

40 PAGES FOR BIG "SPECIAL"

TO PRINT 7,000 COPIES
OF EDITION

Fourth of July Development Number
of The Bulletin Gains Size as
Plans Mature—Will Devote At-
tention to all Sections.

Thanks to a most gratifying support on the part of advertisers, and to the great extent of the field which the editors hope to cover, it has been found necessary to enlarge the plans for The Bulletin's special Development Number which will appear on July 4th.

Instead of containing 36 pages, as announced last week, the big edition will have 40 pages, while the issue will be increased from 6,000 to 7,000.

One feature of the number which is especially called to attention is that the "special" will not be devoted exclusively to "boosting" Bend. All The Bulletin's correspondents have been requested to furnish brief articles concerning their sections. The La Pine Commercial Club and the irrigation interests there have been asked to supply complete "stories" regarding their country, town and project. Similar requests have been sent to Laidlaw and Sisters. The general agricultural section will attempt to do full justice to every section of the adjacent territory.

Important to Act Soon.

As an advertising medium it is generally conceded that the Development Number will be the best thing ever published in Central Oregon, and in this connection it is important that would-be advertisers remember that to get preferred positions it is necessary to make reservations at once. Also, anyone wishing to secure a large number of copies will do well to file his or her order as soon as possible. For it is necessary to get some of the five sections of the paper printed and folded at a very early date, and after these have been run off it will be impossible to increase the size of the edition. Already a surprisingly large num-

ber of people have asked for "reader" advertising space, realizing that a few lines of ad telling what they have to sell, exchange, or wish to buy, will be read by thousands of interested people all over the Northwest.

WATER FOR 8000 ACRES.

The Central Oregon Irrigation company has completed placing a large stave pipe flume across the canyon separating the Terrebonne district from the Redmond district. The pipe is 30 inches in diameter and nearly one-half mile long. It will carry water sufficient to irrigate 8000 acres, most of which has already been filed on by settlers under the Carey act. The residents of the Terrebonne district are planning a celebration in appreciation of this event.

WEST DENIES MORSON CHARGE

Governor Says Right of Way for La Pine Company is Necessary.

SALEM, May 23.—At the request of Governor West, the desert land board has instructed its secretary to write the Secretary of the Interior Washington, D. C., to hasten the granting of a right-of-way to the Deschutes Land Company for its reservoir site at Crescent Lake.

Denying the statements of J. E. Morson, president of the Deschutes Land Company, that a letter written by the Governor to the Secretary of the Interior was responsible for the Government holding up the right-of-way, Governor West said today that in his communication he never mentioned that the question of a right-of-way should be interfered with, but that he was in favor of the company having it.

"This question has no bearing on the points of difference between Morson and myself," said the Governor. "A right-of-way is essential if the work is to be carried out in the La Pine irrigation project—whether it be carried out by Morson's company or not. If it happens that the Deschutes Land Company is put out of business, it will be as necessary for a new company taking up the work to have the right-of-way as it is for Morson's company to have it, and as I want to see the project carried through it is absurd to think that I, in any way, attempted to block the securing of a reservoir site."

INSTALLS ELECTRIC MOTOR

The Bulletin Gets Best to Be Had in Power Equipment.

The Bulletin has installed a five horse-power electric motor, to replace its gasoline engine. With this

La Pine, Crook County, Oregon.

addition, the shop is furnished with the very best of modern power equipment, capable of driving the three presses at once, while a separate motor supplies power for the linotype. Other additions to the plant, including a large new imposing stone and many fonts of job and advertising type, plus extensive purchases in papers, fits the office to care for every possible local demand, to the very best advantage.

The gasoline engine, a Fairbanks-Morse, 2 horse-power, is for sale. It is as good as new, and was replaced only because its power capacity was outgrown by the needs of the shop, and to economize space. It can be had for half the original cost.

MASONS TO MEET.

There will be an important meeting tomorrow (Thursday) evening of the Bend Lodge of Masons. A large delegation from Redmond is expected. There will be work in the M. M. degree.

AMONG THE SETTLERS NORTHEAST OF TOWN

The farewell dance given at the Grange Hall May 25 in honor of Mrs. O. Moen and Miss Anna Moen, by C. R. Lowe, was a big success in spite of the rain. There were about 50 persons present. The Moens are leaving Saturday for Washington state to be gone most of the summer.

The school children of this community gave their closing exercises on Monday. They were well attended.

FOR SALE—Cabbage plants, any quantity. E. D. Havemann, R. F. D. No. 1, Bend. 12-13p
