

GREENWOOD WORK TO START

Small Jail With Two Steel Cells to Be Built at Once by City.

At a City Council meeting last week bids for the street improvement work on Greenwood avenue beneath the railroad viaduct were opened and the work was awarded to Tom Murphy, whose bid totaled \$1985. The city has received from the railroad \$1270 to cover the estimated cost of the work, and also an amount of cement, pipe and iron manholes. The work will be started at once and the avenue at that point placed in first class shape.

Bids for the proposed municipal building were opened. It was found that the cost of the structure as planned would be over \$3500, and it was decided for the present to drop the plan entirely and to erect a small brick jail building, in which are to be two steel cells.

At a subsequent council meeting the Log Cabin saloon was ordered to keep closed pending an investigation of alleged selling of liquor after hours last Friday night.

For the masquerade you will have to have a mask, and you will find the kind you want at the Owl Pharmacy.—Adv.

CROPS THIS YEAR ARE BOUNTIFUL

(Continued from Page 7)

on the ranch of H. Hughes was the feature of his farming operations this year. Aside from this, he got 75 tons of hay, and from 12 acres of mammoth clover obtained 25 tons of hay at one cutting. This field is now furnishing pasture for stock on the Pilot Butte ranch. Mr. Hughes had delicious watermelons and cantaloupes that got ripe, as well as corn that matured.

W. G. Waugh has 35 acres of his 80 seeded to clover and alfalfa and his crop was good this summer. He has 5 hogs on the place.

From 12 acres of alfalfa and 12 of clover Julius Pedersen got 50 tons of splendid clover hay. A large part of this will be fed to his cattle, he having 7 milk cows and 7 calves and other young stock. Five young O. I. C. hogs take care of any and all skimmed milk that comes their way. Cream is sold to the Pioneer Creamery in Bend. Mr. Pedersen's poultry consists of 75 Rhode Island Red chickens and 30 turkeys. Mr. Pedersen is building an addition to his residence, Mr. Waugh assisting with the work.

Four Tons of Clover to the Acre. E. D. Havemann recently pur-

chased the Randles ranch of 80 acres, together with all stock and other property on the place, paying a price reported to be \$7800. Twenty-five acres of this is seeded to clover and alfalfa and the yield of clover was at least 4 tons to the acre—the best so far reported anywhere.

H. Helgeson has 70 acres of irrigable land, and 15 of this is now in clover crop. From this he secured a 2-ton yield. From 3 acres of alfalfa 6 tons were cut. His potatoes, of which he has 3 acres, and carrots are not as good this year as last. Mr. Helgeson has 7 hogs and 4 cows.

George M. Erickson raises wheat, oats and clover hay on his 40 acres, all of which is cleared but 5 acres. Four cows are milked, the butter being sold in Bend. He has a flock of 50 Barred Rock chickens. Mr. Erickson took up residence on this farm three years ago, this being his first experience in farming.

C. L. Smith is doing intensive farming on his 40 acres. It is sown to clover and alfalfa, mostly, and 75 tons were cut from 30 acres. A fine

dairy herd is kept, consisting of 15 cows. Eight are now being milked. About 25 pounds of butter is sold a week. Mr. Smith has 26 hogs and 50 Plymouth Rock hens.

Hogs With a Pedigree.
O. C. Cardwell is specializing in hogs and dairying, and is meeting with much success. Every week he sells his cream at the Bend Creamery, while the skimmed product goes to make his hogs grow like wildfire. For instance, he has a boar that has gained 1 1/2 pounds a day since June, and also a pig that, by actual weighing, gained 5 pounds in 10 days. Mr. Cardwell has 21 Duroc Jersey pigs 4 week old worth now \$2.50 each. He will sell the Durocs all off next year as he is going to raise registered O. I. C. stock. This spring he bought two sows and a boar with a pedigree from an Albany farm. The sows will be bred to farrow in the early spring.

