

SCHOOL PLAN SATISFACTORY

ARCHITECT LOOKS OVER GROUND

Proposed Bond Issue Ample For First Class Structure, Says Architect of Spokane and Chairman McKay of the Local School Board.

Provided the Bend taxpayers see fit to endorse the \$25,000 bond issue next Wednesday for the erection of a grade school building, Bend will have a modern structure well before the first of next year, and one, according to the architect now here, and Mr. McKay of the school board, that will be both entirely adequate for the needs of the district in this direction and a credit to the town as well.

R. G. Sweatt, of the firm of Sweatt, Levesque & Co., of Spokane, is the architect who has spent the morning with Mr. McKay in going over the plans he has drawn, and in getting all necessary data. After establishing costs of building materials here, and going into other matters involved, Mr. Sweatt stated that the building can be cared for by the bond issue. The plans call for a structure of eight rooms, built so that an additional eight may be added.

Mr. Sweatt is the architect of the school board of Spokane, and as such plans all school buildings in that city. He has also built schools in Umatilla, Marcus, Mica, Freeman and Harrington, Wash., Burke, Idaho, and Wallace, Idaho, as well as in the Middle West. At Wallace the building housed a swimming pool, bowling alleys, etc., and was a community center. He is also the author of a book entitled "School Designing," a technical statement of planning school buildings.

"It looks good to me," said Mr. McKay. "At first I had doubts as to whether we could get a sufficiently good building for the money, but now I am convinced. I heartily hope the election will carry. Mr. Sweatt says the building will be completed four months after construction is commenced.

Mr. Sweatt is building a school for Metolius, the contracts being let last night.

You will have no irritated face if you have your shaving done at Innes & Davidson's barber shop.—Adv.

WAS HAMLET FAT?

With His Own Words He Doth Proclaim the Fact Quite Pat.

The traditional Hamlet of our stage is a lean, ascetic young person, an idealist, etherealized, heroic creature evolved for the delectation of the matinee girl. He is a horrid sham. Is it credible that such a man would have lacked the determination, the purposefulness, to put his revenge into operation put upon the discovery? It is all very well to argue about his mental balance. It was his sluggish liver that stayed him and hampered him.

Hamlet's father was a fat and lethargic man by his own account.

Sleeping within my orchard, My custom always of the afternoon, he says in his ghostly interview.

We may then look for some clew to Hamlet's character as soon as he is alone on the stage. What are his words?

Oh, that this too, too solid flesh would melt!

It is a keynote that may not be glossed over as a beautiful thought, for the same idea bursts out some lines farther on, where he says of the world:

Things rank and gross in nature Possess it merely.

Is it credible that such thoughts are there for any purpose save to guide us as to the nature of this prince?

They serve a double purpose. Not merely do we learn that Hamlet was a fat man, but also that he was an unhappy fat man. Hamlet was a man to whom his bulk was an affliction. He was handicapped by it and knew that he was. Some such idea is discernible in every one of the great soliloquies. He scorns himself for a staggard:

What is a man If his chief good and market of his time Be but to sleep and feed?

His mind, unridged or not, is obsessed by fatness, and in the mad turmoil of emotions after he has slain Polonius his thoughts run:

We fat all creatures else to fat us, and We fat ourselves for maggots.

It bursts out again in the "Oh, what a rogue and peasant slave!" harangue:

Ere this I should have fatted all the region's kites With this slave's offal.

And who but a fat, lethargic man would have said in the "To be or not to be" speech:

Who would fardels bear To grunt and sweat under a weary life, Does not the phrase bring to mind at once the picture of a fat man toiling at some loathed task?—London Express.

WON BY A DOLL.

A Gift That Brought the Rebellious Apaches to Terms.

Major Bourke, as aid to General Crook, once showed himself an effective peacemaker. He persuaded a band of Apaches to go back to their reservation by presenting a doll to a papoose. The incident was as follows:

General Crook had been trying to put these Apaches back on the reserva, but could not catch them without killing them, an action that did not appeal to him. One day his forces captured a papoose and took her to the fort. She was quiet all day, but her black eyes watched everything. When night came the child broke down and sobbed just as any white youngster might.

The fort was in despair until Major Bourke had an idea. From the adjutant's wife he borrowed a doll that had come to her little girl the previous Christmas. When the young Apache understood that it was hers to keep her sobs ceased and she fell asleep.

When morning came the doll was still clasped tightly in her arms. She played with it all day, and seemingly all thought of ever getting back to the tribe had left her.

