

900,000 BRICK ARE MADE HERE

LOCAL PRODUCT IS MAKING GOOD

Complete Equipment Insures Good Output, and Inexhaustible Supply Care For Future Growth—Big Kilo Has Just Been Burned.

The Bend Brick & Lumber Co. is now completing one of the most successful years of brick making that it has had. In amount of brick turned out, in quality and in sales the past season has led all others.

At the brick yards, two miles west of town, on the Tumalo road, the third and last kiln of the season is now being burned. It contains 500,000 brick and with the two kilns burned earlier in the summer makes a total of 900,000 brick as the company's product for 1913. The greatest use of brick from this yard has been, of course, in Bend, but shipments have been made to Redmond, Culver, Metolius and Sisters. In Bend the Metz building and the new buildings of the Deschutes Investment Company and the R. M. Smith Clothing Company are making the heaviest demands for brick. There is a constant call for small quantities in the different residences going up all over town. In this connection the value of the company's clinker brick has been recognized this summer and it is expected that in another year it will be frequently found in residence construction.

The plant of the company is completely equipped for turning out the best quality of brick, while its beds are practically inexhaustible. Covering as they do over 40 acres of ground and running to a depth of 90 feet and more, they furnish a supply of raw material that will last for years to come. In another respect the yard is fortunately situated in being in the forest where fuel is easily procured. Lack of cheap and convenient fuel is a handicap to other towns in the county where clay beds exist which otherwise would be used for brickmaking. At the local yard 250 cords of wood have been used this summer for the three kilns which have been burned.

When in full operation the plant employs 15 men and two teams and in the brick yard settlement there are about 30 people. In employing labor the managers of the company, Messrs. Horn and Colver, made a point to take only men who live in the county, usually homesteaders who come in for employment during their time of absence from their claims.

The foreman of the yard is J. E. Murphy, formerly of Salem. Mr. Murphy has had 20 years experience in brick making and expects to remain in this country indefinitely.

CARD OF THANKS.

We are taking this way to express our heartfelt thanks to the scores of friends who responded so quickly to the call for help when our little girl was snatched from us by the cruel waters. We thank the noble hearted that gave so many kind, sympathizing words of encouragement and worked so hard to save the little spark of life that was ebbing away. And again we wish to give our heartfelt thanks to the multitude of friends who contributed so willingly and generously to us in the dark hour of our sorrow and need, and we stand lifelong friends.
J. P. Savoy and Family.

BEND VS. REDMOND AT TENNIS.

Sunday four tennis players came up from Redmond and played with the local racquet wielders. Davis and Sprout, Bend, defeated Barr and Rodman, Redmond, in doubles, as did Hudson and Putnam who played Moore and Hosh. Then Hosh beat Hudson in singles and Moore beat Putnam. Davis won from Barr. The visitors were dined at the Hudson residence. On the previous Sunday Bend players were at Redmond. Next week local representatives expect to cross raquets with Prineville at the county seat.

Relinquishment & CONTEST APPLICATION BLANKS

at The Bulletin office. Regular approved government form. Whether you want one or 100 we can supply you at Per 100. \$1.50, less quantities 2c each.

COMMUNITY HALLS BUILT

IDEA POPULAR WITH SETTLERS

Building East of Bend is Center of the Neighborhood—Laidlaw Erecting Agricultural Structure on the Co-operative Plan.

The co-operative hall idea is coming to be quite popular among the settlers in the Central Oregon country. Especially is this true with regard to the farmers in the country tributary to Bend. Last year a community building was erected six miles east of town, and it has proved to be a great social center. It was put up on the co-operative plan and all kinds of meetings are held there, with a social dance nearly every Saturday night during the seasons when the farm work is not too pressing. All the settlers contributed to the erection of the building, as did many of the business men of Bend.

Down at Laidlaw just now a similar building is being erected. It will be known as Agricultural Hall on account of the fact that each year the Laidlaw district fair will be held in it. It is to be a community center, however, and is being put up by the co-operative efforts of the people living in the town and adjacent farming district. It is 22 by 76 feet in size and occupies two lots which were donated by the townsite company. It will have a fir floor and will give that community a splendid dancing place. It is to have a 16-foot stage also and this will make it possible for entertainments of various kinds to be given. The dedication of the edifice will probably be at Thanksgiving.

