Nature's Carvings.

There is a rock profile to be seen on Mount Wilson, California, which is more striking than the famous formation in the White mountains, although the former is said by some to be the most perfect of all of "nature's carvings." The features are strong and full of expression and the contour of the head of correct proportions, the forehead lofty, the eyebrows jutting, and the aquiline nose is exceedingly vigorous. The mouth is hard and set, but complete in detail, and even the line from the nostril to the corner of the mouth and the rugged modeling of the cheek are distinctly marked. The chin and jaw are correctly sculptured, and even the line of the high collar and old fashioned coat may be seen on this remarkable bowlder.

The Bananas.

The banana plant bears fruit every year. It is one of the most productive plants in the world and feeds more people than any other known to man. It has been estimated that more than a third of the human race depend at most wholly for their existence upon the banana. That the fruit is amply able to sustain life, and to sustain it in a very satisfactory manner, is demonstrated by the fact that the millions who live on practically nothing else get along very well with it and appear to be as strong and active as those who live on other kinds of food.

The Piano Case.

To restore polish on a piano case first dust it with a dry, soft cloth, then dip a piece of chamois skin of good size in clear, cold water and wring as dry as possible, rub over the piano with this and if the skin becomes soiled rinse well and use again, always wringing as clear of water as possible each time. When it is clean polish with a soft dry skin.

An Improvement.

Economy of Dairying.

Dairy farming gives returns three-fold—first, the cash return from the product; second, by larger crops as a result of the returns of the manure to the soil, and, third, through the increased value of the land as a result of the use of manure and the kind of crops grown for the feed of the cow. The dairy cow gives the most constant and uniform return throughout the year of all our live stock or, for that matter, any other branch of agriculture.
