

SETTLERS PASS RESOLUTIONS

DEMAND LAND BOARD ACTION

Urge That Contracts, Which They Allege Are Unfulfilled, Be Cancelled, and no More Water Rights Sold.

At a meeting of the Water Users' Association held at Redmond Saturday morning the members of the Central Oregon Irrigation Company's Water Users' Association demand that the Desert Land Board forthwith compel the C. O. I. Co. to immediately proceed to fulfill each and every unfulfilled contract with said Land Board to reclaim land under its segregation, and if said C. O. I. Co. fail to do so, to immediately forfeit all said contracts and bonds. We further demand that the said Land Board positively refuse to allow said C. O. I. Co. to sell any more water rights until said contracts are completely fulfilled.

mands and allegations made. The text of the resolution is as follows: "Resolved, that we, the members of the Central Oregon Irrigation Company's Water Users' Association demand that the Desert Land Board forthwith compel the C. O. I. Co. to immediately proceed to fulfill each and every unfulfilled contract with said Land Board to reclaim land under its segregation, and if said C. O. I. Co. fail to do so, to immediately forfeit all said contracts and bonds. We further demand that the said Land Board positively refuse to allow said C. O. I. Co. to sell any more water rights until said contracts are completely fulfilled."

CORN AND COWS PLEASE SMITH

EXPERT SAYS HAVE MANY CROPS

Cows and Hogs, Good Investments, and Corn Will Pay Too, Says O-W. Agriculturalist—L. M. Foss Replaces Wilson.

R. B. Miller, traffic manager of the O-W. R. & N. Co., C. L. Smith, the road's agriculturist, and L. M. Foss, traveling freight agent, were here last Thursday. Mr. Foss, who has had freight department experience in the middle west, will take E. J. Wilson's place here, and after July first will make Bend his home, bringing his family here. Prof. Smith spent a portion of his time looking over the dairy cows imported by the First National Bank, which were being sold at the time of his visit. "They are the best 25 cows I have seen gathered together in eastern Oregon," he said, adding many enthusiastic remarks concerning the progressiveness of those responsible for this special aid to local agricultural development. He said that he has always maintained that the most profitable results in Central Oregon farming will be obtained from cows and hogs.

Corn Will Pay. However, "Farmer" Smith's special interest just now is the production of corn. The O-W. Company in its corn show contest work has distributed ten pound packages of selected corn to thousands of farmers throughout the Northwest this year. The last of these packages were given to local men, C. L. Brandenburg and G. A. Jones, both of whom will raise it exactly according to Mr. Smith's directions. The railroad agriculturist warned against the dangers of the one crop farm, showing the danger of putting "all your eggs in one basket." His urgent advice is to divide the risk as much as possible—have several different crops, so that drought, frost or some special setback, if it comes, will cripple only one item of the farm's income.

Mr. Smith believes that corn will do very well here, especially as a feeding crop, if the grain does not mature. In connection with it he called attention to the following paragraph from his latest entitled "Pointers to Practical Farmers":

The corn plant produces the largest measure of feed per area of land and labor involved of any plant, except alfalfa under irrigation. The corn plant also utilizes a heavy application of barnyard manure more readily than any other plant. Presumably the farmer who makes live stock a leading factor in his system of farming will have an abundance of barnyard manure to apply during the winter months to the land that is to be planted to corn the following season. The plowing to be done as early as the character of the land will admit, and as deep as the weight of the team will permit; harrowing and cultivating at intervals of from five to seven days until the middle or last of May, which will put the ground in good tilth and destroy most of the weed seeds present. Nothing is to be gained by planting corn too early. The ground should be warm enough so that the corn would come up quickly and grow rapidly without any check. The stunted corn plant, like the stunted pig, will seldom make a profitable growth. From July until December the corn can be fed green direct from the field.

Experience has demonstrated that the silo is the only safe and satisfactory place to store fodder corn. Corn silage is good feed for pigs, cows, sheep, young growing stock or fattening steers.

INSPECTOR PRAISES LAUNDRY

Dalsiel Calls Attention to Law Regarding Employment of Women.

Wm. A. Dalsiel, deputy labor commissioner, who was here last week, had many good things to say regarding the condition of local manufacturing plants. One about which he was specially enthusiastic was the Bend Steam Laundry.

"I believe your laundry is the best equipped and the most modern plant in its line of any in eastern Oregon," said Mr. Dalsiel after inspecting J. E. Larson's laundry in its new brick building.