THREE ACRES OF CANADIAN FIELD PEAS BRING \$270

(Staff Correspondence)
POWELL BUTTE, Oct. 20.—Bonanza crops in this district are by no means scarce, but there are few that come up to the money-bringing possibilities of Canadian field peas, such as those raised this year by George Brazee. He had a fraction over three acres and the yield on these three acres was a little more than 90 bushels in all. On the face of it, there is nothing wonderful about that, but a little further probing brings out the milk of the coconut. These peas weigh 60 pounds to the bushel, giving Mr. Brazee 5400 pounds for a total. The selling price of each pound is 5 cents, and it takes but little more calculating to see that on three acres of ground his gross return is \$270, or an average of \$90

Prices the lowest for quality the best. Drop us a postal—we'll do the rest.

LITTLE HAZEL SAVOY DROWNS

DESCHUTES SIXTH 1913 VICTIM

Tot Falls From Bridge From Which Mrs. Allgood Went to Death—Father Was Injured, and Mother Is Now Dangerously Sick.

* River Victims at Bend, 1913. *
* April 16—William Gorton, *
* 8; Lawrence McClaskey, 6. *
* May 21—Earl McClure, 15. *
* July 27—Ralph Lunbeck, 19. *
* Sept. 18—Mrs. Allgood, 68. *
* Oct. 16—Hazel Savoy, 3. *

Another victim was claimed by the Deschutes river—the sixth this year—when little Hazel, the 3 years and 10 months old daughter of Mr. and Mrs. Jack Savoy, was drowned last Thursday morning.

The little girl was playing on the bridge that leads from town to The Bend Company's sawmill, when last seen. Evidently she fell from the bridge, close to the place from which Mrs. A. W. Allgood went off on the night of September 18 when a refractory horse backed the buggy she was riding in from the bridge. It probably was not for 10 minutes that the accident was noted, and then an alarm was sent in. Geo. Straight, at the mill, notified the town by telephone, and Drs. Ferrell and Coe went to the river, with many others.

A search was immediately started along the banks, and it was not for about half an hour that H. J. Overturf and D. M. Davis, who were in a canoe, located the body which was lodged in reeds not far from the west bank just below the island. All efforts to resuscitate the child failed. The funeral occurred Saturday at 2 p. m., Father Butler officiating.

A specially sad feature of the tragedy was that Mrs. Savoy at the time of the drowning was critically sick with pneumonia. Besides two little boys, she has an infant in arms. Also, Mr. Savoy was laid off from work at the mill because of a badly cut arm. Friends of the family started a subscription list and about \$150 was raised.

to the acre. Mr. Brazee will sell all these peas for seed, with the exception of the quantity he will save for his own planting next year.

Mr. Brazee said that there is no better feed to be had for hogs than these Canada field peas, and there is a great demand from his neighbors to obtain seed. Having been found to be a very profitable crop, they will no doubt take an important place among the crops of the Powell Butte district where the swine industry is attaining extensive proportions.

Veterinary Remedies

STOCK FOOD—POULTRY FOOD
---GALL POWDERS---LINIMENTS
---DISTEMPER REMEDIES---LICE
AND FLY DESTROYERS.

ALL STOCK, POULTRY AND DOG REMEDIES

They are absolutely guaranteed to give satisfaction, or money refunded. Dr. Korinek is a widely known and successful veterinarian. He served two terms as State Veterinarian. His medicines are the fruit of experience and scientific practice. The results of using them will satisfy you.

OWL PHARMACY

SOLE AGENTS

We Keep Our Money In Crook County

EVERY FARMER IN THE POWELL BUTTE, the Laidlaw and the other districts knows that we always buy grain and hay that is grown by them, if we possibly can get it. We do this not only because it is good grain and hay, but also because we realize that in helping our home people we are helping ourselves.

Remember This

when you have business to give us.

We are always in the market for hay and grain
