You Should See La Pine

can be purchased at \$500 per acre on easy terms. The surrounding pine covered mountains are full of natural wonders—and just the place for a vacation. La Pine is only about two years old, but growing rapidly. It has a telephone system, two good hotels, two big general merchandise stores, a first class livery and feed stable, an excellent newspaper (the La Pine Inter-Mountain), one of the most progressive commercial clubs in the state—and this club, by the way, has its own property and the past year erected the most attractive club house. There are three small saw mills in the vicinity of La Pine, and it is just the beginning of the big lumbering and milling business that will be done here. There are good openings in manufacturing and other business lines here. In educational matters La Pine is progressive. It has a ten-acre school park in the heart of the residence section, and now teaches up to the twelfth grade. A Catholic church will be built here this spring, and other churches are planning to establish themselves. La Pine has over 12,000 available electric horse power which the owners have commenced to develop, and which alone would build a good sized city. The big area of farm land tributary to La Pine would alone build and maintain a good sized city. The vast tracts of timber tributary to La Pine would alone build a good sized city. With the coming of the two big railroad systems to La Pine, which will be soon, development in and around La Pine will be rapid. La Pine can be reached via Gr. Nor., N. P., G. W. & N., and U. P. Rys. You can make money by buying property at La Pine in advance of the owners have commenced to develop, and which alone would build a good sized city.
