**It will Be Ready in a Minute**

As a matter of fact this wonderful little disk stove is ready to cook in much less than one minute from the instant you turn the switch. And you can cook on it practically anything you wish.

It is, perhaps, the most convenient and useful of the great variety of electrical cooking devices now within the reach of all, not excepting those receiving the more modest incomes.

It represents the genius of the "Light House Keeping Age" now opening to us—banishing as with a fairy wand all the nuisances of smoke, soot, disagreeable odors, and tiresome delays.

You cannot fully appreciate its many virtues until you actually use it. Come in and cook on the fine little G-E stoves we carry in stock and learn a lesson in real convenience.

Or, better still, take one home to try.
