## PRACTICAL BAKING LESSONS

### PUDDINGS

Nevada Briggs

In this lesson we will treat on puddings, both baked and steamed. The secret of getting light, palatable pudding is in not baking or steaming too fast. The pudding must have a slow even heat until it has become light and porous. If directions below are followed failure is impossible.

#### Marble Pudding

- 2 cups sifted pastry flour
- 2 level teaspoonsful K C Baking Powder
- 1 1/2 teaspoonful cinnamon
- 1/4 teaspoonful salt
- 4 cups sugar
- Yolks of 2 eggs, beaten light
- 4 tablespoonsful melted butter
- 1/2 cup cold water
- Whites of 2 eggs, beaten dry
- 1 1/2 ounces melted chocolate

Sift together, three times, the flour, baking powder, salt and cinnamon. To the yolks add the sugar, butter and water, and stir into the dry ingredients. Add the whites of the eggs. Divide the mixture into two parts and add the chocolate to one part. Dispose the two parts in a buttered mold to give a marbled appearance. Steam forty-five minutes.

In mixing egg and sugar, use a rotary egg beater making a light creamy mixture of egg yolks and sugar. In steaming pudding have low bias under the water for at least the first 15 minutes, giving the pudding time to rise before cooking.

Serve with Vanilla Sauce.

#### Vanilla Sauce

- Boil 1 cup of sugar and 1/2 cup of water six minutes; add 2 teaspoonfuls of butter and a teaspoonful of vanilla extract.

#### Cherry Pudding

- 2 cups sifted pastry flour
  - 2 level teaspoonsful K C Baking Powder
  - 1/4 teaspoonful salt
  - 4 cup butter
  - 2 eggs
  - 1/2 cup milk (scant)
  - Cherries
  - Salt or 1 tablespoon butter
- Sift together three times, the flour, baking powder, and salt and work in the butter; beat eggs, add milk to eggs and stir into the flour. Half fill a baking pan with cherries, add bits of butter and pour batter over top of cherries, and bake slowly for fifteen minutes, then increase heat and bake until pastry is done. Turn on a plate with berries upmost, serve with hard sauce or very sweet cherry juice. Other fruits, such as apples, peaches, apricots, berries or bananas may be used.

#### Hard Sauce

- Cream 1/2 cup butter with 1/2 cup sugar and flavor to suit, putting over pudding when pudding is still warm.

#### Prune Kuchen

- 2 cups sifted pastry flour
  - 2 tablespoonsful granulated sugar
  - 1/2 teaspoonful salt
  - 1/4 cup butter
  - 2 level teaspoonsful K C Baking Powder
  - Cinnamon to taste
  - 1 egg
  - 1/2 cup milk
  - 1/2 pound prunes
  - 1 tablespoonsful melted butter and 3 tablespoonsful sugar for top of Kuchen.
- Sift together, three times, the flour, sugar, salt and baking powder, and work in the butter. Beat the egg; add the milk and stir into the dry ingredients. Turn into a shallow buttered pan and spread the dough

evenly in the pan. If you the prunes cooked tender and remove the stones. Press the prunes side down, into the top of the dough.

Brush over with melted butter, dredge with sugar and cinnamon, and bake twenty-five minutes. Serve hot, cut into squares, with hard sauce or stewed prunes.

#### Baking Hints

Select materials with great care. The best of everything is always the cheapest. To have a perfect finished product we must first have good material for our foundation. In selecting materials for baking, first get a high grade baking powder, for unless properly leavened, food is not palatable. A high grade baking powder is not necessarily a high priced one. K C Baking Powder is medium in price, but of the highest quality, made of the best and purest of materials properly combined to produce the best possible results.

For cakes and pastries a soft wheat pastry flour is preferable. To determine soft wheat from a brand, or hard wheat flour, press it lightly in the hand; if the flour stays packed in a mass showing the imprints of the fingers, it is a pastry flour; if it falls through the fingers sandy, it is a bread flour, and should be used only with yeast.

Shortening must be fresh and sweet. Sugar should always be cane sugar.

Water is equally good as milk in all articles where a large amount of sugar is used, except for cookies.

Larger masses of dough require longer times for rising and baking.

Bear in mind that baking rules are so important as measuring rules. Do not bake cakes, puddings and such pastries so short cake, dumplings and meat rolls with a hot fire at the start. Have a slow oven until the dough doubles in bulk; then increase heat to bake and brown.

Biscuits, cut cookies and pie pastry require a hot oven.

Have food thoroughly cooked. Half cooked pastries are hard to digest and injurious, better to over-bake than under-bake.
