

# THE BEND BULLETIN.

VOL. XI.

BEND, OREGON, WEDNESDAY, SEPT. 3, 1913.

NO. 26

## SEATTLE PAPER EXPLOITS BEND

### ARTICLE AND PICTURES IN "P-I"

#### Excursionists Went Away With Attitude of Minds Changed to Better, Says Writer in Daily—"Trip Is Inspiring."

In the Sunday issue August 24 of the Seattle Post-Intelligencer Bend was given a prominent notice, this being a result of the excursion run from that city here. On the first page of the real estate section of the paper were six cuts showing power, irrigation, timber and other views, and there was an article of a column and a half written by the P-I staff man who was one of the excursionists. The following are extracts from this article:

"A thousand miles travel in three days through one of the most potentially rich sections of the almost inexhaustible country of the Northwest could not fail to establish interest and to hold it when thus established. Seeing is believing, saith the old adage, and the truth of the proverb was, never, perhaps, better exemplified by the 'before and after' attitude of mind of the excursionists.

"Indeed, one lady, Mrs. A. Malumud, asked to join the merry party five minutes before the train started, accompanied her husband without demur or reference to her 'things', thereby creating a new feminine record.

#### Trip is Inspiring.

"The trip is indeed inspiring. There is a country, 50,000 square miles of land for the homes of the future, according to Secretary Lane, where there seems to be nothing lacking. Power is provided by the falls of the Deschutes. One company has already established a power plant. Timber, without counting in the government land on the upper slopes of the Cascades, nearby to the west, growing in billions of feet, is within easy access of Bend. A sawmill is operating within its limits. Under the Carey Act thousands and tens of thousands of acres of arable land is being brought under water. In this, not only the federal, but the state government, is aiding. Under the soil lie unknown mineral resources. The soil is volcanic in origin and the trachyte rock, as easily cut as soap when quarried, hardens into unweathered stone after exposure to the atmosphere, forming the best of building material in various shades, pink being most generally affected by the progressive citizens. Three thousand feet in the air on the upland plateau there is sufficient chill in the air to impart to the fruit there grown that delightful flavor which

can hardly be attained in the subacid species, such as apples, in softer climes. Yet the warmth is ample to ripen tomatoes at this early date.

#### Railways Are Eager.

"Nor is there any lack of transportation. The Hill and the Harriman systems are both taking care of the new region. Lines will connect Bend to the direct south and to the east, while connection is made to the north along the valley of the Deschutes. Only about 150 miles remain to link up the system with the California lines.

"Through Bend will run the Pacific highway, assuring to the ranchers and farmers of the country, with its possibilities in general agriculture, dairying, fruit raising, timber and mining, a ready and certain market for the outcome of their labors.

"A town of yesterday, Bend is already noted throughout the Northwest, just as Central Oregon is attracting great attention in the minds of dwellers in the East and Middle West who are longing to indulge the centuries-old desire of making their home in the Golden West."

## SHIPPING SHEEP TO CHICAGO

### Thirty-two Cars Loaded Here By McLennan Left Today.

The first shipment of sheep to the East this fall was made from Bend today, there being 32 cars, or a trainload. The shipper was Ewen McLennan, who has had them in the mountains during the summer. They went to Chicago.

The sheep were driven in Monday and Tuesday, and are in fine condition for marketing. There are about 7500 of them, including many lambs. The train was routed over the Oregon Trunk, S. P. & S., Northern Pacific and Burlington. J. T. Hardy was on hand to look after the loading.

## ADAMS CASE KNOCKED OUT THROUGH ERROR

### Court Sustains Forbes' Contention That Service Was Illegal and Suit Against City Goes to December.

(Special to The Bulletin)  
PRINEVILLE, Sept. 2.—A case of considerable interest to Bend people was temporarily disposed of this afternoon when action in the suit of Adams against the City of Bend terminated abruptly when City Attorney Forbes showed that the service of summons had been made illegally. So the case is thrown out of court for this term, and cannot be brought up again until December.

The case is that of J. J. Adams vs. the City of Bend, Adams suing to collect about \$2000 alleged to be due on the street work contract, the city withholding payment on the grounds that the contract was never finished according to specifications. Forbes filed a motion before Judge Bradshaw this afternoon to quash the service of summons on the grounds that it was illegally served. After due argument, with H. H. DeArmond, representing Adams, the court ruled sustaining Forbes and the case was dropped. Frank Collier, a Portland attorney, was also in the employ of Adams and associates.

