## DE LAVAL CREAM SEPARATORS

The World's Standard Used Exclusively by 98% of World's Creameries

Ten years ago there were a dozen different makes of creamery or factory separators in use. To-day over 98 per cent of the world's creameries use De Laval separators exclusively.

When it comes to buying a separator why not profit by the experience of the creameryman, which qualifies him to advise you correctly.

He knows which separator will give you the best service and be the most economical for you to buy. That's why 98 per cent of the world's creameries use the De Laval exclusively.

There can be no better recommendation for the De Laval than the fact that the men who make the separation of milk a business use the De Laval to the practical exclusion of all other makes. They know from experience.

Easiest to turn, easiest to wash, skims the cleanest last: the longest.

SOONER OR LATER YOU WILL BUY A DE LAVAL
