

SHOOT HIMSELF.

(Madras Pioneer.)

Driving his car with one hand and pulling a Mauser automatic pistol from its holster with the other, J. Touy, the Redmond auto driver, accidentally shot himself in the left leg last Sunday afternoon on the way home from the ball games at Shaniko and Antelope.

Stop the Loss—Fires are Unnecessary. Brick is absolutely fire proof in any ordinary conflagration. Brick Buildings never burn, although they are sometimes injured by falling timbers or combustible interior woodwork. A brick building is absolutely fire proof if wire glass is used in the windows and if burned clay floors are used. An interior fire in such a building is confined to the room in which it originates; no outside fire can attack it. The proportion of burned clay in a building construction measures its fire proof qualities. Burned clay is the only building material that has been through the fire before you get it, in such a manner that it will resist fire. All combustible material is burned out of the brick before you get it. WHEN YOU BUILD USE BRICK. The Bend Brick & Lumber Co.