Takes Cabbage Growing Honors.
Mr. Cardwell isn't very "Dutch" but he raises "some" cabbage. Consider this: He had in less than a quarter of an acre and got more than 3 tons. He has made 150 gallons of kraut and has put the rest

and its surrounding country. The land is rich, deep volcanic ash formation, on rock, is level, has good drainage, and excellent drinking water never deeper than 20 feet. The irrigated land with a perpetual water right can be purchased at \$50.00 per acre on easy terms. The surrounding pine covered mountains are full of natural wonders—and just the place for a vacation. La Pine is only about two years old, but growing rapidly. It has a telephone system, two good hotels, two big general merchandise stores, a first class livery and food stable, an excellent newspaper (the La Pine Inter-Mountain), one of the most progressive commercial clubs in the state—and this club, by the way, has its own property and the past year erected thereon an attractive club house. There are three small saw mills in the vicinity of La Pine, which is just the beginning of the big lumbering and milling business that will be done here. There are good openings in manufacturing and other business lines here. In educational matters La Pine is progressive. It has a ten-acre school park in the heart of the residence section, and now touches up to the twelfth grade. A Catholic church has been built here, and other churches are planning to establish themselves. La Pine has over 12,000 available electric horse power which the owners have commenced to develop, and which alone would build a good sized city. The big area of farm land tributary to La Pine would alone build and maintain a good sized city. The vast tracts of timber tributary to La Pine would alone build a good sized city. With the coming of the two big railroad systems to La Pine, which will be soon, development is and around La Pine will be rapid. La Pine can be reached via Gr. Nor., N. P., O. W. R. & N. and U. P. Rys. You can make money by buying property at La Pine in advance of the railroads. Others are doing it, why not YOU? WAKE UP to the fact that a solid, well-located town in one of the newest and best sections of the Northwest is bound to grow rapidly, and that property values will climb accordingly. Prices now from \$50.00 up. The terms are easy, only a few dollars per month on each lot. You don't miss the money, but you soon acquire valuable property. Write today for plat, prices and terms to

of the crop in the pit. He is getting 2 cents a pound for his cabbage in Bend and will probably get 2 1/2 later on. At 2 cents his gross yield for the quarter acre runs up to \$120, or at the rate of \$480 an acre—which, to say the least, isn't very close to starvation.

A small orchard of apple, cherry and pear trees has been set out by Mr. Cardwell. His two acres of carrots, not yet dug, will run at least 10 tons to the acre.

Mr. Cardwell's herd of cattle consists of 27 cows, yearlings and calves. He is milking 11. His hay crop this year runs 1 1/2 tons to the acre for grain and 2 tons for alfalfa. His ranch consists of 120 acres.

Young Living on Easy Street Now.

P. J. Young is now comfortably settled in a new bungalow and his farm has been turned over to the care of Charles Lowe. Ninety tons of clover hay were cut and 9 of alfalfa. Most of the alfalfa on the place is young. The oats hay was also good. Mr. Young set out around his home this spring 130 fruit trees, as well as currants, raspberries and strawberries. His residence has four rooms finished, with two upstairs to be completed when they are needed. It is a plastered house. For the keeping of perishable things he has built a large stone cellar.

Neff Has 60 Hogs.
A. Neff is taking the lead in hog

raising in the Bend district. He has 60 head, 43 of them pigs. He sold 26 pigs in the spring. He has secured an O. I. C. boar from the same ranch at Albany from which came Mr. Cardwell's. There are 11 head of cattle on the Neff ranch, 3 cows being milked and the butter sold in Bend. Mr. Neff got 6g tons of alfalfa and clover hay off 25 acres. He put 2 acres in potatoes but his crop was short owing to lack of water at the time when it was most needed.

A distinction is noted on the Neff farm that is seen nowhere else. This is a row of poplar trees along the road that are running up rapidly and will soon have grown into a beautiful hedge.
