If it's a Deere it's Right

JOHN DEERE
MOLINE, ILL.

Because its made right, by a force of skilled plow experts whose equal cannot be found in any other plow factory in the world. There are many different makes of plows, each claiming to be the best, yet the fact remains that three John Deere plows are in use to one of any other kind. The John Deere Factory, the largest in the world, turns out every year more plows than any five other factories combined.

Standard of the World For Over 60 Years

The Pioneer Plow Maker, John Deere, made his first steel plow by hand from the blade of a saw in 1837. The first slab of steel rolled in the United States was rolled for the John Deere plows by William Woods, of Pittsburg, in 1846. And ever since those early days Deere Plows have shown the way and maintained the lead in this great national industry. Is it any wonder that the farmers of the world express their verdict in the familiar phrase,—"If it's a Deere—it's Right."

We make over 1000 styles of plows, each as good as it can be made,—the best that brains and perfect equipment can produce. No matter what your needs may be, we can supply them from our line.

THE COMING Hog Center

All indications point toward Bend as the center of a profitable and extensive hog raising section. The climatic conditions of this section are ideal. Shipping facilities make rapid transportation at low cost possible. Farmers will do well to look into the hog raising business as it is a paying one.

Getting the largest profit out of a pig, requires simply proper feeding to develop the greatest amount of weight in the shortest time, on the most economical feed.

FOR THIS PURPOSE, FEED UNION MEAT COMPANY'S DIGESTER TANKAGE

Union Meat Company's Digester Tankage develops bone and muscle in young pigs, and makes them grow. It prevents rheumatism, thrumps and rickets. It imparts such fat and finish to "show" swine and market hogs that it has won the title, "The feed that makes Prize Winners and Market Toppers."

Union Meat Company's Digester Tankage is the most economical feed obtainable. Experiments have shown that \$1 worth of Digester Tankage puts more weight on a hog than \$1 worth of any other kind of food.

Digester Tankage is a concentrated Protein Meal. It is made from fresh, wholesome pieces of meat trimmed from beef. It is shipped in the form of a meal which makes it easily mixed in mash feeds. Shipped in convenient 100 pound sacks. Keeps indefinitely.

Digester Tankage has been tried and recommended and is now being used by best growers and authorities in the Northwest. It is becoming more popular every day. It will pay you to know more about it. Send at once for circular No. 49.

WHEAT AVERAGES 45 BUSHELS.
(Madras Pioneer.)

The report of several threshing machines has been had, and the maximum number of bushels per acre has varied from 30 to 40 bushels, however there seems to be one particular man in the Grizzly country that has reported the largest yield so far heard of this season. The Baldwin Sheep Co.'s machine reports that on the Robert Island place, there was threshed 450 bushels of forty fold wheat, or an average of 45 bushels to the acre. There has been a number of fields in this section that averaged 40 bushels, but the above mark seems to be the highest yet. The grain threshed on this tract, was of an excellent quality, and the highest market price has been offered for it.

SCHOOLS IN HAMPTON COUNTRY.

The new school house at Schreder's in Hampton valley was completed last week and "broken in" with a dance Saturday night. Monday school started. Lumber is being delivered for a school house at Hampton, near the postoffice.

ANNOUNCEMENT

MR. VOTER: As the regular Republican nominee for the office of County Surveyor of your county, I am asking your support in the coming contest. My only opponent is Fred A. Rice, present incumbent and independent candidate, who went into the primaries with me last spring stating that he was a candidate subject to the approval of the Republican voters of Crook county, and was beaten in a fair contest; but he now makes himself again a candidate in disregard of the direct primary law and of the wishes of his party. I am a civil engineer of six years' experience, including experience as deputy county surveyor of Crook county and of other counties in Oregon. I feel that I am competent to fill the position which I seek and am prepared to give it my fullest attention, keeping at all times a man at the office to advise the road petitioners and others who have business with the county surveyor.

Mr. Rice asks you to vote for him because he has presented the county with the present ownership book; also field notes of the entire county. Mr. Rice has not presented the county with anything. The county paid more than \$2000 for the present ownership map, of which Mr. Rice obtained a portion. It was made by persons working by the day at a cost of twice the amount of the lowest bid presented to the county court, which makes it plain why he desires a third term. Mr. Rice also received pay for all the field notes he furnished the county, and he has furnished only about half of them.

A more detailed statement will be printed on request, and the county records are open at all times for inspection in support of these statements.

Respectfully,
R. L. BREWSTER.