## BRICK BUILDING AT CORNER OF WALL AND OREGON STREETS

### COST WILL BE \$12,000, BUILDERS BEING DESCHUTES INVESTMENT CO. AND R. M. SMITH ---FRONTAGE TO BE 100 FEET, DEPTH 90.

While "things are slow" in most of the smaller Oregon towns, at least so far as the construction of new buildings is concerned, Bend seems to be keeping up a steady gait in substantial development in this line.

A few weeks ago the Metzsig brick building was placed, under way, and now comes the announcement of a new structure to cost in excess of \$12,000, on the southwest corner of Wall and Oregon streets. Its dimensions will be 100 by 90 feet. The northerly 50 feet will be erected by the Deschutes Investment Company, composed of Messrs. Hudson, Coe, Sather and Ellis, and the southerly 50 feet by the R. M. Smith Clothing Company.

The new structure will have four store rooms, each of 25 feet, facing Wall street, and all of 90 foot depth. The building will have one story for the present, and will be faced with yellow pressed brick, the body being of Bend brick. In every detail the building will be modern and well finished, with plate glass fronts for the stores and the best to be had in other finishings. The 100 foot front-

age will have a cement sidewalk. The Deschutes Banking & Trust Co. will occupy quarters at its present location on the corner. Next will come the Patterson Drug Company, with the R. M. Smith Clothing Co. and Shuey's grocery store remaining in their present locations.

During the construction of the building, which will be started as soon as the frame buildings now on the property will be moved. The bank building will be taken to the lot directly south of the Bean building. The Patterson building will go to the lot between Mannheim's store and the Miller Lumber Company's office. Mr. Smith has not completed arrangements for the disposition of his buildings. It is understood that during the time of construction the business will be continued in their present structures at the places to which they will be moved.

The brick building of H. B. Metzsig on Oregon street is now rising rapidly. Yesterday Jack Tanay, who has the contract, put a full crew at work, and unless some delay occurs on account of the non-arrival of material, he expects to have the building up one story by the end of the week. The front of the building will be of pressed brick, buff in color, laid in black mortar. There will be three storerooms, two of which have been leased to Innes & Davidson and A. L. French.

## COURT IS IN SESSION AND CASES BEING TRIED TODAY

(Special to The Bulletin)  
PRINEVILLE, Sept. 2.—Circuit Court convened yesterday with Judge Bradshaw presiding. The first day was spent mostly in clearing up the docket, and today the trial of criminal cases was begun.

George Kentner was placed on trial this morning for horse stealing and a jury soon secured. In proceeding with the case it was found that a mistake had been made in a date in the indictment and the jury was dismissed. A new indictment will be drawn.

Charley Brown and Bert Thompson were indicted by the grand jury for stealing a horse from J. E. Morson of La Pine and pleaded guilty. Jack Seeley was indicted on a charge of giving liquor to minors and was released on his own recognizance.

The divorce case of Mary J. Conway vs. Charles W. Conway was dismissed without prejudice. No attorney appeared in the case.

#### Grand Jurors Drawn.

The following were drawn on the grand jury:  
W. J. Johnson, Mill Creek, stock-

man. J. E. Roberts, Roberts, farmer. Wallace Post, Post, stockman. A. G. Kibbee, Hay Creek, farmer. S. A. Sanvig, Ashwood, farmer. William H. Hess, Madras, clerk. G. W. Branstetter, Madras, farmer.

## SPLIT IN COURT CONTINUES

### Commissioner Bayley stays at Home. Sheriff's Tax Report.

(Special to The Bulletin)  
PRINEVILLE, Sept. 2.—Commissioner Brown and Judge Springer are the only members of the County Court here this week, Commissioner Bayley remaining at home, and it appears as if things will drag along about as they did at the July term.

Sheriff Atkins has submitted to the court a report of taxes collected since January 1. This shows that he has turned over to the treasurer \$265,328.81 and has on hand cash and warrants totaling \$2737.98, making a total of \$268,065.89 collected. Penalties on taxes collected have amounted to \$2095.54, and 1912 taxes related total \$6397.52.

## APPOINTED FIRE WARDENS

### State Forestry Board Names Crook County Guardians.

Fire Warden Clyde McKay has received word from the state board of forestry that the following have been appointed deputy state fire wardens in Crook county during the present season:

J. O. F. Anderson, Meadow; J. A. Brinkley, Bend; Charles Congleton, Paulina; John B. Carl, La Pine; E. W. Donnelly, Suplee; W. A. Donnelly, Howard; O. M. Gillenwater, Post; A. H. Hodgson, Prineville; D. C. Ingram, Prineville; John Rils, Big River ranger station; Homer Ross, Prineville; Perry A. South, Allingham ranger station; Will J. Sproat, with survey crew on the Metolius; Harvey E. Vincent of Sisters and E. T. Gerrish.

