SCHOOL NOTES

(Reported for The Bulletin.)

The last half hour of Friday was spent in singing in the High school. The seventh and eighth grades joined the High school in the songs. About ten little girls of the second grade from Miss Dolson's room came up and treated the higher classes to four very good songs.

Monday after school the B. H. S. Athletic Association elected new officers.

LESS BOWEL TROUBLE IN BEND. Bend people have found out that A SINGLE DOSE of simple buckthorn bark, glycerine, etc. as compounded in Adler's-ka, the German appendicitis remedy, relieves constipation, soothes stomach or gas on the stomach INSTANTLY. This simple mixture antiseptizes the digestive organs and draws off the impurities and it is surprising how quickly it holds. The Patterson Drug Co. (Advertisement)

THE ROSE COMB WHITE LEG-HORN.

Our Canadian swains up there where the zero winds whistle through their whiskers sure show some sense when they breed Rose Comb White Leghorns in quantities. For they are great winter layers, and that low rose comb can't freeze off like the tender points on the single comb, a condition that so often knocks the egg record.

and White Hamburg being used, thus the Rose Comb White, which is half Italian and half Dutch. At first the bird wasn't very popular, as it was small and had a big lunched comb that lopped over the eyes; but, coming from such remarkable laying ancestry on both sides, the new variety was bound to make good, and fancies soon began to set up and take notice that it was an egg phenomenon.

breeds are not the stock on the big egg points, Leghorns being bred almost exclusively. Of course the extreme is not so large, but it must be remembered that the Leghorn is an egg specialist. She makes a good profit for her owner without her carcass being considered, and it need to great size her laying ability is out down. Leghorns are not the butterfly birds they once were, the breeder of selection now trying to get his pullets to four and five pounds to see pounds at least, and for the graded fash these are not to be despised.

STEALING HORSES IN HARNEY. "Necktie Party" Suggested as Cure to Growing Habit of Rustlers. (Harney County News.)

There is evidently a chain of horse thieves operating scientifically through Malheur, Harney and Lake counties and into California. They work by relays, one fellow riding and driving 25 or 30 miles and turning the stolen animals over to another of the gang for a similar drive, and so on, so that the impression is now abroad that a good horse is hardly safe in this valley under lock and key.

FORT ROCK DOES WELL. (Silver Lake leader.) Fort Rock district threshed 6889 bushels of grain this season, a good showing for the first year; Lake had 2821 and Silver Lake 10,141 bushels; total, 19,861 bushels. At the present market value this would be something over \$29,000. For a country that until recently it was supposed no grain would grow and mature this looks very encouraging.