Mr. Dalsiel called attention to the provisions of the female labor law, which prohibits employment of women for more than ten hours in a day, or more than sixty hours in a week. He said certain violations of the law were found here, but that he took no action now, first giving warning to employers. The penalty is a fine of from \$25 to \$100.

The Domestic Economist.

There are other housewives who are as calculating as she who is celebrated in the Manchester Guardian, but not many of them have the daring to carry off their frugality so triumphantly. An excellent Manchester lady frequently invites her friends to tea, but she does not furnish her table lavishly. When her guests have eaten all the bread and butter and cookies and realize that the meal is over, she looks brightly at the empty dishes.

"Well, now," she says, in triumphant tones, "haven't I judged your appetites exactly?"

NOTICE OF CONTEST.

Department of the Interior, United States Land Office, The Dalles, Oregon, June 7, 1913. To Harry A. Bassett of Bend, Oregon, Contestee: You are hereby notified that G. W. Hill, who gives Bend, Oregon, as his post-office address, did on May 2, 1913, file in this office his duly corroborated application to contest and secure the cancellation of your homestead, Entry No. Serial No. 07973, made January 16, 1911, for N 1/4 NE 1/4, SW 1/4 NE 1/4, NW 1/4 SE 1/4, Sec. 2, T. 20, S. R. 16, E., SE 1/4 Section 35, Township 19, S., Range 16, E., Willamette Meridian, and as grounds for his contest he alleges that said entryman has never established residence upon said land; that he has never improved or cultivated the same.

You are, therefore, further notified that the said allegations will be taken by this office as having been confessed by you, and your said entry will be canceled thereunder without your further right to be heard therein, either before this office or on appeal, if you fail to file in this office within twenty days after the FOURTH publication of this notice, as shown below, your answer, under oath, specifically meeting and responding to these allegations of contest, or if you fail within that time to file in this office due proof that you have served a copy of your answer on the said contestant either in person or by registered mail. If this service is made by the delivery of a copy of your answer to the contestant in person, proof of such service must be either the said contestant's written acknowledgment of his receipt of the copy, showing the date of its receipt, or the affidavit of the person by whom the delivery was made stating when and where the copy was delivered; if made by registered mail, proof of such service must consist of the affidavit of the person by whom the copy was mailed stating when and the postoffice to which it was mailed, and this affidavit must be accompanied by the postmaster's receipt for the letter.

You should state in your answer the name of the postoffice to which you desire future notices to be sent to you. C. W. MOORE, Register. Date of first publication June 11, 1913. Date of second publication June 18, 1913. Date of third publication June 25, 1913. Date of fourth publication July 2, 1913.

Dairy Butter—full weight given in ounces and the name and address of the maker. Do yours comply with the law? If not, have some printed that do.

THE BEND BULLETIN

at which all work is received from the wagon. The interior of the building is one large room around which are set up the different machines used in the various processes. Standing by the office entrance the visitor sees at a glance the entire plant and realizes how carefully it has been planned for efficient utilization. In the whole process, from the time an article arrives at the receiving door until it has completed its course and reached the door on its way out to delivery its direction is always forward, never turning back and never crossing the path of another article.

The equipment of the plant includes washers, an extractor which, revolving at the rate of 1600 revolutions per minute, throws the moisture out of the clothes in much the same manner that a cream separator throws off the milk from the cream, the big new Asher mangle for drying

and ironing flat work, the starcher and finally the five ironing boards with electric irons for the hand work. Hot water and steam for the washing are provided by a 16-horse power boiler in a shed at the rear, while power for driving the machines is furnished by two motors. The cost of the building and machinery was about \$7500, says J. Edward Larson, proprietor.

Well Drilling

I am in a position to give best possible terms to anyone who needs either an artesian or a pump well. Speed in drilling is our specialty and any well considered. Inquiries solicited

P. A. GRABLER, Bend, Oregon

Bend's Modern Steam Laundry is Model of Up-to-date Efficiency

"The best equipped and most modern laundry in Central Oregon" is the description of the new plant of the Bend Steam Laundry given by Wm. A. Dalsiel, Deputy Labor Commissioner. Men of wider experience, because their business takes them to laundries throughout the Northwest, say it is the best plant of its size in either Oregon or Washington. The newly completed building of the Bend Steam Laundry is a structure 40 by 50 feet in size made of Bend-manufactured brick. It stands on a lot by itself with windows on all four sides, thereby affording the maximum of light, air and sunshine. The office entrance is on the south side and on the north is a wide door