All of these except Gerrish, who is the lookout on Lava Butte, are forest service employes. Mr. McKay says, and he asks that all forest fires be reported to the nearest warden, or to him at Bend, as soon after discovery as possible. Several small fires in the national forest at Pine mountain the first of the week are now under control.

The Deschutes Valley Fire Patrol Association had a crew of men fighting fire last week in township 17 range 11, which burned over about 25 acres. Two crews also went out the first of this week to put out two fires on the Tumalo which did but little damage. All these fires were in privately owned timber.

Earl B. Houston took four men from Bend Monday night in his auto to fight a fire 12 miles southeast of La Pine. He got back yesterday at noon.

## SHOWER FOR MISS FORCE

### Priscillas and Rebekahs Spring Surprise on Her.

The news having leaked out that Miss Lois Force and Walter L. Wing are to be married soon, the Priscillas and lady members of the Rebekah lodge arranged a surprise shower party for her last night at the French home. She was presented with many useful gifts, and the 30-odd women present made a jolly time of it. After the fun, ice-cream and cake were served.

Miss Force leaves tomorrow for Portland to visit her sister, and the marriage will take place in that city on October 29. Mr. Wing is employed with the government survey party at Benham Falls, and is understood that they will return to Bend to live.

## ON CURSEY'S TRAIL.

W. D. Cursey was in Portland the past week, as well as Mrs. Cursey. A telegram this morning from J. H. Wenandy, who has been in Portland making an effort to apprehend the absconder, said that he had positive evidence that the Curseys were to meet this afternoon in Missoula, Mont. A description of them has been wired to that city and the chief of police notified to look out for them.

## BIG GAIN IN ENROLLMENT

### 242 PUPILS ON THE FIRST DAY

#### This is Fifty More Than at Opening Last Year—First Grade Has 48, and Additional Teacher Will be Required.

\*\*\*\*\*  
Total Enrollment. \*\*\*\*\*  
• 1912—242 first day.  
• 1912—192 first day.  
• 1911—155 end of first week.  
\*\*\*\*\*  
High School.  
• 1912—32 first day.  
• 1912—30 first day.  
• 1911—21 first day.  
\*\*\*\*\*  
First Grade.  
• 1912—48 first day.  
• 1912—39 first day.  
• 1911—16 first day.  
\*\*\*\*\*

Fifty more pupils were enrolled in the Bend schools yesterday than on the opening day of 1912, the total being 242. There are 32 in the High School and 48 in the first grade. Thirty-one of these 48 were never in school before. All the 11 teachers were on hand yesterday.

The main and the three overflow buildings are jammed with these pupils starting the year's quest for knowledge. By rearranging the classes this year whereby each teacher has a portion of the pupils in two grades instead of all in one grade, Principal Shouse has made it possible to provide room for all, without the necessity of renting an outside building as was done part of last year.

#### Teaching Stenography Now.

A new course is being taught this year in the High School by Mr. Shouse, this being shorthand and typewriting. There are seven students enrolled.

It is apparent from the first day's enrollment that it will be necessary to have an additional primary teacher. Miss Sidner has 48 pupils, more than one teacher can well handle. This number is 18 more than she had the first day last year and exactly three times as many as on the first day of 1911.

The High School senior class numbers only three, as compared to five on the opening day last year. There are two girls and one boy.

There will be a class to take the eighth grade examination at the middle of the year this session, for the first time.

#### Young School to Start Monday.

Brosterhaus Bros. are at work putting up the Young school building, and school there will start next Monday. Miss Jean Ferguson, who was elected to teach this school, will not come and the board is communicating with other applicants and expects to secure a teacher by next week.

The Arnold school opened Tuesday in charge of Glenn H. Slack.

Painting of the Bend school house was started yesterday by N. P. Weider, who has the contract.

**AMERICAN BANKERS ASSOCIATION TRAVELERS' CHEQUES**

"A.B.A." Cheques, used by tourists in all foreign countries, also are the safest, most convenient funds for travel in the United States and Canada. Not good till you sign them; safe as your own blank check. More handy than your personal checkbook, for your signature identifies you.