Several days passed with no sign of overtone being made by the tribe, and finally in despair the papoose, with the doll still in her possession, was sent back. When the child reached the tribe with the prize grasped in her chubby hands it created a sensation among the native Americans, and her mother later went back to the post with it. She was received in a hospitable manner and kindly treated, and the effect of her visit was such that through her overtures were made, with the result that soon afterward the entire band moved back on the reserva.—St. Louis Republic.

BEND BRICK COMMENDED

Test Made by Eastern Concern Shows Them of Good Quality.

That Bend brick are of high quality and equal to those made in the East is shown by a report received from the Arnold-Creager Company, to whom samples were sent. The report says:

"We have received the sample brick sent us and will say that it compares very favorably with the best of our Eastern brick, both in quality and color. We should think that you would experience very little trouble in disposing of your product as we know of a great many plants in this part of the country that are making and selling brick that are very much inferior to yours."

The Arnold-Creager Co. is one of the largest brick machinery manufacturers in the country and has its own brick and clay testing plants, and it was mainly through its tests that Bend came to have the only up-to-date brick plant in Central Oregon.

JURY ACQUITS DONOHUE.

Charged with cruelly beating and killing a horse, A. R. Donohue was tried in Justice Eastes' court yesterday afternoon in the Johnson building and was acquitted by a jury. The complaining witness was Mrs. Mary

You Should See La Pine

and its surrounding country. The land is a rich, deep volcanic ash formation, no rock, it level, has good drainage, and excellent drinking water never deeper than 20 feet. The irrigated land with a perpetual water right can be purchased at \$5.00 per acre on easy terms. The surrounding pine covered mountains are full of natural wonders—and just the place for a vacation. La Pine is only about two years old, but growing rapidly. It has a telephone system, two good hotels, two big general merchandise stores, a first class livery and feed stable, an excellent newspaper (the La Pine Inter-Mountain), one of the most progressive commercial clubs in the state—and this club, by the way, has its own property and the past year erected thereon an attractive club house. There are three small saw mills in the vicinity of La Pine, which is just the beginning of the big lumbering and milling business that will be done here. There are good openings in manufacturing and other business lines here. In educational matters La Pine is progressive. It has a ten-acre school park in the heart of the residence section, and now teaches up to the twelfth grade. A Catholic church will be built here this spring, and other churches are planning to establish themselves. La Pine has over 12,000 available electric horse power which the owners have commenced to develop, and which alone would build a good sized city. The big area of farm land tributary to La Pine would alone build and maintain a good sized city. The vast tracts of timber tributary to La Pine would alone build a good sized city. With the coming of the two big railroad systems to La Pine, which will be soon, development in and around La Pine will be rapid. La Pine can be reached via Gr. Nor.; N. P.; O. W. R. & N. and U. P. Rys. You can make money by buying property at La Pine in advance of the railroads. Others are doing it, why not YOU? WAKE UP to the fact that a solid, well-located town in one of the newest and best sections of the Northwest is bound to grow rapidly, and that property values will climb accordingly. Prices now from \$50.00 up. The terms are easy, only a few dollars per month on each lot. You don't miss the money, but you soon acquire valuable property. Write today for plat, prices and terms to

Martin. Despite the hot weather, there was a large crowd of interested spectators at the trial. The prosecution was conducted by Vernon A. Forbes and George W. Erskine, and the defendant was represented by H. H. DeArmond.

WEATHER HAS BEEN HOT.

The period of hot weather that prevails for about a week every year near the middle of July is now upon Bend. The temperature, however, has been a little lower than it was in both 1911 and 1912. Two years ago a maximum of 99 was reached on July 16 and last year a maximum of 100 on July 16. On the 16th this

year the maximum was only 86. The highest temperature so far this summer has been 94 degrees, registered on the 5th and again on the 20th.

ROAD UP FORKED HORN

Redmond Commercial Club and the Farmers Co-Operate.

(Special to The Bulletin) REDMOND, July 22.—The local commercial club, in conjunction with the farmers south of town, have commenced the construction of a public automobile road to the top of Forked Horn Butte, and it is now proposed

to hold a picnic at the top of the butte on Friday, August 8. A basket dinner will be served by the ladies and the men will join in completing the road. Forked Horn Butte is the site of the city reservoir and one of the highest points in this vicinity.

The Odd Fellows and Rebekahs of Redmond will go to the Carl W. place near Sisters for their annual picnic next Sunday. These lodges had a picnic at the same place last year and nearly the entire membership was in attendance.

A Woodmen of the World camp was organized here last Tuesday evening, with 49 members.
