roof."

"Yes. He's too good a man to lose. As he went down he touched up two or three places which would have been very hard to reach."—Louisville Courier-Journal.

Where It Hurts.
"I tell you," said Sinner, "men are getting so deceitful these days that you can't trust your best friends."
"And what's worse," interrupted Boroughs gloomily, "you can't get your best friends to trust you."—Catholic Standard and Times.
