WOOD PIPE FOR IRRIGATION

C. D. Rowe Will Use 1400 Feet to
Convey Water to Tract of Land.
Wood pipe water mains to get
water onto his land is the latest
method of irrigation at Bend. This
is the system adopted by C. D. Rowe
to carry water across a ravine to re-
claim 70 acres under the Arnold
ditch. The land is six miles south-
east of town, and 25 acres will be
under cultivation this year.
Fourteen hundred feet of 8-inch
pipe will be used. The pipe will be
laid underground over a gulch, which
would have required a flume 26 feet
high had that method of conveying
the water been adopted. The wood-
pipe was found to be cheaper and
more lasting.

The Beauty of KRYPTOK LENSES

Why Look Older
Than You Are?

DOUBLE-vision glasses need
not make one look older, or
cause embarrassment by being
conspicuous. Kryptok Lenses
comprise near view and far view lenses in an integral
piece of glass. They have an absolutely smooth
surface, and are entirely free from the seams,
dirt-catching lines, cement and bulky appearance
characteristic of old style pasted double-vision lenses.

Kryptok Lenses are good looking. They have the great advan-
tage of perfect vision for both distance and reading, coupled with
the neat appearance of single-vision glasses. In no way do the
suggest advancing years.

Over 200,000 people are now wearing Kryptok Lenses
